

Sacramento Regional Transit District Agenda

**COMBINED MEETING OF THE
RETIREMENT BOARDS FOR THE EMPLOYEES AND RETIREES OF THE
SACRAMENTO REGIONAL TRANSIT DISTRICT
WEDNESDAY, MARCH 19, 2025 AT 1:00 P.M.
SACRAMENTO REGIONAL TRANSIT Q STREET AUDITORIUM
1102 Q STREET, 4TH FLOOR, SUITE 4600
(13th Street Light Rail Station)**

Website Address: www.sacrt.com

MEETING NOTE: *This is a joint and concurrent meeting of the five independent Retirement Boards for the pension plans for the employees and retirees of the Sacramento Regional Transit District. This single, combined agenda designates which items will be subject to action by which board(s). Members of each board may be present for the other boards' discussions and actions, except during individual closed sessions.*

ROLL CALL

ATU Retirement Board:	Directors: Li, Valenton, McGee Lee, Scott Alternates: Selenis, Smith
IBEW Retirement Board:	Directors: Li, Valenton, Pickering Alternates: Selenis, D. Thompson
AEA Retirement Board:	Directors: Li, Valenton, Devorak, McGoldrick Alternates: Selenis, Santhanakrishnan
AFSCME Retirement Board:	Directors: Li, Valenton, Guimond, L. Thompson Alternates: Selenis, Elder
MCEG Retirement Board:	Directors: Li, Valenton, Bobek, Hinz Alternates: Selenis, Flores

PUBLIC ADDRESSES BOARD ON MATTERS ON CONSENT AND MATTERS NOT ON THE AGENDA

At this time the public may address the Retirement Board(s) on subject matters pertaining to Retirement Board business listed on the Consent Calendar, any Closed Sessions or items not listed on the agenda. Remarks may be limited to 3 minutes subject to the discretion of the Common Chair. Members of the public wishing to address one or more of the Boards may submit a "Public Comment Speaker Card" to the Assistant Secretary. While the Retirement Boards encourage your comments, State law prevents the Boards from discussing items that are not set forth on this meeting agenda. The Boards and staff take your comments very seriously and, if appropriate, will follow up on them.

ADJOURN

NOTICE TO THE PUBLIC

It is the policy of the Boards of Directors of the Sacramento Regional Transit District Retirement Plans to encourage participation in the meetings of the Boards of Directors. At each open meeting, members of the public shall be provided with an opportunity to directly address the Board on items of interest to the public that are within the subject matter jurisdiction of the Boards.

This agenda may be amended up to 72 hours prior to the meeting. An agenda, in final form, is posted to SacRT's website at www.sacrt.com and at the front of the Sacramento Regional Transit District's administration building on 1102 Q Street. Persons requiring accessible formats of the agenda or assisted listening devices/sign language interpreters should contact the Retirement Services Administrator at (916) 556-0296 (voice) or (916) 483-4327 (TDD) at least 72 business hours in advance of the Board meeting.

Any staff reports or other documentation submitted for items on the agenda are available online at www.sacrt.com, on file with the Retirement Services Administrator and the Clerk to the Board of Directors of the Sacramento Regional Transit District, and available for public inspection at 1400 29th Street, Sacramento, CA. Persons with questions regarding those materials should contact the Retirement Services Administrator (916) 556-0296.

**Sacramento Regional Transit District
Special Retirement Board Meeting (IBEW)
Wednesday, February 26, 2025
Meeting Minutes**

This meeting was held as a common meeting of the Sacramento Regional Transit District Retirement Boards (AEA, AFSCME, ATU, IBEW, MCEG).

The Retirement Board was brought to order at 1:02 p.m. A quorum was present and comprised as follows: Director Valenton, Alternate Selenis, Director Pickering, and Alternate David Thompson. Director Li was absent.

GOVERNANCE

1. Resolution: Election of Common Chair and Common Vice Chair (ALL). (Gobel)

John Gobel, Senior Manager of Pension and Retirement Services, advised the Boards of Patrick Kennedy's decision to resign from the Retirement Boards, as well as the appointment of Director Shelly Valenton to serve the remainder of Director Kennedy's four-year term and the appointment of Devra Selenis to serve the remainder of the Alternate Director term vacated by Ms. Valenton.

Mr. Gobel explained that, given these changes among the Common Directors, the Retirement Boards could elect a new Common Chair and Common Vice Chair to preside over joint meetings of two or more Boards. Mr. Gobel also explained that the nominations and votes for Common Chair and Common Vice Chair could only consider Directors who are members of all five Retirement Boards -- currently Director Henry Li and Director Shelly Valenton.

Director Valenton moved to elect Director Li as Common Chair and herself as Common Vice Chair. The Motion was seconded by Alternate Selenis. The motion carried unanimously by roll call vote: Ayes – Pickering, D. Thompson, Valenton, and Selenis; Noes – None.

Director Valenton presided over the remainder of this meeting as Common Vice Chair of the Retirement Boards.

CONSENT CALENDAR

3. Motion: Approving the Minutes for the December 18, 2024 Quarterly Retirement Board Meeting (IBEW). (Gobel)

Director Valenton moved to adopt Agenda Item 3. The motion was seconded by Alternate Selenis. Agenda Item 3 was carried unanimously by roll call vote: Ayes – Pickering, D. Thompson, Valenton, and Selenis; Noes – None.

February 26, 2025 Meeting Minutes – Continued

NEW BUSINESS

13. Information: Preliminary Results of Actuarial Valuation Process for Retirement Plans (ALL). (Gobel)

Mr. Gobel introduced consulting actuary Graham Schmidt of Cheiron to present the preliminary results of the actuarial valuation reports (AVRs) for all three Retirement Plans, i.e., the ATU Plan, the IBEW Plan, and the Salaried Plan. Mr. Gobel explained that this item was informational and that final AVRs and discrete contribution rates would be submitted for adoption at the next Retirement Board meeting on March 19th.

Mr. Schmidt began his presentation by discussing the annual valuation process and reviewing aggregate activity for the Retirement Plans. Mr. Schmidt reported that, as of June 30, 2024, the Retirement Plans covered 2,483 participants or “members” and noted that a majority of active members (approximately 60%) are subject to the benefit formulas and normal cost sharing provisions prescribed by PEPRAs. Mr. Schmidt also addressed the impact of strong investment performance during the plan year by discussing the five-year smoothing of returns and explaining that the actuarial value of assets or AVA (\$407 million) used to determine funded ratios for the Retirement Plans was actually lower than the market value of assets (\$412 million) because the actuarial value did not reflect the deferred investment gains that would be recognized in future valuations.

In line with investment returns that exceeded the assumed rate of return for the Retirement Plans and the improved funded ratios for benefit obligations, Mr. Schmidt explained that aggregate or blended employer contribution rates would be decreasing relative to the prior fiscal year. For the fiscal year beginning July 1, 2025, Mr. Schmidt reported blended employer contribution rates of 24.6% for the ATU Plan, 29.5% for the IBEW Plan, and 36.5% for the Salaried Plan. Mr. Schmidt also discussed the process of determining contribution rates for PEPRAs members and reported that employee contributions for the ATU Plan, the IBEW Plan, and the Salaried Plan would not be changing for the new fiscal year.

Following his discussion of preliminary results for June 30, 2024, Mr. Schmidt addressed long-term funding projections. Mr. Schmidt explained that, under a hypothetical scenario in which the experience of the Retirement Plans is in-line with all actuarial assumptions (including remitting the actuarially-determined contribution as required and achieving annual investment returns of 6.75%), the Retirement Plans would be projected to pay-off the largest tranche of unfunded actuarial liability (UAL) by the June 30, 2032 valuation. Mr. Schmidt further explained that, under those projections, employer contributions rates would be expected to drop significantly in fiscal year 2034.

In response to a question from ATU Director McGee Lee regarding the percentage of PEPRAs members in the ATU Plan, Mr. Schmidt reported that plan-specific data would be provided with the AVRs (which are scheduled for submission to the Retirement Boards at their March 19th meeting).

February 26, 2025 Meeting Minutes – Continued

In response to a question from MCEG Director Hinz regarding the historical significance of funded ratios projected for June 30, 2032, Mr. Schmidt reported that that they would represent the best funded ratios for the Retirement Plans since the late 1990s.

In response to a question from Director Valenton regarding the Retirement Plans' funded status compared to similar or "peer" plans, Mr. Schmidt reported that, with respect to a two-year old survey of public agency defined benefit plans in the state of California, the Retirement Plans were not in either the top or bottom quartile, and likely were in the range of the 50th percentile.

REPORTS, IDEAS AND COMMUNICATION

14. Information: Senior Manager, Pension & Retirement Services - Verbal Update (ALL). (Gobel)

Mr. Gobel reported that an ad hoc group of Retirement Board members (consisting of ATU Director Lee, IBEW Director Pickering, AEA Director McGoldrick, AFSCME Director Guimond, and MCEG Director Bobek) met earlier in the day to review proposals from investment managers in the fixed income asset class. This ad hoc group considered three core-plus managers screened by the team at Callan LLC. Mr. Gobel further reported that the group selected two finalists for presentation to all five Retirement Boards, and that staff was working with Callan to schedule finalist presentations for the Special Meeting planned for April 23rd.

Mr. Gobel noted that the Callan Institute's 2025 National Conference is being held in Scottsdale from Sunday, April 27th to Tuesday, April 29th, and reminded the Retirement Boards that attendance at educational events is consistent with the Retirement Board Member and Staff Education and Travel Policy. Accordingly, Mr. Gobel asked interested Directors and Alternate Directors to review their work schedules for the referenced days and contact Administrative Assistant Jessica Cruz Mendoza for registration and travel assistance.

Mr. Gobel reminded Retirement Board members that Statements of Economic Interests (Form 700) will be available for electronic filing this year and that the deadline for submission is April 1, 2025. Mr. Gobel also shared his understanding that information regarding the new process would be e-mailed to Retirement Board members by Friday, February 28th and that the forthcoming communication would reference Tabetha Smith, the Clerk to the RT Board. As an addendum to Mr. Gobel's comments, Shayna van Hoften, Legal Counsel to the Retirement Boards, explained that completing Form 700 electronically is much faster than preparing a hard copy, and reminded the Board members that she is available to answer questions regarding this annual filing.

February 26, 2025 Meeting Minutes – Continued

ADJOURN

With no further business to discuss and no public comment on matters not on the agenda, the Retirement Board meeting was adjourned at 2:00 p.m.

Neal Pickering, Acting Board Chair

ATTEST:

Henry Li, Secretary

By: _____
John Gobel, Assistant Secretary

RETIREMENT BOARD STAFF REPORT

DATE: March 19, 2025
TO: Sacramento Regional Transit Retirement Board - IBEW
FROM: Jason Johnson - VP, Finance/CFO
SUBJ: RECEIVE AND FILE ADMINISTRATIVE REPORTS FOR THE QUARTER ENDED DECEMBER 31, 2024 FOR THE IBEW PENSION PLAN (IBEW). (JOHNSON)

RECOMMENDATION

Motion to Approve.

RESULT OF RECOMMENDED ACTION

Motion: Receive and File Administrative Reports for the Quarter Ended December 31, 2024 for the IBEW Pension Plan (IBEW). (Johnson)

FISCAL IMPACT

None.

DISCUSSION

Table 1 below shows the employer and employee contribution rates for the Sacramento Regional Transit District IBEW Retirement Plan, by tier, as of the date indicated.

Table 1

**Employer Contribution Rates
As of December 31, 2024**

	IBEW
	Contribution Rate
Classic	34.39%
PEPRA*	26.35%

*PEPRA employee rates: 7.00%

Unaudited Financial Statements

Attached hereto are unaudited financial statements for the quarter and the year-to-date ended December 31, 2024. The financial statements are presented on an accrual basis and consist of a Statement of Fiduciary Net Position (balance sheet) (Attachment 1), a Statement of Changes in Fiduciary Net Position (income statement) for the quarter ended December 31, 2024 (Attachment 2), and a year-to-date Statement of Changes in Fiduciary Net Position (Attachment 3).

The Statement of Fiduciary Net Position includes a summary of fund assets showing the amounts in the following categories: investments, prepaid assets, and other receivables. This statement also provides amounts due from/to the District and Total Fund Equity (net position).

The Statement of Changes in Fiduciary Net Position includes activities in the following categories: investment gains/losses, dividends, interest income, unrealized gains/losses, benefit contributions/payouts, and investment management and administrative expenses.

Asset Rebalancing

Pursuant to Section IV, Asset Rebalancing Policy of the Statement of Investment Objectives and Policy Guidelines for the Sacramento Regional Transit District Retirement Plans (Statement of Investment Objectives and Policy Guidelines), the Retirement Boards have delegated authority to manage pension plan assets in accordance with the approved rebalancing policy to the District's VP, Finance/CFO or designee. The VP, Finance/CFO is required to report asset rebalancing activity to the Boards at their quarterly meetings.

Rebalancing can occur for one or more of the following reasons:

1. The Pension Plan ended the month with an accounts receivable or payable balance due to the District. A payable or receivable is the net amount of the monthly required contribution (required contribution is the percentage of covered payroll determined by the annual actuarial valuation) less the Plan's actual expenses.
2. The Pension Plan hires or removes a Fund Manager, in which case securities must be moved to a new fund manager.
3. The Pension Plan investment mix is under or over the minimum or maximum asset allocation as defined in the Statement of Investment Objectives and Policy Guidelines.

Attached hereto as Attachment 4 is the IBEW Plan's Schedule of Cash Activities for the three months ended December 31, 2024. The schedule of cash activities includes a summary of Plan activities showing the amounts in the following categories: District's

pension contributions to the Plan, payments to retirees, and the Pension Plan's cash expenditures paid. This schedule also lists the rebalancing activity that occurred for the three months ended December 31, 2024. The IBEW Plan reimbursed \$6,232.53 to the District as the result of the net cash activity between the pension plan expenses and the required pension contributions.

Attached hereto as Attachment 5 is the IBEW Plan's Asset Allocation as of December 31, 2024. This statement shows the IBEW Plan's asset allocation as compared to targeted allocation percentages as defined in the Statement of Investment Objectives and Policy Guidelines.

Attached hereto as Attachment 6 is a reconciliation between the Callan Performance Report and the ATU, IBEW and Salaried Pension Plans' unaudited financial statements. The reports differ in that the unaudited financial statements reflect both investment activities and the pension fund's inflows and outflows. Callan's report only reflects the investment activities. The "Net Difference" amounts shown are the results of Callan and Northern Trust Company using different valuations for the same securities and/or litigation settlements received by the Plans.

Included also as Attachment 7 is a reconciliation between the Callan Performance Report and the Schedule of Cash Activities for payments made from/to the District. Callan's report classifies gains from trades and litigation income as "net new investments." Finance staff classifies gains from trades and litigation income in the Pension Plan's unaudited Statement of Changes in Fiduciary Net Position (Attachment 2) as "Other Income," which is combined in the category of "Interest, Dividend, & Other Inc".

