Total Budget:	\$ 30,000			

## DISCUSSION

Due to the acute crossing angle of Stockton Boulevard and R Street near the light rail tracks and the position of the crossing arms (see ATTACHMENT 1), RT has experienced accidents where vehicles have entered the track way with the crossing arms down. To improve the safety of the traveling public, RT worked with the City of Sacramento (City) and the California Public Utilities Commission to develop proposed vehicle safety improvements. Plans have been completed by RT with the City's concurrence. The City has agreed to use its forces to construct the project pending RT's agreement to reimburse the City for the cost of construction.

The proposed alterations include new signing, striping, and a channelizing island on R Street east of Stockton Boulevard, a raised median barrier along Stockton Boulevard north of the at-grade crossing, and "KEEP CLEAR" pavement markings between the gate and the tracks on the southbound lanes of Stockton Boulevard. The construction estimate for the project is \$30,000.