Attached hereto as Attachment 8 is a schedule reflecting Fund Managers' quarterly investment returns and their investment fees. Additionally, the schedule reflects annual rates of return on investment net of investment fees for the one-year and three-year periods ended December 31, 2024 as compared to their benchmarks.

RETIREMENT BOARD STAFF REPORT

DATE: March 19, 2025
TO: Sacramento Regional Transit Retirement Board - IBEW
FROM: Jason Johnson, VP, Finance/CFO
SUBJ: RECEIVE AND FILE THE FISCAL YEAR 2024 STATE
CONTROLLER'S REPORT FOR THE IBEW PENSION PLAN
(IBEW). (JOHNSON)

RECOMMENDATION

Motion to Approve.

RESULT OF RECOMMENDED ACTION

Motion: Receive and File the Fiscal Year 2024 State Controller's Report for the Retirement Plan for Sacramento Regional Transit District Employees who are Members of IBEW Local 1245 (IBEW). (Johnson)

FISCAL IMPACT

None.

DISCUSSION

The financial data for the annual State Controller's Public Retirement Systems Financial Transactions Report is prepared in accordance with California Government Code Section 7504. This statute requires all state and local retirement systems to annually submit audited financial statements of their Pension Plans to the State Controller's Office within six months of the close of the fiscal year. The State Controller's Public Retirement Systems Financial Transactions Report (Attachment #1) for the fiscal year ended June 30, 2024 was filed on December 30, 2024.

**PUBLIC RETIREMENT SYSTEM
FINANCIAL TRANSACTIONS REPORT
COVER PAGE**

Sacramento Regional Transit District IBEW Employees' Retirement Plan

Fiscal Year: **2024**

ID Number: **16383440513**

For the Fiscal Year Ended: 06/30/2024 (MM/DD/YYYY)

Certification:

I hereby certify that, to the best of my knowledge and belief, the report forms fairly reflect the financial transactions of the agency in accordance with the requirements as prescribed by the California State Controller.

Retirement Administrator

VP of Finance/CFO

Signature

Title

Jason Johnson

12/30/2024

Name (Please Print)

Date

Per Government Code section 7504, this report is due within six months after the end of the fiscal year. Public Employee Retirement Systems are also required to furnish an audited financial statement on an annual basis and, for defined benefit systems, an actuarial valuation report at least every three years. To meet the filing requirements, all portions must be received by the State Controller's Office.

Footnotes

Fiscal Year: 2024		
FORM DESC	FIELD NAME	FOOTNOTES
NetPosition	(R03)Investments	Investment receivables fluctuate based on timing of investment transactions.
NetPosition	(R04)OtherReceivables	A portion of this amount represents prepaid expense for fiduciary insurance that is amortized over a 12 month period (there is no line for prepaid expense on the SCO forms so it is included in other receivables. The remaining amount is plan manager receivables. The balance fluctuates based on timing of receipts.
NetPosition	(R07)U.S.GovernmentObligations	Investment portfolio mix amounts fluctuate depending on fund manager purchases/sales and changes in market value. The primary reason for the increase this fiscal year is the increase in fair market value.
NetPosition	(R09)DomesticCorporateBonds	Investment portfolio mix amounts fluctuate depending on fund manager purchases/sales and changes in market value. The primary reason for the increase this fiscal year is the decrease in fair market value.
NetPosition	(R16)OtherInvestments	Other investments consist of other asset backed securities held by our domestic fixed income manager. Investment portfolio mix amounts fluctuate depending fund manager purchases/sales and changes in market value.
Additions	(R14)NetAppreciation(Depreciation)inFairValueofInvestments	Net Appreciation/Depreciation amounts fluctuate based on annual market performance and portfolio market performance.
Additions	(R15)Interest	Interest income fluctuates based on annual market performance and portfolio market performance.
Additions	(R17)OtherInvestmentIncome	The other income is litigation settlement proceeds we received from Brandes, a former fund manager. Brandes held stock in Royal Bank of Scotland against which they filed a securities litigation claim after the GFC on behalf of their clients.
Deductions	(R14)MemberRefund-General	Refunds were lower because there was less employee turnover in FY24.

RETIREMENT BOARD STAFF REPORT

DATE: March 19, 2025
TO: Sacramento Regional Transit Retirement Boards - All
FROM: Jason Johnson, VP, Finance/CFO
SUBJ: RECEIVE AND FILE THE FINANCIAL STATEMENTS WITH
INDEPENDENT AUDITOR'S REPORT FOR THE TWELVE
MONTH PERIOD ENDED JUNE 30, 2024 (ALL). (JOHNSON)

RECOMMENDATION

Motion to Approve.

RESULT OF RECOMMENDED ACTION

Motion: Receive and File the Financial Statements with Independent Auditor's Report, Auditor's Report to the Board of Directors, and the Report on Internal Control for the Twelve-Month Period Ended June 30, 2024 (ALL). (Johnson)

FISCAL IMPACT

None.

DISCUSSION

In accordance with California Government Code Section 7504, the Retirement Plans for employees of the Sacramento Regional Transit District (District) are required to have an annual audit performed. Crowe LLC conducted the Plans' audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. The standards require that the auditors plan and perform the audit to obtain reasonable assurance that the Plans' financial statements are free of material misstatements.

For the fiscal year ended June 30, 2024, the investment assets for the ATU, IBEW and Salaried Plans continued to be held in a commingled trust. Within that commingled trust, the balance of investments for the ATU, IBEW and Salaried Plans are calculated based on a percentage of ownership as determined by the ATU, IBEW and Salaried Plans' custodian.

As noted in the report (Attachment 1), the combined net position held in trust for pension benefits increased \$40,814,464, or 10.99% from the beginning-of-year balance of \$371,524,175 to the end-of-year balance of \$412,338,639. The audit confirmed that the District made 100% of its actuarially determined contribution of \$29,063,868.

The audit also determined that the Retirement Plans' financial statements are free of material misstatements and that the Retirement Plans are operated with appropriate internal controls.

Staff Recommendation

The following documents (Attachments 1-3) are submitted to the Board for receipt and filing:

- The Audited Financial Statements – Attachment 1
- Report to the Board of Directors – Attachment 2

INDEPENDENT AUDITOR'S REPORT

Members of the Retirement Board of Directors
Sacramento Regional Transit District
Sacramento, California

Report on the Audit of the Financial Statements***Opinions***

We have audited the financial statements of the ATU Plan, IBEW Plan and Salaried Plan for Sacramento Regional Transit District Employees (the Plans), as of and for the year ended June 30, 2024, and the related notes to the financial statements, which collectively comprise the Plans' basic financial statements as listed in the table of contents.

In our opinion, the accompanying financial statements referred to above present fairly, in all material respects, the plan net position of the ATU Plan, IBEW Plan and Salaried Plan for Sacramento Regional Transit District Employees, as of June 30, 2024, and the changes in plan net position for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinions

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS) and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States (*Government Auditing Standards*). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Plans, and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plans' ability to continue as a going concern for twelve months beyond the financial statement date, including any currently known information that may raise substantial doubt shortly thereafter.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinions. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS and *Government Auditing Standards* will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS and *Government Auditing Standards*, we

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plans' internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plans' ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that Management's Discussion and Analysis, the Schedules of Changes in the Net Pension Liability and Related Ratios, Schedules of District Contributions, and Schedule of Investment Returns, as listed in the table of contents, be presented to supplement the basic financial statements. Such information is the responsibility of management and, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Supplementary Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the Plans' basic financial statements. The Schedules of Investment and Administrative Expenses are presented for purposes of additional analysis and are not a required part of the basic financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. The information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the Schedules of Investment and Administrative Expenses are fairly stated, in all material respects, in relation to the basic financial statements as a whole.

Other Information

Management is responsible for the other information included in the annual report. The other information comprises the Members of the Retirement Board and Administrative Staff but does not include the basic financial statements and our auditor's report thereon. Our opinions on the basic financial statements do not cover the other information, and we do not express an opinion or any form of assurance thereon.

In connection with our audit of the basic financial statements, our responsibility is to read the other information and consider whether a material inconsistency exists between the other information and the basic financial statements, or the other information otherwise appears to be materially misstated. If, based on the work performed, we conclude that an uncorrected material misstatement of the other information exists, we are required to describe it in our report.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated December 2, 2024 on our consideration of Plans' internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of Plans' internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering Plans' internal control over financial reporting and compliance.

**RETIREMENT PLANS FOR
SACRAMENTO REGIONAL TRANSIT
DISTRICT EMPLOYEES
MANAGEMENT'S DISCUSSION AND ANALYSIS (UNAUDITED)
FOR THE FISCAL YEAR ENDED JUNE 30, 2024**

This section presents Management's Discussion and Analysis (MD&A) of the financial activities of the defined-benefit Retirement Plans for the Sacramento Regional Transit District Employees (the Plans) for the fiscal year ended June 30, 2024 (FY 2024). We encourage readers to consider the information presented here in conjunction with the financial information and notes that we have furnished in this report.

FINANCIAL HIGHLIGHTS

As of June 30, 2024, the Plans' net position restricted for pension benefits and program administration (net position) totaled \$412,338,639. This represented an increase of \$40,814,464, or 11.0%, from the \$371,524,175 of the Plans' net position as of June 30, 2023. Higher investment performance was the primary reason for the increase.

Additions to net position increased by \$17,299,189, or 30.8%, for FY 2024. Higher investment performance was the primary reason for the increase in additions.

Deductions from net position increased by \$985,712, or 3.1%, for FY 2024. The primary reason for the increase is a result of increased monthly benefit payments due to an increase in the number of retirees.

The Plans' funding objective is to meet long-term benefit obligations through contributions and investment earnings. To help achieve level and predictable contribution costs from one year to the next, the Plans base the determination of contribution rates on an actuarial asset valuation method that gradually adjusts to the market (fair) value of assets (asset smoothing). Under this actuarial asset valuation methodology, any investment market returns for the fiscal year that are above or below the assumed investment return rate of 6.75% (which was used to determine the contribution rates for FY 2024) are recognized over five years (the asset smoothing period). This smoothed value is referred to as the Actuarial Value of Assets. By using the Actuarial Value of Assets to determine the contribution rates, the Plans can lower the year-to-year volatility in contribution rates that would come from using the fair value of assets.

As of June 30, 2024, the Plans' total pension liability was \$534,504,873, up from \$508,336,652 as of June 30, 2023. The fiduciary net position as a percentage of total pension liability increased to 77.1% as of June 30, 2024, from 73.1% as of June 30, 2023.

Overview of Financial Statements

This MD&A serves as an introduction to the basic financial statements and other information accompanying the basic financial statements, which are comprised of the following components:

- Statement of Plan Net Position - Pension Trust Funds
- Statement of Changes in Plan Net Position - Pension Trust Funds
- Notes to the Basic Financial Statements

A Statement of Plan Net Position and a Statement of Changes in Plan Net Position are presented for the Pension Trust funds as of and for FY 2024, along with comparative total information as of and for the fiscal year ended June 30, 2023. These financial statements reflect the resources available to pay benefits to retirees and beneficiaries as of year-end, and the changes in those resources during the year.

**RETIREMENT PLANS FOR
SACRAMENTO REGIONAL TRANSIT
DISTRICT EMPLOYEES
MANAGEMENT'S DISCUSSION AND ANALYSIS (UNAUDITED)
FOR THE FISCAL YEAR ENDED JUNE 30, 2024**

The Pension Trust funds' statements report the Plans' net position restricted for pension benefits and program administration. Over time, increases or decreases in net position serve as one indicator of whether the Plans' financial health is improving or deteriorating. Other factors, such as market conditions or the Plans' fiduciary net position as a percentage of the employers' total pension liability, should also be considered in measuring the Plans' overall health.

The Notes to the Basic Financial Statements are an integral part of the financial reports and provide additional information that is essential for a full understanding of the data provided in the financial statements.

In addition to the financial statements and accompanying notes, this report presents certain Required Supplementary Information which includes the employer's changes in net pension liability and related ratios, the employer's actuarially determined contribution rates (ADC), actuarial assumptions used to calculate the ADC, historical money-weighted rates of return, and other required supplementary information as required by GASB Statement No. 67.

Schedules of investment and administrative expenses are presented as Other Supplemental Information following the Required Supplementary Information.

Fiduciary Net Position

As summarized above, as of June 30, 2024, the Plans' net position restricted for pension benefits and program administration (net position) totaled \$412,338,639. This represented an increase of \$40,814,464, or 11.0%, over the Plans' net position of \$371,524,175 as of June 30, 2023. The increase in net position for FY 2024 was due to investment income, offset to some degree by benefits and expenses paid during the fiscal year exceeding the contributions received. For FY 2024, the total fund return, gross of fees, of 11.45%, was 0.52% higher than the investment policy benchmark of 10.93%, and exceeded the fiscal year ended June 30, 2023, total fund return, gross of fees, of 8.27%. During fiscal year ended June 30, 2024, investments with the strongest returns came from the U.S. equity and international equity investments.

In FY 2024, the increase in cash and short-term investments was primarily the result of changes within Fixed Income. The manager increased the allocation to cash and investments with shorter durations to mitigate volatility and better position the portfolio for future opportunities. The manager also increased the allocation to commercial mortgage-backed securities.

The increase in securities payable and the decrease in receivables as of June 30, 2024 is primarily due to changes in the volume of trading activity at year-end by the external investment managers. The decrease in accounts payable is due to the timing of payments to third parties at year-end.

**RETIREMENT PLANS FOR
SACRAMENTO REGIONAL TRANSIT
DISTRICT EMPLOYEES
MANAGEMENT'S DISCUSSION AND ANALYSIS (UNAUDITED)
FOR THE FISCAL YEAR ENDED JUNE 30, 2024**

The table below compares the Plans' net position for the fiscal years ended June 30, 2024 and 2023.

**PLAN NET POSITION
FOR THE FISCAL YEARS ENDED JUNE 30**

	2024	2023	Increase/ (Decrease)	% Change
Assets				
Cash and short-term investments	\$ 20,834,193	\$ 19,787,498	\$ 1,046,695	5.3%
Receivables	4,426,177	7,789,738	(3,363,561)	(43.2%)
Investments	419,979,474	371,977,709	48,001,765	12.9%
Total Assets	<u>445,239,844</u>	<u>399,554,945</u>	<u>45,684,899</u>	11.4%
Liabilities				
Securities payable	32,268,980	27,346,822	4,922,158	18.0%
Accounts payable	632,225	683,948	(51,723)	(7.6%)
Total Liabilities	<u>32,901,205</u>	<u>28,030,770</u>	<u>4,870,435</u>	17.4%
Net position restricted for pension benefits	<u>\$ 412,338,639</u>	<u>\$ 371,524,175</u>	<u>\$ 40,814,464</u>	11.0%

GASB Statement No. 67 replaced GASB Statement No. 25 and redefined pension liability and expense for financial reporting purposes but does not apply to contribution amounts for pension funding purposes. When measuring the total pension liability, GASB uses the same actuarial cost method and the same type of discount rate as the Plans use for funding. Therefore, the employers' total pension liability measured for financial reporting shown in this report is determined on the same basis as the Plans' actuarial accrued liability measured for funding.

The Plans retain an independent actuarial firm, Cheiron, to perform the annual actuarial valuations to determine the employers' total pension liability (expected future benefits) and ADC. The annual actuarial valuation measures the current and projected assets and liabilities of the retirement system, as well as the Plans' funded status. This information forms the basis for establishing the actuary's recommendations for the employer and member contribution rates for the upcoming fiscal year to pay expected future benefits.

As of June 30, 2024, the employer's total pension liability was \$534,504,873, and the net pension liability (the total pension liability less the Plans' fiduciary net position) was \$122,166,234. The Plans' fiduciary net position as a percentage of the total pension liability was 77.1%. In general terms, this ratio means that as of June 30, 2024, the Plans had approximately 77 cents available for each dollar of anticipated future liability.

The Required Supplementary Information presents additional information regarding the net pension liability.

Total Additions	<u>73,519,154</u>	<u>56,219,965</u>	<u>17,299,189</u>	<u>30.8%</u>
Deductions				
Benefits paid	31,941,785	30,702,604	1,239,181	4.0%
Change in bargaining group	-	248,765	(248,765)	-100.0%
Administrative expenses	762,905	767,609	(4,704)	(0.6%)
Total Deductions	<u>32,704,690</u>	<u>31,718,978</u>	<u>985,712</u>	<u>3.1%</u>
Increase in net position	40,814,464	24,500,987	16,313,477	66.6%
Net position, beginning	371,524,175	347,023,188	24,500,987	7.1%
Net position, ending	<u>\$ 412,338,639</u>	<u>\$ 371,524,175</u>	<u>\$ 40,814,464</u>	<u>11.0%</u>

Additions to Net Position

Financing for the benefits the Plans provided to its members comes primarily through the collection of employer and member contributions and from investment earnings. For the fiscal years ended June 30, 2024 and 2023, total additions were \$73,519,154 and \$56,219,965, respectively.

For the fiscal years ended June 30, 2024 and 2023, the combined employer and member contributions were \$32,666,456 and \$29,430,531, respectively, for an increase of \$3,235,925. Employer contributions increased by \$2,506,864 for FY 2024 compared to the fiscal year ended June 30, 2023, or about 9.4%, was mainly due to an approximate 9.6% increase in the employer's aggregate payroll for the year ended June 30, 2024. The increase in member contributions of \$729,061, or about 25.4%, is partially due to an increase in the employer's aggregate payroll for year-ended June 30, 2024 and an increase in the ATU Plan member contribution rate of .50% and increased further by the growth in the PEPRA tiers of the Plans.

Changes in bargaining group occur when non-vested members of the ATU Plan transfer to the Salaried Plan. The District calculates the total normal cost contributions made to the ATU plan on the employees' behalf along with the interest earned on those contributions and transfers that balance to the Salaried Plan. Changes from year to year are based on the number of individuals who transfer between the ATU Plan and Salaried Plan. There were no transfers made in FY 2024.

Net investment income after investment fees and expenses was \$40,852,698 and \$26,540,669 for fiscal years ended June 30, 2024 and 2023, respectively. The net investment gains were primarily driven by the investment performance of the portfolio.

**RETIREMENT PLANS FOR
SACRAMENTO REGIONAL TRANSIT
DISTRICT EMPLOYEES
MANAGEMENT'S DISCUSSION AND ANALYSIS (UNAUDITED)
FOR THE FISCAL YEAR ENDED JUNE 30, 2024**

Deductions from Net Position

The Plans' net position was primarily used for the payment of benefits to members and their beneficiaries, for the payment of contribution refunds to terminated employees, and for the cost of administering the Plans. For the fiscal years ended June 30, 2024 and 2023, total deductions were \$32,704,690 and \$31,718,978, respectively.

Deductions increased by \$985,712, or 3.1%, in FY 2024. The primary cause of the increase was due to the increase in the number of retirees and beneficiaries receiving benefits.

THE PLANS' FIDUCIARY RESPONSIBILITIES

The Plans' Retirement Boards and management staff are fiduciaries of the pension trust funds. Under the California Constitution and California state law, the net position must be used exclusively for the benefit of plan participants and their beneficiaries.

REQUESTS FOR INFORMATION

This report is designed to provide the Retirement Boards, the Plans' members, participating employers, taxpayers, and other stakeholders and interested parties with a general overview of the Plans' finances and to show accountability for the money the Plans receive.

The accompanying notes to the financial statements are an integral part of these financial statements.

RETIREMENT PLANS FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES

NOTES TO THE FINANCIAL STATEMENTS FOR THE FISCAL YEAR ENDED JUNE 30, 2024

1. DESCRIPTION OF THE PLANS

The financial statements of the Retirement Plans for the Sacramento Regional Transit District Employees encompass the financial position and changes therein, for the ATU, IBEW, and Salaried Plans. The combined plans are reported as pension trust funds in the Sacramento Regional Transit District's (District) financial statements.

ATU and IBEW Plans

The Retirement Plan for Sacramento Regional Transit District Employees who are Members of ATU Local 256 (ATU Plan) and the Retirement Plan for Sacramento Regional Transit District Employees who are Members of International Brotherhood of Electrical Workers Local Union 1245, AFL-CIO (IBEW Plan) are single employer defined benefit pension plans covering eligible employees of the District. Participants should refer to their respective plan documents and collective bargaining agreements for more complete information. The ATU Plan and IBEW Plan were accounted for as one plan for accounting purposes prior to 2017 (collectively, the ATU/IBEW Plan). Effective July 1, 2016, separate trust agreements and financial record keeping was created for the ATU Plan and IBEW Plan based on actuarial calculations and trustee transactions. Each trust allows for accumulation of assets solely for the payment of benefits to plan members. The changes were approved by the Internal Revenue Service in order to establish the individual trusts.

Salaried Plan

The Sacramento Regional Transit District Retirement Plan for AFSCME, AEA, and Non-Represented Employees (Salaried Plan) is a single employer defined benefit pension plan covering eligible full- or part-time employees in the following employee groups: Operating Engineers Local 3 which remain under the Administrative Employees Association (AEA), Management and Confidential Employees Group (MCEG), and the American Federation of State, County & Municipal Employees, Local 146, AFL-CIO (AFSCME). AFSCME is further split into two groups AFSCME-Technical and AFSCME-Supervisors. Participants should refer to the Salaried Plan documents and collective bargaining agreement, where applicable, for more complete information.

Plan Tier Definition – As a result of labor negotiations and the court ruling on the Public Employees' Pension Reform Act of 2013 (PEPRA), Tier 2 was created in the ATU, IBEW and Salaried Plans, as well as a Tier 3 for the ATU only. The Tiers effective dates are directly affected by labor negotiations and whether the union/employee group was under a current Memorandum of Understanding (MOU). As of June 30, 2024 the following tiers apply to employees, based on their date of hire.

- ATU – Tier 1 consists of all employees hired on or before December 31, 2014, Tier 2 consists of all employees hired on or after January 1, 2016, Tier 3 consists of all employees hired during the time period January 1, 2015 to December 31, 2015.
- IBEW – Tier 1 consists of all employees hired on or before December 31, 2014, Tier 2 consists of all employees hired on or after January 1, 2015.
- Salaried – Tier 1 consists of all employees hired on or before December 31, 2014, Tier 2 consists of all employees hired on or after January 1, 2015.

Tier 1 and Tier 3 are closed to new entrants as all newly eligible employees will be placed into the respective Tier 2 plans.

**RETIREMENT PLANS FOR SACRAMENTO REGIONAL TRANSIT
DISTRICT EMPLOYEES**

**NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)
FOR THE FISCAL YEAR ENDED
JUNE 30, 2024**

1. DESCRIPTION OF THE PLANS (Continued)

General Provisions ATU, IBEW and Salaried Plans

Contributions to the ATU, IBEW and Salaried Plans are authorized or amended by the Retirement Board based on an actuarial basis. The authority under which benefit provisions are established and amended rests with the District's Board of Directors as a result of labor negotiations. Assembly Bill 1064, effective January 1, 2004, mandates that the Retirement Boards be comprised of equal representation of management and Bargaining Group employees. The Retirement Board shall consist of not more than 4 members and 2 alternates. Two (2) voting members and one (1) alternate shall be appointed by the District's Board of Directors and two (2) voting members and one (1) alternate shall be appointed by the ATU, IBEW, AEA, AFSCME, and MCEG employee groups.

The ATU, IBEW and Salaried Plans provide defined pension, disability, and death benefits to eligible employees who are members of the ATU, IBEW, AEA, MCEG, AFSCME-Technical, and AFSCME-Supervisors employee groups.

Plan membership for Tier 1, Tier 2 and Tier 3, at June 30, 2024, consisted of:

	ATU	IBEW	Salaried
Retirees and beneficiaries currently receiving benefits	505	186	375
Terminated members entitled to but not yet collecting benefits	31	17	43
Current active members	581	215	269
	<u>1,117</u>	<u>418</u>	<u>687</u>

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE FISCAL YEAR ENDED JUNE 30, 2024

1. DESCRIPTION OF THE PLANS (Continued)

RETIREMENT BENEFITS

Table 1 below presents a summary of the retirement benefits for Tier 1 employees for each of the employee groups represented by the ATU, IBEW and Salaried Plans. Table 1 also includes the summary for ATU Tier 3.

Table 1

TIER 1 & TIER 3	ATU Plan	IBEW Plan	Salaried Plan			
Employee Unions/Groups	ATU	IBEW	AFSCME - Technical	AFSCME - Supervisors	AEA	MCEG
Plan Terms	MOU	MOU	MOU	MOU	MOU	MOU
Vesting Period: Years of Service - % Vested	10 - 100%	5 - 100%	5 - 20% 6 - 40% 7 - 60% 8 - 80% 9 - 100%	5 - 20% 6 - 40% 7 - 60% 8 - 80% 9 - 100%	5 - 100%	5 - 100%
Vacation and sick leave sell back towards pension calculation	Allowable	Allowable	Allowable	Allowable	Allowable	Allowable
Disability Retirement Multiplier	Equal to applicable retirement age multiplier or 2% if age and service are not met. Vesting required					

RETIREMENT PLANS FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE FISCAL YEAR ENDED JUNE 30, 2024

1. DESCRIPTION OF THE PLANS (Continued)

Table 2 below presents a summary of the retirement benefits for Tier 2 employees for each of the employee groups represented by the ATU, IBEW and Salaried Plans.

Table 2

TIER 2	ATU Plan	IBEW Plan	Salaried Plan			
Employee Unions/Groups	ATU	IBEW	AFSCME - Technical	AFSCME - Supervisors	AEA	MCEG
Plan Terms	PEPRA	PEPRA	PEPRA	PEPRA	PEPRA	PEPRA
Vesting Period: Years of Service - % Vested	5 - 100%	5 - 100%	5 - 100%	5 - 100%	5 - 100%	5 - 100%
Vacation and sick sell back towards pension calculation	Not Allowable	Not Allowable	Not Allowable	Not Allowable	Not Allowable	Not Allowable
Disability Retirement Multiplier	Equal to applicable retirement age multiplier or 1% if age and service are not met. Vesting required					

The retirement ages, years of service and pension calculation multipliers vary by employee union/group. For Tier 1 and Tier 3 members, the multipliers and years of service range from 2% at age 55 or 25 years of service to 2.5% at age 60 or 30 or more years of service. All Tier 2 participants fall under PEPRA requirements.

The benefits for vested members begin at retirement and continue for the participant's life with no cost of living adjustment. The participant can elect to receive reduced benefits with continuing benefits to a beneficiary after death.

Disability Benefits – A participant is eligible for a disability benefit if the participant is unable to perform the duties of his or her job with the District, cannot be transferred to another job with the District, and has submitted satisfactory medical evidence of permanent disqualification from his or her job. Members are required to be vested in their respective union or employee group to qualify for disability retirement. The disability benefit is equal to the retirement allowance, as defined by the ATU, IBEW or Salaried Plan, multiplied by service accrued through the date of disability. The disability benefit cannot exceed the retirement benefit. The benefit begins at disability and continues until recovery or for the participant's life unless the participant elects to receive reduced benefits with continuing benefits to a beneficiary after death.

Pre-Retirement Death Benefit – A participant's surviving spouse is eligible for a pre-retirement death benefit if the participant is vested, based on the respective bargaining agreements. The pre-retirement death benefit is the actuarial equivalent of the normal retirement benefit, as if the participant retired on the date of death. The death benefit begins when the participant dies and continues for the life of the surviving spouse.

RETIREMENT PLANS FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE FISCAL YEAR ENDED JUNE 30, 2024

1. DESCRIPTION OF THE PLANS (Continued)

Administration – The ATU, IBEW, and Salaried Plans are administered by five Retirement Boards. All expenses incurred in the administration of the ATU, IBEW, and Salaried Plans are paid by the respective plan.

Plan Termination – Should the ATU, IBEW or the Salaried Plan be terminated, the Plans' net position will first be applied to provide for retirement benefits to retired members. Any remaining net position will be allocated to other members, oldest first both active and inactive, on the basis of the actuarial present value of their benefits.

2. SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting – The accompanying financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America and reporting guidelines set forth by the Government Accounting Standards Board (GASB). The ATU, IBEW and Salaried Plans are reported as pension trust funds which report resources that are required to be held in trust for the members and beneficiaries of the defined benefit pension plans. The ATU, IBEW and Salaried Plans are accounted for on the flow of economic resources measurement focus and the accrual basis of accounting.

The District's contributions to the ATU, IBEW and Salaried Plans are recognized in the period in which the contributions are due pursuant to formal commitments or contractual requirements. Benefits and refunds are recognized when due and payable in accordance with the ATU, IBEW and Salaried Plans' agreements.

Cash and Short-Term Investments – The ATU, IBEW and Salaried Plans consider all highly liquid investments with an original maturity of three months or less to be short-term investments.

Investments – Investments consist of securities or other assets held primarily for the purpose of income or profit and their present service capacity is based solely on their ability to generate cash or to be sold to generate cash. Realized gains or losses on the sale of investments are recorded on the trade date as the difference between proceeds received and the fair value at the beginning of the year, or cost if acquired during the year. Net appreciation (depreciation) in fair value of investments includes net unrealized market appreciation and depreciation of investments and net realized gains and losses on the sale of investments during the period. Interest income includes dividends and interest paid on the ATU, IBEW and Salaried Plans' investments. The investment assets for the ATU, IBEW and the Salaried Plans are combined into one commingled investment portfolio. The balances of investments owned by the plans are calculated based on a percentage of ownership as determined by the Plans' custodian, Northern Trust.

Estimates – The preparation of financial statements in conformity with generally accepted accounting principles in the United States of America requires the ATU, IBEW and Salaried Plans' administrators to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results may differ from those estimates.

New Pronouncements – For the fiscal year ended June 30, 2024, the ATU, IBEW and Salaried Plans did not implement new GASB pronouncements as they did not apply to the ATU, IBEW and Salaried Plans' financial activity or were immaterial.

The District will evaluate the impact of new GASB pronouncements in the year they are implemented or effective.

RETIREMENT PLANS FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE FISCAL YEAR ENDED JUNE 30, 2024

3. CONTRIBUTION REQUIREMENTS

EMPLOYER CONTRIBUTIONS

The ATU, IBEW and Salaried Plans' funding policies provide for actuarially determined periodic contributions. Contribution rates for retirement benefits are determined using the entry age normal cost method. During the fiscal year ended June 30, 2024, the District made contributions to the ATU, IBEW, and Salaried Plan of \$11,437,314, \$5,263,040, and \$12,363,514 respectively.

TIER 1 EMPLOYEES

For the fiscal year ended June 30, 2024, the actuarially determined rate for the ATU Plan was 30.74% of covered payroll, the IBEW Plan was 35.62% of covered payroll, and the Salaried Plan was 42.74% of covered payroll. No contributions are required by the ATU, IBEW and Salaried Plans' members pursuant to each respective bargaining agreement for employees hired before January 1, 2015.

TIER 2 EMPLOYEES

As of January 1, 2015, all newly eligible employees were required to contribute to their pension based upon the terms of the bargaining groups MOU or based on PEPR A.

ATU eligible employees are required to contribute 50% of normal cost which is currently 7.75% of their annual salary. The employer portion of the actuarially determined rate for the ATU members was 22.63% of covered payroll for the fiscal year ending June 30, 2024. The total contribution by Tier 2 employees of the ATU Plan for the fiscal year ended June 30, 2024 was \$1,875,310.

IBEW eligible employees are required to contribute 50% of normal cost which is currently 7.00% of their annual salary. The employer portion of the actuarially determined rate for the IBEW members was 27.34% of covered payroll for the fiscal year ending June 30, 2024. The total contribution by Tier 2 employees of the IBEW Plan for the fiscal year ended June 30, 2024 was \$685,610.

Members of AEA, MCEG, AFSCME-Supervisors, and AFSCME-Technical are required to contribute 50% of normal cost which is currently 6.50% of their annual salary. The employer portion of the actuarially determined rate for the AEA, MCEG, and AFSCME-Supervisors members was 30.43% of covered payroll for the fiscal year ending June 30, 2024. The total contribution by Tier 2 employees of the Salaried Plan for the fiscal year ended June 30, 2024 was \$1,005,691.

The employee contribution rates calculated in compliance with PEPR A, for the fiscal year ended June 30, 2024, were actuarially determined as part of the valuations dated July 1, 2022.

TIER 3 EMPLOYEES

ATU employees hired during the time period January 1, 2015 and December 31, 2015, are required to contribute 3.00% of pay. The employer portion of the actuarially determined rate for the ATU members was 29.61% of covered payroll for the fiscal year ending June 30, 2024. The total contribution by Tier 3 employees of the ATU Plan for the fiscal year ended June 30, 2024 was \$35,977.

RETIREMENT PLANS FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE FISCAL YEAR ENDED JUNE 30, 2024

4. CASH AND INVESTMENTS

CASH AND SHORT-TERM INVESTMENTS

At June 30, 2024, the reported amount of cash and short-term investments of the ATU, IBEW and Salaried Plans was \$20,834,193. The amount was collateralized with securities held by the counterparty's trust department or agent in the District's name on behalf of the Retirement Plans.

INVESTMENTS

An annual Board-adopted policy, the "Statement of Investment Objectives and Policy Guidelines for the Sacramento Regional Transit District Retirement Plans" (Policy), governs the ATU, IBEW and Salaried Plans' investments. The Policy focuses on the continued feasibility of achieving, and the appropriateness of, the Asset Allocation Policy, the Investment Objectives, the Investment Policies and Guidelines, and the Investment Restrictions. The Retirement Boards have the authority to amend the asset allocation targets as well as establish and amend investment policies. The following was the Plans' adopted asset allocation policy as of June 30, 2024:

<u>Asset Class</u>	<u>Target Allocation</u>
Domestic Equity Large Cap	32%
Domestic Equity Small Cap	8%
International Equity Developed Large Cap	14%
International Equity Developed Small Cap	5%
International Equity Emerging Markets	6%
Domestic Fixed Income	25%
Real Estate	10%

For the years ended June 30, 2024, the annual money-weighted rate of return on pension plan investments, net of pension plan investment expenses, was 10.97%. The money-weighted rate of return expresses investment performance, net of investment expense, adjusted for the changing amounts actually invested.

4. CASH AND INVESTMENTS (Continued)

INVESTMENT RISK FACTORS

There are many factors that can affect the value of investments. Such factors as interest rate risk, credit risk, custodial credit risk, concentration of credit risk, and foreign currency risk may affect both equity and fixed income securities.

INTEREST RATE RISK

Interest rate risk is the risk that the value of fixed income securities will decline because of rising interest rates. The prices of fixed income securities with a longer time to maturity, measured by duration, tend to be more sensitive to changes in interest rates and, therefore, more volatile than those with shorter duration.

The following table provides information about the interest rate risks associated with the ATU, IBEW and Salaried Plans' investments at June 30, 2024.

	Maturity in Years				Amount
	Less than 1	1 - 5	6 - 10	More than 10	
Collateralized Mortgage Obligations	\$ -	\$ 183,343	\$ 411,094	\$ 6,925,047	\$ 7,519,484
Corporate Bonds	438,495	8,787,627	4,091,388	3,603,777	16,921,287
Municipal Bonds	-	-	-	418,933	418,933
U.S. Government Agency Obligations	-	1,942	288,320	33,729,320	34,019,582
U.S. Government Issued Obligations	-	22,517,338	6,837,136	9,837,893	39,192,367
Asset-Backed Securities	-	308,764	2,142,451	3,598,998	6,050,213
Total	<u>\$ 438,495</u>	<u>\$ 31,799,014</u>	<u>\$ 13,770,389</u>	<u>\$ 58,113,968</u>	<u>\$ 104,121,866</u>

In accordance with the ATU, IBEW and Salaried Plans' investment policy, investments may include collateralized mortgage obligations, mortgage pass-through securities, asset-backed securities, callable bonds and corporate debts that are considered to be highly sensitive to changes in interest rates.

RETIREMENT PLANS FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE FISCAL YEAR ENDED JUNE 30, 2024

4. CASH AND INVESTMENTS (Continued)

COLLATERALIZED MORTGAGE OBLIGATIONS

Collateralized mortgage obligations (CMOs) are bonds that represent claims to specific cash flow from large pools of home mortgages. The streams of principal and interest payments on the mortgages are distributed to the different classes of CMO interests.

CMOs are often highly sensitive to changes in interest rates and any resulting change in the rate at which homeowners sell their properties, refinance, or otherwise pre-pay their loans. Investors in these securities may not only be subjected to such prepayment risk, but also exposed to significant market and liquidity risks.

MORTGAGE PASS-THROUGH SECURITIES

These securities, disclosed as U.S. Government Agency Obligations in the interest rate risk table above, are issued by Government Sponsored Enterprises (GSEs) which are a group of financial services corporations created by the United States Congress. The GSEs include: the Federal National Mortgage Association (Fannie Mae), the Federal Home Loan Mortgage Corporation (Freddie Mac), and the Federal Home Loan Banks. Another institution that issues these securities is the Government National Mortgage Association (Ginnie Mae). These securities are highly sensitive to interest rate fluctuations because they are subject to early payment. In a period of declining interest rates, the resulting reduction in expected total cash flows affects the value of these securities.

ASSET-BACKED SECURITIES

Asset-backed securities generate a return based upon either the payment of interest or principal on obligations in an underlying pool. The relationship between interest rates and prepayments make the value highly sensitive to changes in interest rates.

CALLABLE BONDS

Although bonds are issued with clearly defined maturities, an issuer may be able to redeem, or call, a bond earlier than its maturity date. The Plans must then replace the called bond with a bond that may have a lower yield than the original bond. The call feature causes the value to be highly sensitive to changes in interest rates. As of June 30, 2024, the ATU, IBEW and Salaried Plans held callable bonds with a value of \$14,902,912.

CREDIT RISK

Fixed income securities are subject to credit risk, which is the risk that a bond issuer or other counterparty to a debt instrument will not fulfill its obligation to pay interest or principal in a timely manner, or that negative perceptions of the issuer's ability to make these payments will cause security prices to decline. The circumstances may arise due to a variety of factors such as financial weakness, bankruptcy, litigation and/or adverse political developments.

RETIREMENT PLANS FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE FISCAL YEAR ENDED JUNE 30, 2024

4. CASH AND INVESTMENTS (Continued)

A bond's credit quality is an assessment of the issuer's ability to pay interest on the bond, and ultimately, to pay the principal. Credit quality is evaluated by one of the independent bond-rating agencies, for example Moody's Investors Services (Moody's). The lower the rating the greater the chance, in the rating agency's opinion, the bond issuer will default, or fail to meet their payment obligations. Generally, the lower a bond's credit rating, the higher its yield should be to compensate for the additional risk.

Certain fixed income securities, including obligations of the U.S. government or those explicitly guaranteed by the U.S. government, are not considered to have credit risk.

For the fiscal year ending June 30, 2024, the ATU, IBEW and Salaried Plans were in adherence with the credit risk provisions of the Statement of Investment Objectives and Policy Guidelines which require a minimum overall portfolio quality rating and a minimum credit rating at the time of purchase.

The following table provides information on the credit ratings and fair value associated with the ATU, IBEW and Salaried Plans' investments as of June 30, 2024.

Investment Rating	Amount	Percentage of Portfolio

RETIREMENT PLANS FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE FISCAL YEAR ENDED JUNE 30, 2024

4. CASH AND INVESTMENTS (Continued)

CONCENTRATION OF CREDIT RISK

Concentration of credit risk is the risk associated with a lack of diversification of having too much invested in a few individual issuers, thereby exposing the organization to greater risks resulting from adverse economic, political, regulatory, geographic, or credit developments.

The investment policies of the ATU, IBEW and Salaried Plans state that an investment in each domestic or international equity fund managers' securities of a single issuer shall not exceed 5% (at cost) of the value of the portfolios and/or of the total outstanding shares. As of June 30, 2024, the Plans held more than 5% of the Plans' fiduciary net position and more than 5% of total investments in the following fixed-income securities investments.

Federal National Mortgage Association \$22,390,869

CUSTODIAL CREDIT RISK

Custodial credit risk for deposits is the risk that, in the event of the failure of a depository financial institution, a government will not be able to recover its deposits or will not be able to recover collateral securities that are in the possession of an outside party.

The custodial credit risk for investments is the risk that, in the event of the failure of the counterparty (e.g., broker-dealer) to a transaction, a government will not be able to recover the value of its investment or collateral securities that are in the possession of another party. The ATU, IBEW and Salaried Plans' investment policy does not contain legal or policy requirements that would limit the exposure to custodial credit risk for deposits or investments. The ATU, IBEW and Salaried Plans' investment securities are not exposed to custodial credit risk because all securities are held by the ATU, IBEW and Salaried Plans' custodian bank in the District's name.

FOREIGN CURRENCY RISK

Foreign currency risk is the risk that changes in exchange rates will adversely affect the fair value of an investment or a deposit. The ATU, IBEW and Salaried Plans' investment policy states international equity securities shall be comprised of American Depositary Receipts (ADR) of non-U.S. companies, common stocks of non-U.S. companies, preferred stocks of non-U.S. companies, foreign convertible securities including debentures convertible to common stocks, and cash equivalents.

RETIREMENT PLANS FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE FISCAL YEAR ENDED JUNE 30, 2024

4. CASH AND INVESTMENTS (Continued)

The following table provides information on deposits and investments held in foreign currencies, which are stated in U.S. dollars. The ATU, IBEW and Salaried Plans do have foreign currency deposits and investments which may be used for hedging purposes.

As of June 30, 2024, the U.S. dollar balances organized by investment type and currency denomination for the ATU, IBEW and Salaried Plans are as follows:

	Foreign Currency	U.S. Dollars
Cash	Euro Currency	\$ 4,991
Corporate Bonds	Euro Currency	618,803
Government Agencies	Euro Currency	114,671
Total		<u>\$ 738,465</u>

FAIR VALUE MEASUREMENTS

The ATU, IBEW and Salaried Plans categorize their fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The hierarchy is based on the valuation inputs used to measure the fair value of the asset. Level 1 inputs are quoted market prices in active markets for identical assets; Level 2 inputs are significant other observable inputs; Level 3 inputs are significant unobservable inputs. The ATU, IBEW and Salaried Plans had the following recurring fair value measurements as of June 30, 2024:

	6/30/2024	Fair Value Measurements Using		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Debt Securities				
Collateralized mortgage obligations	\$ 7,519,484	\$ -	\$ 7,519,484	\$ -
Corporate bonds	16,921,287	-	16,921,287	-
Municipal bonds	418,933	-	418,933	-
U.S. Government Agency obligations	34,019,582	-	34,019,582	-
U.S. Government issued obligations	39,192,367	-	39,192,367	-
Asset backed obligations	6,050,213	-	6,050,213	-
Equity Securities				
Common stock	101,746,086	101,746,086	-	-
Depository receipts	244,197	244,197	-	-
Total investments by fair value level	206,112,149	<u>\$ 101,990,283</u>	<u>\$ 104,121,866</u>	<u>\$ -</u>

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE FISCAL YEAR ENDED JUNE 30, 2024

4. CASH AND INVESTMENTS (Continued)

Debt and equity securities classified in Level 1 of the fair value hierarchy are valued using prices quoted in active markets for those securities. Debt securities classified in Level 2 of the fair value hierarchy are valued using a matrix pricing technique. Matrix pricing is used to value securities based on the securities' relationship to benchmark quoted prices. Net asset value (NAV) securities are valued based on the net asset value of the pooled investments. The NAV per unit is determined by dividing the total value of the securities and other assets, less any liabilities, by the total outstanding units of the fund.

Investment measured at the net asset value (NAV)

	June 30, 2024	Unfunded Commitments	Redemptions Frequency	Redemptions Notice Period
S&P 500 index fund ¹	\$ 74,536,312	\$ -	Daily	1 day
MSCI EAFE index fund ²	19,950,338	-	Semi-monthly	6-8 days
International large capital equity fund ³	38,634,913	-	Monthly	7 days
International small capital equity fund ⁴	23,222,410	-	Monthly	2 days
International emerging markets fund ⁵	25,563,612	-	Daily	1 day
Real estate funds ⁶	31,959,740	-	Daily, Quarterly	90 days, 1 quarter
Total investments measured at the NAV	<u>\$ 213,867,325</u>	<u>\$ -</u>		

1. S&P 500 index fund. This type includes an investment in a S&P 500 index fund that invests to match the S&P 500® Index. The S&P 500 is made up of primarily U.S. common stocks. The fair value of the investment in this type has been determined using the NAV per unit of the investment. The NAV per unit of the investment are determined each business day. Issuances and redemptions of fund units may be made on such days, based upon the closing market value on the valuation date of the investments bought or sold and the NAV per unit of the fund.
2. MSCI EAFE index fund. This type includes an investment in the Morgan Stanley Capital International Europe, Australasia, Far East Index (MSCI EAFE) Index fund that invest to approximate as closely as practicable, before expenses, the performance of the MSCI EAFE Index over the long term. The MSCI EAFE Index is made up of primarily international stocks. The per unit NAV of the fund is determined as of the last business day of each month and at least one other business day during the month. Issuances and redemptions of fund units may be made on such days, based upon the closing market value on the valuation date of the investments bought or sold and the NAV per unit of the fund.
3. International large capital equity fund. This type includes an investment in an International Equity Fund that seeks total return from long-term capital growth and income, while attempting to outperform the MSCI EAFE Index over a market cycle, gross of fees. The fair value of the investment in this type has been determined using the NAV per unit of the investment. The Trust has one dealing day per month, which is the first business day, and units are issued based upon a valuation on the last business day of the preceding month.
4. International small capital equity fund. The fund intends to utilize a set of valuation, momentum and economic factors to generate an investment portfolio based on security selection procedures geared to assist the fund in meeting its investment objectives. The fund generally will be managed by underweighting and overweighting securities relative to the benchmark. The investment objective is to outperform the MSCI EAFE Small Cap Index over a full market cycle. The fair value of the investment in this type has been determined using the NAV per unit of the investment. The fund has one dealing day per month, which is the first business day, and notification is required at least two business days in advance of a subscription or withdrawal.

RETIREMENT PLANS FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE FISCAL YEAR ENDED JUNE 30, 2024

4. CASH AND INVESTMENTS (Continued)

5. International emerging markets fund. This type invests substantially all of its assets in the Emerging Market Series. The Emerging Market Series purchases a broad market coverage of larger companies associated with emerging markets, which may include frontier markets (emerging market countries in an earlier stage of development), authorized for investment by the Advisor's Investment Committee. As a non-fundamental policy, under normal circumstances, the Emerging Markets Series will invest at least 80% of its net assets in emerging markets investments that are defined in the Prospectus as Approved Market securities. The fair values of the investments in this type have been determined using the NAV per unit of the investments. Investors may purchase or redeem units of the fund on any business day.
6. Real estate funds. Real estate investments are held in Clarion Lion Properties Fund, LP and Prime Property Fund, LLC. The funds are core-style, open-end commingled real estate investment funds diversified by property type and location. The primary performance objective is to combine an attractive income yield with long-term capital growth. The fair value of the investments have been determined using the NAV per share of the respective fund. The ability to redeem funds is subject to the availability of liquid assets. To the extent that liquid assets of the funds are insufficient to satisfy redemption requests, redemptions will be redeemed on a pro rata basis as liquid assets become available. Prime Property Fund, LLC had a redemption queue of \$4.6 billion at June 30, 2024. Prime Property Fund, LLC is unable to provide an estimate on when the restriction on redemptions will be removed. The current redemption queue has been in effect since June 30, 2022. Clarion Lion Properties Fund, LP had a redemption queue of \$3.8 billion at June 30, 2024. Clarion Lion Properties Fund, LP is unable to provide an estimate on when the restriction on redemptions will be removed. The current redemption queue has been in effect since September 30, 2022.

5. NET PENSION LIABILITY

ATU Plan

The components of the net pension liability of the ATU Plan at June 30, 2024, were as follows:

Total pension liability	\$ 230,964,776
Plan fiduciary net position	(182,439,142)
ATU net pension liability	<u>\$ 48,525,634</u>
Plan fiduciary net position as a percentage of the total pension liability	78.99%

The total pension liability was determined by an actuarial valuation as of July 1, 2023, using the following actuarial assumptions, applied to all periods included in the measurement, and using update procedures to roll forward the total pension liability to the pension plan's fiscal year-end:

Inflation	2.50%
Salary increases	2.75%, plus merit component
Investment Rate of Return	6.75%, net of investment expense
Post-retirement mortality	Cheiron ATU Healthy Annuitant mortality, adjusted by 95% for males and 105% for females, with generational improvements using Scale MP-2020 from 2016

The actuarial assumptions used in the July 1, 2023 valuation were based on the results of an actuarial experience study for the period July 1, 2015 through June 30, 2020.

RETIREMENT PLANS FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE FISCAL YEAR ENDED JUNE 30, 2024

5. NET PENSION LIABILITY (Continued)

The discount rate used to measure the Total Pension Liability was 6.75%. The projection of cash flows used to determine the discount rate assumed that the District will continue to contribute to the ATU Plan based on an actuarially determined contribution, reflecting a payment equal to annual service cost (net of any employee contributions), the expected administrative expenses, and an amount necessary to amortize the Unfunded Actuarial Liability (UAL) determined at July 1, 2019 as a level percentage of payroll over a closed period (9 years remaining as of the July 1, 2023 actuarial valuation) and a 20-year layered amortization schedule for UAL changes after 2019. The UAL is based on an Actuarial Valuation of Assets that recognizes differences between actual and expected investment returns on the Market Value of Assets over a five-year period.

Based on those assumptions, the ATU Plan's fiduciary net position was projected to be available to make all projected future benefit payments of the current ATU Plan members. Therefore, the long-term expected rate of return on the ATU Plan's investments was applied to all periods of projected benefit payments to determine the Total Pension Liability.

The following presents the net pension liability of the ATU Plan, calculated using the discount rate of 6.75 percent, as well as what the ATU Plan's net pension liability would be if it were calculated using a discount rate that is 1-percentage-point lower (5.75%) or 1-percentage-point higher (7.75%) than the current rate:

	1% Decrease 5.75%	Discount Rate 6.75%	1% Increase 7.75%
Total pension liability	\$ 254,916,284	\$ 230,964,776	\$ 210,534,705
Plan fiduciary net position	(182,439,142)	(182,439,142)	(182,439,142)
Net pension liability	<u>\$ 72,477,142</u>	<u>\$ 48,525,634</u>	<u>\$ 28,095,563</u>
Plan fiduciary net position as a percentage of the total pension liability	71.57%	78.99%	86.66%

IBEW Plan

The components of the net pension liability of the IBEW Plan at June 30, 2024, were as follows:

Total pension liability	\$ 105,150,736
Plan fiduciary net position	(82,588,719)
IBEW net pension liability	<u>\$ 22,562,017</u>
Plan fiduciary net position as a percentage of the total pension liability	78.54%

The total pension liability was determined by an actuarial valuation as of July 1, 2023, using the following actuarial assumptions, applied to all periods included in the measurement, and using update procedures to roll forward the total pension liability to the pension plan's fiscal year-end:

Inflation	2.50%
Salary increases	2.75%, plus merit component
Investment Rate of Return	6.75%, net of investment expense
Post-retirement mortality	Cheiron ATU Healthy Annuitant mortality, adjusted by 95% for males and 105% for females, with generational improvements using Scale MP-2020 from 2016

RETIREMENT PLANS FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE FISCAL YEAR ENDED JUNE 30, 2024

5. NET PENSION LIABILITY (Continued)

The actuarial assumptions used in the July 1, 2023 valuation were based on the results of an actuarial experience study for the period July 1, 2015 through June 30, 2020.

The discount rate used to measure the Total Pension Liability was 6.75%. The projection of cash flows used to determine the discount rate assumed that the District will continue to contribute to the IBEW Plan based on an actuarially determined contribution, reflecting a payment equal to annual service cost (net of any employee contributions), the expected administrative expenses, and an amount necessary to amortize the Unfunded Actuarial Liability (UAL) determined at July 1, 2019 as a level percentage of payroll over a closed period (9 years remaining as of the July 1, 2023 actuarial valuation) and a 20-year layered amortization schedule for UAL changes after 2019. The UAL is based on an Actuarial Value of Assets that recognizes differences between actual and expected investment returns on the Market Value of Assets over a five-year period.

Based on those assumptions, the IBEW Plan's fiduciary net position was projected to be available to make all projected future benefit payments of the current IBEW Plan members. Therefore, the long-term expected rate of return on the IBEW Plan's investments was applied to all periods of projected benefit payments to determine the Total Pension Liability.

The following presents the net pension liability of the IBEW Plan, calculated using the discount rate of 6.75 percent, as well as what the IBEW Plan's net pension liability would be if it were calculated using a discount rate that is 1-percentage-point lower (5.75%) or 1-percentage-point higher (7.75%) than the current rate:

	1% Decrease 5.75%	Discount Rate 6.75%	1% Increase 7.75%
Total pension liability	\$ 116,473,207	\$ 105,150,736	\$ 95,518,944
Plan fiduciary net position	(82,588,719)	(82,588,719)	(82,588,719)
Net pension liability	<u>\$ 33,884,488</u>	<u>\$ 22,562,017</u>	<u>\$ 12,930,225</u>
Plan fiduciary net position as a percentage of the total pension liability	70.91%	78.54%	86.46%

Salaried Plan

The components of the net pension liability of the Salaried Plan at June 30, 2024, were as follows:

Total pension liability	\$ 198,389,361
Plan fiduciary net position	(147,310,778)
Salaried net pension liability	<u>\$ 51,078,583</u>
Plan fiduciary net position as a percentage of the total pension liability	74.25%

RETIREMENT PLANS FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE FISCAL YEAR ENDED JUNE 30, 2024

5. NET PENSION LIABILITY (Continued)

The total pension liability was determined by an actuarial valuation as of July 1, 2023, using the following actuarial assumptions, applied to all periods included in the measurement, and using update procedures to roll forward the total pension liability to the pension plan's fiscal year-end:

Inflation	2.50%
Salary increases	2.75%, plus merit component
Investment Rate of Return	6.75%, net of investment expense
Post-retirement mortality	Private Retirement (Pri) 2012 Bottom Quartile Tables for Healthy Annuitants Mortality Tables projected with Scale MP-2020 published by the Society of Actuaries, with the base tables adjusted 105% for females.

The actuarial assumptions used in the July 1, 2023 valuation were based on the results of an actuarial experience study for the period July 1, 2015 through June 30, 2020.

The discount rate used to measure the Total Pension Liability was 6.75%. The projection of cash flows used to determine the discount rate assumed that the District will continue to contribute to the Salaried Plan based on an actuarially determined contribution, reflecting a payment equal to annual service cost (net of any employee contributions), the expected administrative expenses, and an amount necessary to amortize the Unfunded Actuarial Liability (UAL) determined at July 1, 2019 as a level percentage of payroll over a closed period (9 years remaining as of the July 1, 2023 actuarial valuation) and a 20-year layered amortization schedule for UAL changes after 2019. The UAL is based on an Actuarial Value of Assets that recognizes differences between actual and expected investment returns on the Market Value of Assets over a five-year period.

Based on those assumptions, the Salaried Plan's fiduciary net position was projected to be available to make all projected future benefit payments of the current Salaried Plan members. Therefore, the long-term expected rate of return on Salaried Plan investments was applied to all periods of projected benefit payments to determine the Total Pension Liability.

The following presents the net pension liability of the Salaried Plan, calculated using the discount rate of 6.75 percent, as well as what the Salaried Plan's net pension liability would be if it were calculated using a discount rate that is 1-percentage-point lower (5.75%) or 1-percentage-point higher (7.75%) than the current rate:

	1% Decrease 5.75%	Discount Rate 6.75%	1% Increase 7.75%
Total pension liability	\$ 220,276,665	\$ 198,389,361	\$ 179,790,935
Plan fiduciary net position	(147,310,778)	(147,310,778)	(147,310,778)
Net pension liability	\$ 72,965,887	\$ 51,078,583	\$ 32,480,157
Plan fiduciary net position as a percentage of the total pension liability	66.88%	74.25%	81.93%

RETIREMENT PLANS FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE FISCAL YEAR ENDED JUNE 30, 2024

5. NET PENSION LIABILITY (Continued)

Actuarial valuations of an ongoing plan involve estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Actuarially determined amounts are subject to continual revision as actual results are compared to past expectations and new estimates are made about the future. Actuarial calculations reflect a long-term perspective and are based on the benefits provided under the terms of the substantive plan in effect at the time of each valuation. Actuarial methods and assumptions used include techniques designed to reduce short-term volatility in actuarial accrued liabilities and the actuarial value of plan assets.

The projection of benefits for financial reporting purposes does not explicitly incorporate the potential effect of legal or contractual funding limitations.

ATU, IBEW and Salaried Plan

The ATU, IBEW, and Salaried Plans' investments are invested as one commingled fund for economies of scale. The long-term expected rate of return on pension plans' investments were determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of arithmetic real rates of return for each major asset class included in the pension plans' target asset allocation as of June 30, 2024, are summarized in the following table:

Asset Class	Long-Term Expected Real Rate of Return
Domestic Equity Large Cap	8.70%
Domestic Equity Small Cap	9.80%
International Equity Developed	9.25%
International Equity Emerging	10.65%
Domestic Fixed Income	5.25%
Real Estate	6.85%

Plan fiduciary net position as a percentage of the total pension liability	72.82%	75.41%	74.88%	75.33%
Covered payroll	\$ 34,174,428	\$ 30,125,788	\$ 31,575,118	\$ 30,212,311
Net pension liability as a percentage of covered payroll	150.10%	149.39%	141.50%	141.58%

Notes to Schedule: Payroll amounts are based on actual pensionable compensation from the employer

-FY2017: Changes in benefit terms are due to changes to the basis used for calculating actuarial equivalence for the Pre-Retirement Death Benefit. The ATU and IBEW Plans were separated; previous years not available.

-FY2018: amounts are reported as changes of assumptions resulted from lowering the discount rate from 7.50% to 7.25% and inflation rate from 3.15% to 3.00%.

-FY2019: amounts are reported as changes of assumptions resulted from a normal cost load of 2.62% for PEPRA members to account for missed pay periods.

This is a 10 year schedule; however, the information in this schedule is not required to be presented retroactively. Years will be added to this schedule in future fiscal years until 10 years of information is available.

Net pension liability as a percentage of covered payroll	235.70%	210.06%	187.22%	187.96%	181.63%

Notes to Schedule:

-FY2015: amounts reported as changes of assumptions resulted from lowering the discount rate from 7.75% to 7.65%.

-FY2016: amounts reported as changes of assumptions resulted from lowering the discount rate from 7.65% to 7.50% and updated demographic and economic assumptions that were adopted following an experience study.

-FY2017: Changes in benefit terms are due to changes to the basis used for calculating actuarial equivalence for the Pre-Retirement Death Benefit.

-FY2018: amounts reported as changes of assumptions resulted from lowering the discount rate from 7.50% to 7.25% and inflation rate from 3.15% to 3.00%.

-FY2019: amounts reported as changes of assumptions resulted from a normal cost load of 0.57% for PEPRA members to account for missed pay periods.

-Payroll amounts are based on actual pensionable compensation from the employer.

RETIREMENT PLANS FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES

SCHEDULE OF DISTRICT CONTRIBUTIONS
EMPLOYEES WHO ARE MEMBERS OF
ATU LOCAL 256
FOR THE FISCAL YEARS ENDING JUNE 30, 2024, 2023, 2022, 2021, 2020, 2019, 2018 AND 2017
(Dollar amounts in thousands)

	2024	2023	2022	2021	2020	2019	2018	2017
Actuarially determined contribution	\$ 11,437	\$ 10,500	\$ 10,418	\$ 9,579	\$ 8,783	\$ 8,533	\$ 7,863	\$ 7,987
Contributions in relation to the actuarially determined contribution	11,437	10,500	10,418	9,579	8,783	8,533	7,863	7,987
Contribution deficiency (excess)	\$ -	\$ -	\$ -	\$ -	\$ -	\$ -	\$ -	\$ -
Covered payroll	\$ 43,424	\$ 39,651	\$ 38,050	\$ 35,335	\$ 34,174	\$ 30,126	\$ 31,575	\$ 30,212
Contributions as a percentage of covered payroll	26.34%	26.48%	27.38%	27.11%	25.70%	28.33%	24.90%	26.44%

Notes to Schedule

Valuation Date 7/1/2022 (to determine FY23-24 contribution)
Timing Actuarially determined contribution rates are calculated based on the actuarial valuation one year prior to the beginning of the plan year.

Key methods and assumptions used to determine contribution rates:

Actuarial cost method Entry Age
Amortization method The unfunded liability as of 6/30/2019 is being amortized as a level percentage of payroll over a 10-year closed period as of 6/30/2022. Effective 7/1/2020, changes in the unfunded liability are amortized over 20-year layers.
Asset valuation method 5-year smoothed fair value
Discount Rate 6.75%
Amortization growth rate 2.75%
Price inflation 2.50%
Salary Increases 2.75%, plus merit component on employee classification and years of service
Mortality Healthy annuitants: Cheiron ATU Healthy Annuitant Mortality base tables adjusted 95% for males and 105% for females w/ Scale MP-2020 from 2016. Disabled annuitants: Cheiron ATU Disabled Annuitant Mortality w/ Scale MP-2020 from 2016.

Other information:

A complete description of the methods and assumptions used to determine contribution rates for the year ending June 30, 2024, can be found in the July 1, 2022 actuarial valuation report. The financial reporting for the ATU and IBEW Plans' was split during FY2017, previous years information is not available.

INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND
ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS
PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

Members of the Retirement Board of Directors
Sacramento Regional Transit District
Sacramento, California

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the ATU Plan, IBEW Plan and Salaried Plan for Sacramento Regional Transit District Employees (the Plans) as of and for the year ended June 30, 2024, and the related notes to the financial statements, which collectively comprise the Plans' basic financial statements, and have issued our report thereon dated December 2, 2024.

Report on Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered the Plans' internal control over financial reporting (internal control) as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Plans' internal control. Accordingly, we do not express an opinion on the effectiveness of the Plans' internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses or significant deficiencies may exist that have not been identified.

Report on Compliance and Other Matters

As part of obtaining reasonable assurance about whether the Plans' financial statements are free from material misstatement, we performed tests of their compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the financial statements. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

(Continued)

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

A handwritten signature in black ink that reads "Crowe LLP". The signature is written in a cursive, flowing style.

Crowe LLP

Members of the Retirement Board of Directors
Sacramento Regional Transit District
Sacramento, California

Professional standards require that we communicate certain matters to keep you adequately informed about matters related to the financial statement audit that are, in our professional judgment, significant and relevant to your responsibilities in overseeing the financial reporting process. We communicate such matters in this report.

AUDITOR'S RESPONSIBILITY UNDER AUDITING STANDARDS GENERALLY ACCEPTED IN THE UNITED STATES OF AMERICA

Our responsibility is to form and express an opinion about whether the financial statements that have been prepared by management with your oversight are presented fairly, in all material respects, in conformity with accounting principles generally accepted in the United States of America. The audit of the financial statements does not relieve you of your responsibilities and does not relieve management of their responsibilities. Refer to our engagement letter with the ATU Plan, IBEW Plan and Salaried Plan for Sacramento Regional Transit District Employees ("the Plans") for further information on the responsibilities of management and of Crowe LLP.

AUDITOR'S RESPONSIBILITY UNDER GOVERNMENT AUDITING STANDARDS

As part of obtaining reasonable assurance about whether the Plans' financial statements are free of material misstatement, we performed tests of the Plans' compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts or disclosures. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion.

The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

COMMUNICATIONS REGARDING OUR INDEPENDENCE FROM THE PLANS

Auditing standards generally accepted in the United States of America require independence for all audits, and we confirm that we are independent auditors with respect to the Plans under the independence requirements established by the American Institute of Certified Public Accountants.

Additionally, we wish to communicate that we have no relationships with the Plans that, in our professional judgment, may reasonably be thought to bear on our independence and that we gave significant consideration to in reaching the conclusion that our independence has not been impaired.

PLANNED SCOPE AND TIMING OF THE AUDIT

We are to communicate an overview of the planned scope and timing of the audit. Accordingly, the following matters regarding the planned scope and timing of the audit were discussed with you.

- How we proposed to address the significant risks of material misstatement, whether due to fraud or error.
- Our approach to internal control relevant to the audit.
- The concept of materiality in planning and executing the audit, focusing on the factors considered rather than on specific thresholds or amounts.
- The nature and extent of specialized skills or knowledge needed to plan and evaluate the results of the audit, including the use of an auditor's expert.
- Where the entity has an internal audit function, the extent to which the auditor will use the work of internal audit, and how the external and internal auditors can best work together.
- Your views and knowledge of matters you consider warrant our attention during the audit, as well as your views on:
 - The allocation of responsibilities between you and management.
 - The entity's objectives and strategies, and the related business risks that may result in material misstatements.
 - Significant communications between the entity and regulators.
 - Other matters you believe are relevant to the audit of the financial statements.

SIGNIFICANT ACCOUNTING POLICIES AND MANAGEMENT JUDGMENTS AND ACCOUNTING ESTIMATES

Significant Accounting Policies: Those Charged with Governance should be informed of the initial selection of and changes in significant accounting policies or their application. Also, Those Charged with Governance should be aware of methods used to account for significant unusual transactions and the effect of significant accounting policies in controversial or emerging areas where there is a lack of authoritative consensus. We believe management has the primary responsibility to inform Those Charged with Governance about such matters. There were no such accounting changes or significant policies requiring communication.

Management Judgments and Accounting Estimates: Further, accounting estimates are an integral part of the financial statements prepared by management and are based upon management's current judgments. These judgments are based upon knowledge and experience about past and current events and assumptions about future events. Certain estimates are particularly sensitive because of their significance and because of the possibility that future events affecting them may differ markedly from management's current judgments and may be subject to significant change in the near term.

The following describes the significant accounting estimates reflected in the Plans' year-end financial statements, the process used by management in formulating these particularly sensitive accounting estimates and the primary basis for our conclusions regarding the reasonableness of those estimates.

Significant Accounting Estimate	Process Used by Management	Basis for Our Conclusions
Classification of Investment Securities Within the Fair Value Hierarchy	GASB Statement No. 72, Fair Value Measurements and Application requires the reporting of investments by classification level within a fair value hierarchy.	We reviewed the documentation maintained by management and performed procedures to test the reasonableness of management's judgments and accounting estimates related to the classification levels of investments within the fair value hierarchy as defined by GASB 72.

Significant Accounting Estimate	Process Used by Management	Basis for Our Conclusions
Fair Values of Investment Securities and Other Financial Instruments	The disclosure of fair values of securities and other financial instruments requires management to use certain assumptions and estimates pertaining to the fair values of its financial assets and financial liabilities.	We tested the propriety of information underlying management's estimates.
Actuarial Present Value of Accumulated Plan Benefits	The actuarial present value of accumulated plan benefits is determined by the Plans' actuary and is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for disability, withdrawal or retirement) between the valuation date and the expected date of payment.	We reviewed the reasonableness of the actuarial assumptions.

AUDITOR'S JUDGMENTS ABOUT QUALITATIVE ASPECTS OF SIGNIFICANT ACCOUNTING PRACTICES

We are to discuss with you our comments about the following matters related to the Plans' accounting policies and financial statement disclosures. Accordingly, these matters will be discussed during our meeting with you.

- The appropriateness of the accounting policies to the particular circumstances of the entity, considering the need to balance the cost of providing information with the likely benefit to users of the entity's financial statements.
- The overall neutrality, consistency, and clarity of the disclosures in the financial statements.
- The effect of the timing of transactions in relation to the period in which they are recorded.
- The potential effect on the financial statements of significant risks and exposures, and uncertainties that are disclosed in the financial statements.
- The extent to which the financial statements are affected by unusual transactions including nonrecurring amounts recognized during the period, and the extent to which such transactions are separately disclosed in the financial statements.
- The issues involved, and related judgments made, in formulating particularly sensitive financial statement disclosures.
- The factors affecting asset and liability carrying values, including the entity's basis for determining useful lives assigned to tangible and intangible assets.
- The selective correction of misstatements, for example, correcting misstatements with the effect of increasing reported earnings, but not those that have the effect of decreasing reported earnings.

CORRECTED AND UNCORRECTED MISSTATEMENTS

Corrected Misstatements: We are to inform you of material corrected misstatements that were brought to the attention of management as a result of our audit procedures.

There were no such misstatements.

Uncorrected Misstatements: We are to inform you of uncorrected misstatements that were aggregated by us during the current engagement and pertaining to the latest and prior period(s) presented that were determined by management to be immaterial, both individually and in the aggregate, to the financial statements taken as a whole. Uncorrected misstatements or matters underlying the uncorrected misstatements could potentially cause future-period financial statements to be materially misstated, even if it was concluded that the uncorrected misstatements are immaterial to the financial statements under audit. For your consideration, we have distinguished misstatements between known misstatements and likely misstatements.

There were no such misstatements.

OTHER COMMUNICATIONS

Communication Item	Results
Other Information Included in an Annual Report Information may be prepared by management that accompanies or includes the financial statements. To assist your consideration of this information, you should know that we are required by audit standards to read such information and consider whether a material inconsistency exists between the other information and the financial statements. We are also to remain alert for indications that: <ul style="list-style-type: none">• Material inconsistency exists between the other information and the auditor's knowledge obtained in the audit; or• A material misstatement of fact exists, or the other information is otherwise misleading. If we identify a material inconsistency between the other information and the financial statements, we are to seek a resolution of the matter.	We understand that management has not prepared other information to accompany the audited financial statements.
Significant Difficulties Encountered During the Audit We are to inform you of any significant difficulties encountered in dealing with management related to the performance of the audit.	There were no significant difficulties encountered in dealing with management related to the performance of the audit.
Disagreements with Management We are to discuss with you any disagreements with management, whether or not satisfactorily resolved, about matters that individually or in the aggregate could be significant to the Plans' financial statements or the auditor's report.	During our audit, there were no such disagreements with management.
Difficulties or Contentious Matters We are required to discuss with the Those Charged with Governance any difficulties or contentious matters for which we consulted outside of the engagement team.	During the audit, there were no such issues for which we consulted outside the engagement team.

Communication Item	Results
Circumstances that Affect the Form and Content of the Auditor's Report We are to discuss with you any circumstances that affect the form and content of the auditor's report, if any.	There are no such circumstances that affect the form and content of the auditor's report.
Consultations with Other Accountants If management consulted with other accountants about auditing and accounting matters, we are to inform you of such consultation, if we are aware of it, and provide our views on the significant matters that were the subject of such consultation.	We are not aware of any instances where management consulted with other accountants about auditing or accounting matters since no other accountants contacted us, which they are required to do by Statement on Auditing Standards No. 50, before they provide written or oral advice.
Representations the Auditor Is Requesting from Management We are to provide you with a copy of management's requested written representations to us.	We direct your attention to a copy of the letter of management's representation to us provided separately.
Significant Issues Discussed, or Subject to Correspondence, With Management We are to communicate to you any significant issues that were discussed or were the subject of correspondence with management.	There were no such significant issues discussed, or subject to correspondence, with management.
Significant Related Party Findings or Issues We are to communicate to you significant findings or issues arising during the audit in connection with the Plans' related parties.	There were no such findings or issues that are, in our judgment, significant and relevant to you regarding your oversight of the financial reporting process.
Other Findings or Issues We Find Relevant or Significant We are to communicate to you other findings or issues, if any, arising during the audit that are, in our professional judgment, significant and relevant to you regarding your oversight of the financial reporting process.	There were no such other findings or issues that are, in our judgment, significant and relevant to you regarding your oversight of the financial reporting process.

We are pleased to serve your Plans as its independent auditors and look forward to our continued relationship. We provide the above information to assist you in performing your oversight responsibilities and would be pleased to discuss this letter or any matters further, should you desire. This letter is intended solely for the information and use of the Members of the Retirement Board of Directors and, if appropriate, management, and is not intended to be and should not be used by anyone other than these specified parties.

Crowe LLP

Sacramento, California
December 2, 2024

Crowe LLP
Independent Member Crowe Global

Members of the Retirement Board of Directors
Sacramento Regional Transit District
Sacramento, California

In planning and performing our audit of the financial statements of ATU Plan, IBEW Plan and Salaried Plan for Sacramento Regional Transit District Employees ("the Plans") as of and for the year ended June 30, 2024, in accordance with auditing standards generally accepted in the United States of America and *Government Auditing Standards*, we considered the Plan's internal control over financial reporting ("internal control") as a basis for designing our auditing procedures for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Plans' internal control. Accordingly, we do not express an opinion on the effectiveness of the Plans' internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A material weakness is a deficiency, or combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis.

Our consideration of internal control was for the limited purpose described in the first paragraph and was not designed to identify all deficiencies in internal control that might be significant deficiencies or material weaknesses and therefore, there can be no assurance that all deficiencies, significant deficiencies, or material weaknesses have been identified. We did not identify any deficiencies in internal control that we consider to be material weaknesses, as defined above.

The purpose of this letter is solely to describe the scope of our testing of internal control over financial reporting, and the results of that testing, and not to provide an opinion on the effectiveness of the Plans' internal control over financial reporting. This letter is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Plan's internal control over financial reporting. Accordingly, this letter is not suitable for any other purpose.

RETIREMENT BOARD STAFF REPORT

DATE: March 19, 2025
TO: Sacramento Regional Transit Retirement Boards - All
FROM: John Gobel - Senior Manager, Pension and Retirement Services
SUBJ: UPDATE ON ROLES AND RESPONSIBILITIES RELATED TO
PENSION ADMINISTRATION - QUARTER ENDED
DECEMBER 31, 2024

RECOMMENDATION

No Recommendation - For Information Only.

RESULT OF RECOMMENDED ACTION

No recommended action.

FISCAL IMPACT

There is no fiscal impact associated with this action.

DISCUSSION

Every quarter, three reports are distributed to apprise the Retirement Boards of functions performed by Staff and Legal Counsel in support of the pension plans. The reports prepared for the quarter ended December 31, 2024 are attached for review and identified below:

- Attachment A – Pension Administration Staff Roles and Responsibilities
- Attachment B – RT Staff Costs Attributable and Charged to RT Pension Plans
- Attachment C – Summary of Legal Services Provided for the Quarter

For the quarter ended December 31st (which considers new retirements effected between the October 10th and December 24th pay dates), staff processed pensions for 8 new retirees and the average wait time was 49 days for initial payment. That activity represents a decrease from the prior quarter, when staff processed a total of 15 new retirements and the average wait time was 42 days. In comparison to the same period from 2023 (when staff processed a total of 6 new retirements and the average wait time was 54 days), the December 31st data appears typical for the fourth quarter of the calendar year.

Retirement Board Agenda Item 13
March 19, 2025
Page 2

For the current quarter ending March 31st (which is still in progress and presently considers new pension payments effected between the January 10th and February 25th pay dates), staff has processed pensions for 8 new retirees with an average waiting period of 58 days.

Pension Administration Staff Roles and Responsibilities

Pension Plan Member Relations:

Task	Primary Responsibility	Back Up Responsibility
Respond to Employee and Retiree Inquiries	Retirement Services Analyst (I & II), Administrative Assistant II	Manager - Pension & Retirement
Conduct Educational Sessions	Manager - Pension & Retirement	Retirement Services Analyst II

**HANSON BRIDGETT LLP &
SACRAMENTO REGIONAL TRANSIT DISTRICT RETIREMENT BOARDS**

LEGAL SERVICES SUMMARY

Set forth below is a broad summary report of significant legal matters addressed by Hanson Bridgett LLP for the Sacramento Regional Transit District (SacRT) Retirement Boards during the Quarter ended December 31, 2024.

1. Weekly client conference calls and as-needed client and internal conferences on pending matters, upcoming Board meetings and follow-up from prior Board meetings.
2. Prepare for and participate in quarterly and special Board Meetings and trainings, including review and markup of agenda materials.
3. Provide counsel on issues including, but not limited to:
 - a. Bridging service for a rehired member;
 - b. Analysis regarding spousal consent revocation;
 - c. Cheiron cost proposal for actuarial services contract extension;
 - d. Operations audit;
 - e. Amendment to custodian services agreement; and
 - f. AB 1234 ethics training.

Respectfully Submitted,

/s/ Shayna M. van Hoften

RETIREMENT BOARD STAFF REPORT

DATE: March 19, 2025

DISCUSSION

Retirement funds are invested consistent with the Statement of Investment Objectives and Policy Guidelines (Policy) adopted by each Retirement Board (Board). Under the Policy, the Boards meet periodically with each investment manager to review the performance of the manager's investment, the manager's adherence to the Policy, and any material changes to the manager's organization. The Policy also establishes the Retirement Funds' asset allocation policy and the asset classes in which the Plans funds are invested. The asset classes established by the Policy are (1) Domestic Large Capitalization Equity, (2) Domestic Small Capitalization Equity, (3) International Large Capitalization Equity, (4) International Small Capitalization Equity, (5) International Emerging Markets, (6) Domestic Fixed-Income, and (7) Real Estate.

Clarion Partners is one of the two private real estate managers for the plans and was funded the first quarter of 2021. The Fund's general investment strategy is to manage a diversified portfolio of primarily institutional quality commercial real estate assets and related investments in the United States. The investment philosophy seeks to take advantage of changing conditions within the U.S. property and capital markets by periodically shifting allocations among property types (including industrial, retail,

multi-family, and office) and locations, while remaining focused on the management of a core equity real estate portfolio. Performance for the fund is shown below.

Clarion Lion Properties Fund
Performance as of December 31, 2024

	Last Quarter	Last Year	Last 3 Years	Last 5 Years	Last 10 Years
Clarion Lion Properties Fund (before fees)	1.91%	(2.26)%	(3.27)%	2.69%	6.33%
Clarion Lion Properties Fund (after fees)	1.72%	(3.00)%	(4.00)%	1.91%	5.49%
NCREIF NFI-ODCE Value Weight (gross)	1.16%	(1.43)%	(2.32)%	2.87%	5.89%

Source: Clarion Partners

Clarion Partners will be reviewing the fund, shown in Attachment 1, and answering any questions.

CLARION PARTNERS

A Franklin Templeton Company

Clarion Lion Properties Fund

Sacramento Regional Transit District | 19 March 2025

Presenter Biographies

Janet (Souk) Lee

Managing Director, Assistant Portfolio Manager

Janet (Souk) Lee is an equity owner and Managing Director with Clarion Partners. She serves as Assistant Portfolio Manager for the Clarion Lion Properties Fund. Janet shares responsibility for all facets of Fund management including acquisitions and dispositions, asset management and investor communications. She joined Clarion Partners originally in 2005 when she began working in the real estate industry, and then rejoined in 2019. Since 2019 she has been a portfolio manager for various Clarion funds and accounts.

Reza Basharзад

Managing Director, Senior Account Executive

Reza Basharзад, equity owner and Managing Director, is a Senior Account Executive within the Client Capital Management group. Reza manages relationships with U.S. institutional investors, primarily on the west coast, and works with them in allocating capital across a broad range of real estate strategies. His experience includes institutional client and investor relations, underwriting, product development and risk assessment. Reza joined Clarion Partners in 2021 and began working in the real estate industry in 2003.

Clarion Partners Management: Proven Industry Leaders

Senior management averages 31 years of experience and 15 years tenure with the Firm

¹Sue Ansel's tenure represents her tenure with Gables Residential, a Clarion portfolio company since 2005. Her participation on the Investment Committee is limited to multifamily investments. ²Indraneel Karlekar's tenure is inclusive of his prior employment with ING Clarion. ³Members of Risk and ESG committees are also included in other department counts. As of January 1, 2025. Numbers in parentheses represent tenure with the Firm/years in the industry. Staff counts are inclusive of administrative personnel but exclude the office of the CEO. Corporate Support includes Information Technology and Human Resources staff members.

Lion Properties Fund

Section II

Lion Properties Fund Summary

Atrio, Burbank, CA

LPF Highlights:

- Highly scaled, open-end core fund with 24-year track record
- 10-year outperformance vs NFI-ODCE benchmark (gross and net)¹
- Thematic research-based investing; portfolio concentrated in high-conviction themes like Logistics, Housing and Healthcare; significant underweight to Office
- Differentiated ability to create value through Industrial build-to-core development
- Significant alignment with investors: Firm ownership and Fund co-investment

¹10-year annualized returns. Please refer to the total gross and net return calculations shown on slide "Investment Performance: Rolling Time Periods".

²Dividend Yield is presented at an annual rate calculated by linking quarterly distribution yields which are calculated as total quarterly distributions to investors before the deduction of Fund management fees, divided by the weighted average equity of the Fund for the respective quarter.

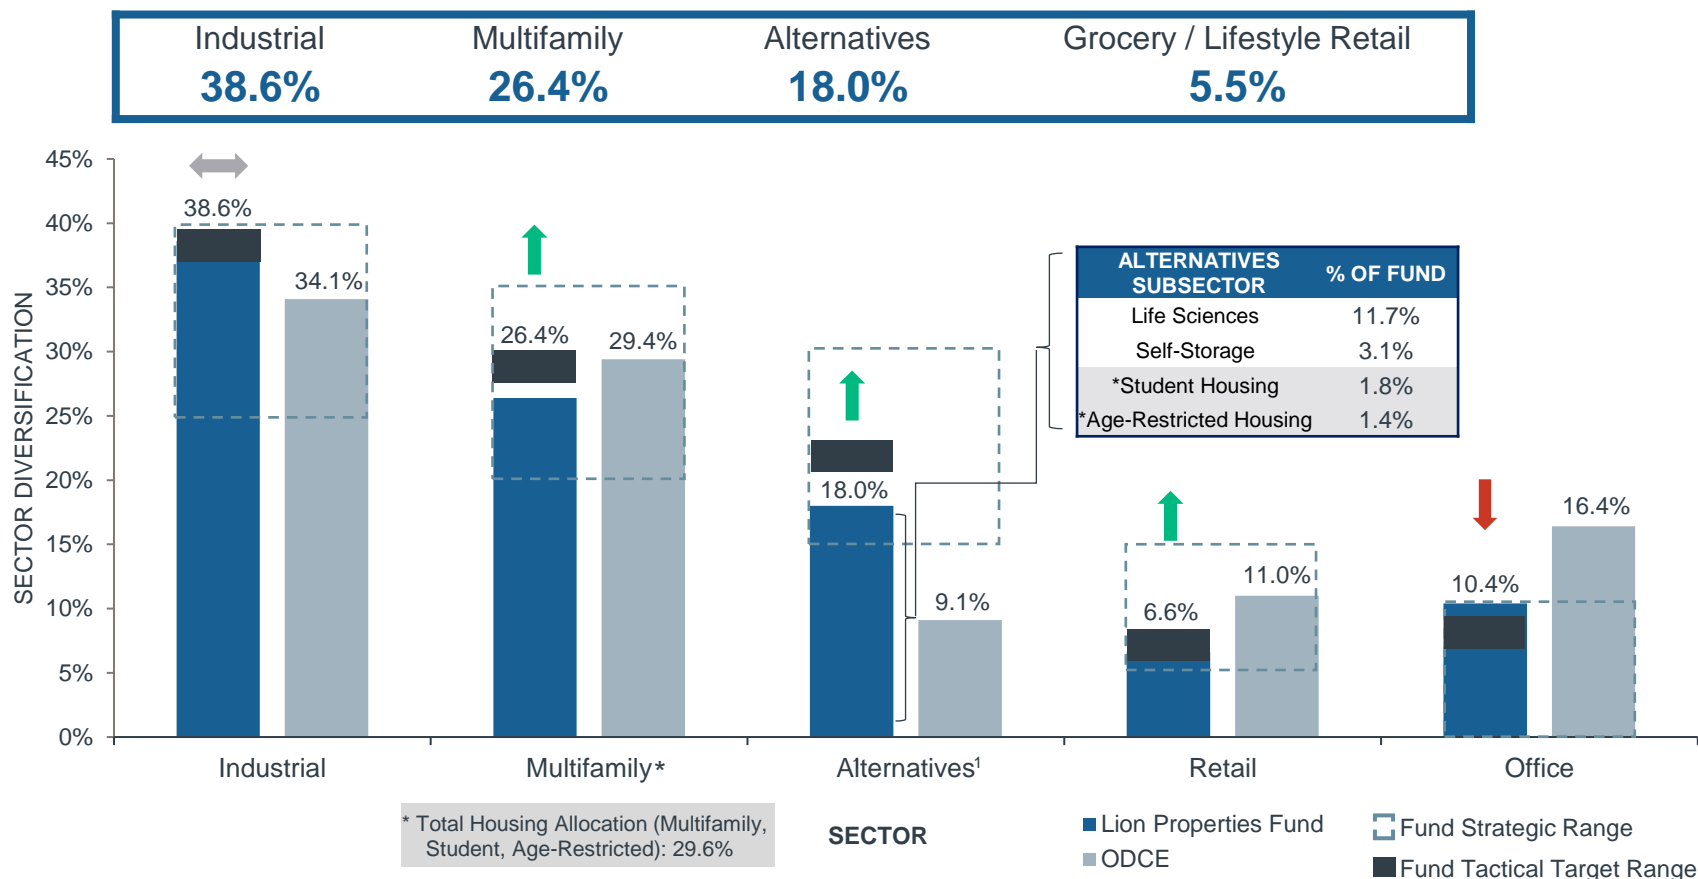

³Comprises current CP employee discretionary investments and Clarion corporate entity investments.

⁴Represents the 4Q24 redemption queue less rescissions received subsequent to quarter-end.

As of December 31, 2024. Past performance is not indicative of future results. Please see the important disclosures at the end of this presentation.

Property Type Diversification: Concentrated In Top Sectors

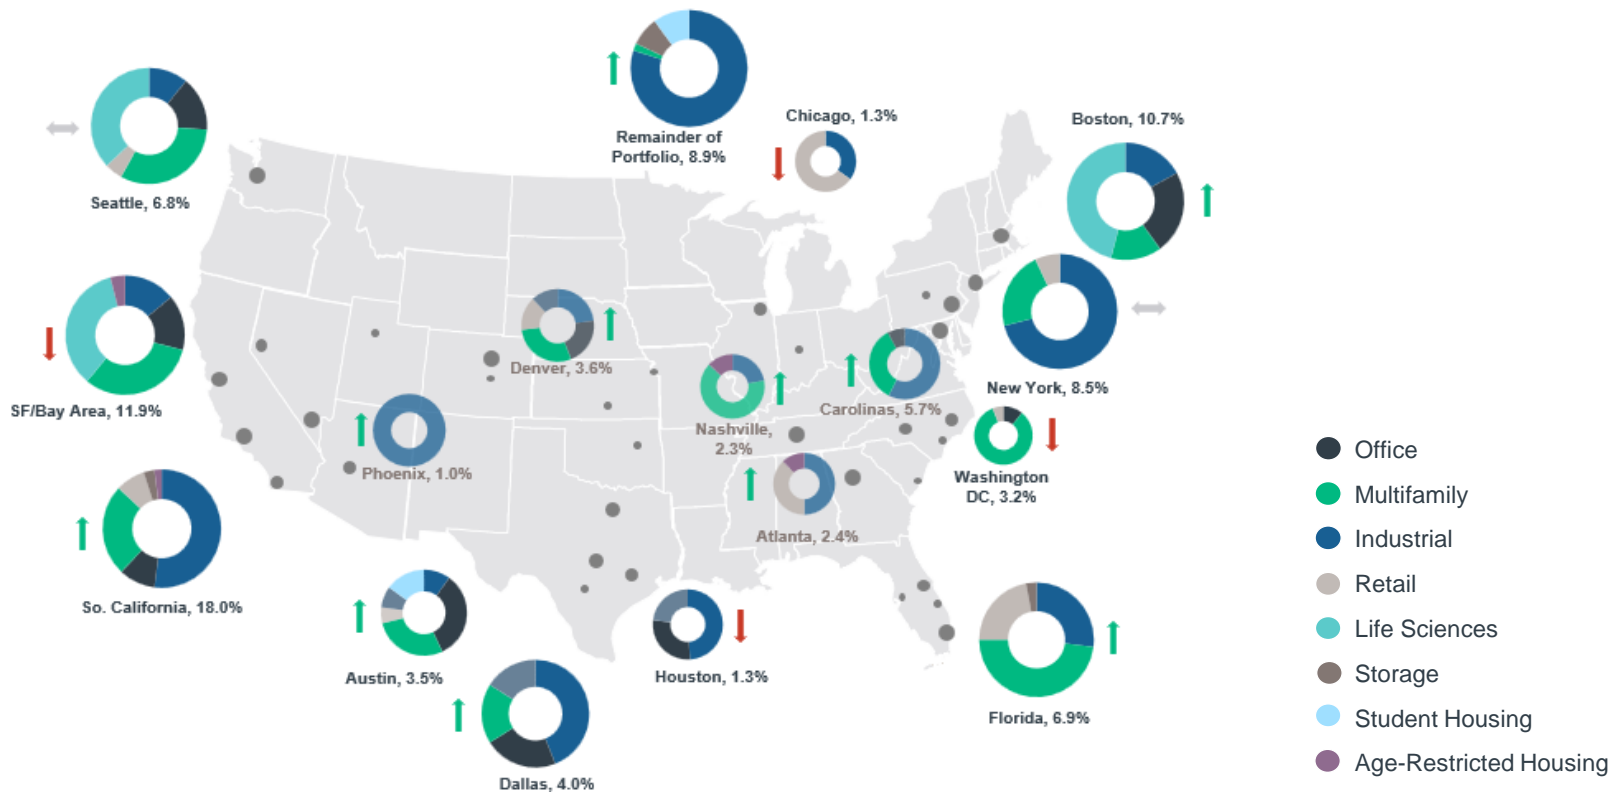

89% in High-Conviction Sectors

¹In the NFI-ODCE benchmark, "Alternatives" represents any asset not in four major property types. Data as of December 31, 2024. Percentages represent Gross Real Estate Value at share. Arrows indicate intended portfolio property type diversification targets. Fund Strategic Range is described in the Fund's offering memorandum and includes a more in-depth discussion of these and other risks and should be reviewed prior to any investment in the Fund. Target Tactical Range represents LPF's current views on sector allocation based on current market conditions and are subject to change. Past performance is not indicative of future results. Please see the important disclosures at the end of this presentation. NFI-ODCE Index presented as benchmark.

Geographic Diversification: Focus on Growth Markets

- Two key geographic themes:
 - Affordability Markets: Typically Sun Belt markets benefiting from population growth (LPF is overweight in Sun Belt¹)
 - Innovation Markets: Innovation clusters benefiting from top growth industries (AI, Media, Healthcare)

¹For both LPF and the Expanded NPI-ODCE, the Sun Belt allocation includes any investments held in the South region, the Mountain region, and the Carolinas. As of December 31, 2024. Percentages represent Gross Real Estate Value at share. Arrows indicate intended portfolio geographic diversification targets.

Industrial Composition and Strategy: Overweight Top Sector

KEY METRICS

# of Investments:	65
LPF / ODCE Allocation:	38.6% / 34.1%
Square Feet:	39.4 Million
Occupancy:	93.0%

Cranbury Station, Cranbury, NJ

Strategy and Execution

- Maintain overweight, given outperforming rent growth outlook
 - E-commerce growth and supply chain diversification remain long-term tailwinds
- Market rents estimated to be ~30% above in-place rents¹
- Build-to-core capabilities are a differentiating factor; the Fund has developed one-third of its industrial portfolio
 - Current industrial development pipeline expected to add accretive returns in top markets like Orlando, Eastern PA/NJ, and Phoenix

GEOGRAPHIC ALLOCATION

~30% Market rents spread to in-place¹

4.6 Years of WALT

~60% In top performing West Region and NJ/NY

14 Years Average Age

¹Based on current in-place rents and market rent estimates provided by Altus, the Fund's third-party appraisal manager. Calculation represents the amount, expressed as a percentage, by which market rent estimate exceeds current in-place rents. Rent increases are not guaranteed. As of December 31, 2024. Chart percentages represent Gross Real Estate Value. Forecasts have certain inherent limitations and are based on complex calculations and formulas that contain substantial subjectivity and should not be relied upon as being indicative of future results. Past performance is not indicative of future results. Please see the important disclosures at the end of this presentation.

Multifamily Composition and Strategy: Dynamic Mix of Class A and B

KEY METRICS

# of Investments:	50
LPF / ODCE Allocation:	26.4% / 29.4%
Units:	15,252
Occupancy:	93.1%

West Port Colony Apartments, St. Petersburg, FL

Strategy and Execution

- Long-term overweight: U.S. is under-housed; renting is less costly than buying
- LPF has a diversified portfolio with a key overweight: ~60% in low-rise/suburban garden (best-performing apartment subtype) vs ~40% for the ODCE
- Focus on seasoned assets owned below replacement cost, with relatively affordable rent levels vs new supply
- New construction levels are below the national average in 55% of our apartment submarkets; in another 20% of our submarkets, new supply does not fall within our primary trade area and new construction rents are well above in-place rents¹
- ~50% of portfolio under renovation at a 15%-20% return on cost

MULTIFAMILY TYPE

- Low-Rise / Garden
- Mid-Rise
- High-Rise

~60%

Suburban Low-Rise /
Garden Style

~50%

Under Renovation at
10%-20% ROC

¹As determined by Clarion's Research and Asset Management teams.

As of December 31, 2024. Chart percentages represent Gross Real Estate Value. Forecasts have certain inherent limitations and are based on complex calculations and formulas that contain substantial subjectivity and should not be relied upon as being indicative of future results. Past performance is not indicative of future results. Please see the important disclosures at the end of this presentation.

Life Sciences Composition and Strategy: Prime Assets, Top Tenancy

KEY METRICS

# of Investments:	8
LPF / ODCE Allocation ¹ :	11.7% / 5.3%
Square Feet:	3.1 Million
Occupancy:	94.3%

Strategy and Execution

- Bright long-term outlook based on demographics (aging population) and medical innovation
- Long-term outperforming sector: LPF's life sciences return is approximately 200 bps higher than the overall ODCE return over the trailing 5 years²
- Over short-term, sector is dealing with excess supply, which is concentrated in peripheral locations and by inexperienced groups with limited track record
- LPF's portfolio is defensive: 94% occupied with 8.7 years of WALT; fortress locations like Kendall Square (Cambridge, MA); Big Pharma tenancy like Merck and Bristol Myers; and long-term partnership with Alexandria, the largest life sciences owner in U.S.

LIFE SCIENCES SUBMARKETS

~30%	Market rents spread to in-place ³
8.7	Years of WALT
14 Years	Average Age
94.3%	Occupancy

¹In LPF's portfolio, it includes only life sciences assets. In the NFI-ODCE benchmark, "Life Sciences" represents "other" which is any asset not in four major property types (or self-storage). ²LPF's life sciences portfolio achieved a 4.8% return over the five-year period (4.2% net). See full fund performance on "Investment Performance: Rolling Time Periods". ³Based on current in-place rents and market rent estimates provided by Altus, the Fund's third-party appraisal manager. Calculation represents the amount, expressed as a percentage, by which market rent estimate exceeds current in-place rents. Rent increases are not guaranteed. As of December 31, 2024, 400 Dexter is in a 70%/30% joint venture with Alexandria Real Estate Equities, Inc. ("ARE") with the above images being provided courtesy of ARE. Chart percentages represent Gross Real Estate Value. Past performance is not indicative of future results. Please see the important disclosures at the end of this presentation.

Self-Storage Composition and Strategy: Focus on Rent Optimization

KEY METRICS

# of Investments:	37
LPF / ODCE Allocation:	3.1% / 3.8%
Square Feet:	2.2 Million
Occupancy:	89.7%

Extra Space Venice Boulevard, Los Angeles, CA

Strategy and Execution

- Favorable long-term outlook and strong historical track record; sector has low capex drag and is a good inflation hedge (monthly leases)
- Focus on assets with rent rolls where institutional REIT management can optimize rents
- Target Sun Belt locations with strong demand drivers and barriers to entry
- Strong sourcing channel through joint venture partners

STORAGE LOCATIONS

As of December 31, 2024. Chart percentages represent Gross Real Estate Value. Past performance is not indicative of future results. Please see the important disclosures at the end of this presentation.

Retail Composition and Strategy: Resilient Subtypes

KEY METRICS

# of Investments:	13
LPF / ODCE Allocation:	6.6% / 11.0%
Square Feet:	2.6 Million
Occupancy:	87.2%

Whole Foods at the Domain, Austin, TX

Strategy and Execution

- Focus on grocery and neighbourhood shopping centers, which are resilient and benefit from strong demand and limited supply
- Sector is defensive, with certain formats showing an improved outlook due to less supply and renewed demand
- No exposure to malls, which are highly illiquid today

RETAIL FORMATS

0%

Mall Exposure

~50%

Grocery / Necessity

~35%

Premier Lifestyle

As of December 31, 2024. Chart percentages represent Gross Real Estate Value. Past performance is not indicative of future results. Please see the important disclosures at the end of this presentation.

Office Composition and Strategy: Underweight, Bearish Outlook

KEY METRICS

# of Investments:	18
LPF / ODCE Allocation:	10.4% / 16.4%
Square Feet:	3.8 Million
Occupancy:	76.3% ²

8777 Washington, Culver City, CA

Strategy and Execution

- Long-term underweight: sector headwinds due to work-from-home policies, but high-quality office in top locations showing resiliency and continued demand
- LPF is significantly underweight vs ODCE
- Remaining “hold” portfolio concentrated in high-quality assets
- No NY or Chicago office; no exposure to illiquid “mega” assets
- LPF office values down 44% from peak (inclusive of sales)¹

OFFICE COMPOSITION BY MARKET

¹Since 2Q22. Quarterly value changes do not include development properties or current quarter acquisitions. ²Weighted by square feet. When weighted by GAV, office occupancy is 81.2%. As of December 31, 2024. Chart percentages represent Gross Real Estate Value. Past performance is not indicative of future results. Please see the important disclosures at the end of this presentation.

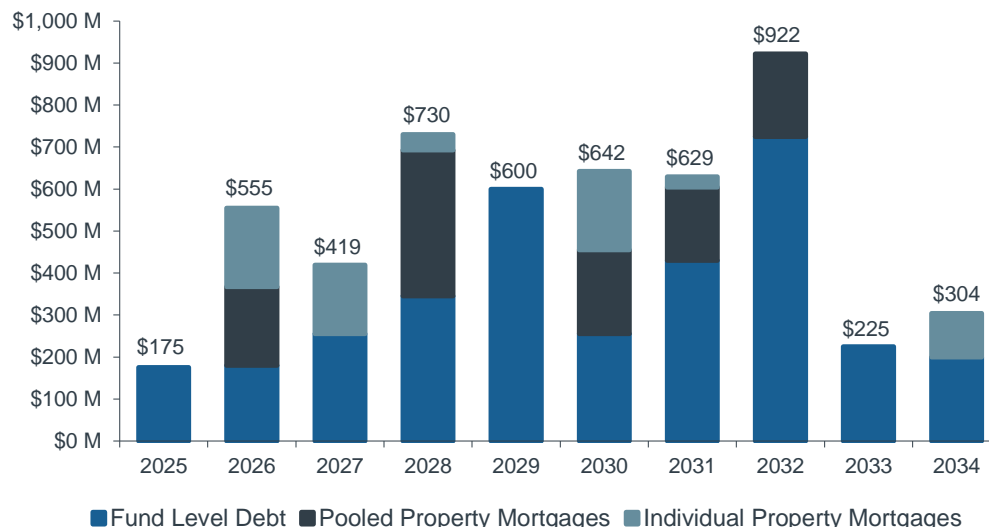

Financial Management: High-Quality Balance Sheet

4Q24 Activity:

- Repaid \$75 million of Fund level bilateral term loan
- Placed \$196.8 million of fixed rate financing upon acquisition of student housing portfolio

Manhattan College, BS in Accounting
(2009)

Important Legal Information

Appendix B

Important Information

This is not an offer to sell, or a solicitation of an offer to buy, securities. Investment in real estate and real estate derivatives entails significant risk and is suitable only for certain qualified investors as part of an overall diversified investment strategy and only for investors able to withstand a total loss of investment. This material is for distribution only to prospective investors who are highly sophisticated and are, as applicable, “accredited investors” and “qualified purchasers,” as those terms are defined in the Securities Act of 1933 and the Investment Company Act of 1940, respectively. This presentation is strictly confidential and is not intended for distribution without the written permission of Clarion Partners LLC (“Clarion Partners” or the “Firm”). References to indexes are hypothetical illustrations of aggregate returns and do not reflect the performance of any actual investment. Investors cannot invest in an index.

Past performance is not indicative of future results and a risk of loss exists. Any investor’s actual returns may vary significantly from any returns set forth in this presentation. Forecasts and projections rely on a number of economic and financial variables and are inherently speculative. Such forecasts and projections are based on complex calculations and formulas that contain substantial subjectivity. There can be no assurance that market conditions will perform according to any forecast or that any fund or account will achieve its objectives. Investors are cautioned not to place undue reliance on any forward-looking statements. The Firm does not assume any obligation to update any forward-looking statements as a result of new information. Such statements are believed to be accurate as of the date provided but are not guaranteed and are subject to change without notice. This material does not constitute investment advice and should not be viewed as a current or past recommendation to buy or sell any securities or to adopt any investment strategy. The Firm does not provide tax or legal advice. Tax-related statements are based on the Firm’s understanding of the tax laws. Investors must seek the advice of their independent legal and tax counsel before investing. Certain information contained in this material may have been obtained or derived from independent sources believed to be reliable. The Firm cannot guarantee the accuracy or completeness of such information and has not reviewed the assumptions on which such information is based. Photos used in this presentation were selected based on visual appearance, are used for illustrative purposes only and are not necessarily reflective of any current or future investments.

Private Fund Disclosure. The information provided herein with respect to one or more funds (each, a “Fund”), as applicable, has been provided for informational purposes only and does not constitute an offer to sell, or solicitation of offers to buy or convert, securities in any existing or to-be-formed issuer. Investment in a Fund can be made only pursuant to the subscription agreement, offering memorandum and related documents and after careful consideration of the risk factors set forth therein. The information provided with respect to any Fund is qualified in its entirety by reference to, and will be superseded by, such documents.

An investment in a Fund is speculative and involves a high degree of risk, potentially including risks related to the use of leverage. The performance of a Fund and its assets may be volatile. An investor may lose all or a significant amount of its investment in a Fund. Investment in a Fund is suitable only for sophisticated investors and requires the financial ability and willingness to accept the high risk and lack of liquidity inherent in the investment.

There can be no assurance that unrealized investments will be realized at the current valuations. There can be no guarantee that any Fund will be successful in implementing its investment strategy or that target returns will be realized. Gross returns are calculated prior to deduction of all fund-level fees, including asset management fees and incentive distributions, and investor-level taxes, all of which will reduce returns to investors.

Effect of Fees on Gross Performance. If management and other fees were included, performance would be lower. Advisory fees are disclosed in each fund’s private placement memorandum, in each investment advisory agreement for separate accounts, and are summarized in Part 2A of Clarion Partners’ Form ADV. Registration as an investment adviser does not imply a certain level of skill or training.

Aggregated Property-Level Data. Aggregated (or “blended”) property-level return targets, capitalization rates and internal rates of return (IRR), as applicable, are based, in part, on the value of the properties held in the portfolio. Values are assigned to each property using a consistent methodology that is applied in accordance with the written valuation policies. Aggregated asset-level return targets, capitalization rates and IRRs may incorporate property values assigned to properties on different dates within the prior year. Such property values are estimates only. This data is provided for illustrative purposes only and should not be viewed as a guarantee of current property value, capitalization rate or internal rate of return, as applicable. Neither individual nor aggregated capitalization rates represent a return or distribution from the portfolio itself.

Important Information (cont.)

The following is a high level summary of only certain risks of an investment in a Fund. It is not an exhaustive list and is qualified in its entirety by the risk factors section in a Fund's private placement memorandum. Investors should review the entire set of risk factors as described in a Fund's private placement memorandum before investing for a discussion of these and other risks inherent in an investment in a Fund.

The purchase of shares offered entail certain risks that investors should consider before making a decision to invest in a Fund. There can be no assurance that a Fund will be profitable or, if it is profitable, that any particular yield or rate of return will be obtained or other investment objective will be realized. An investor should only invest in a Fund as part of an overall investment strategy and only if the investor is able to withstand total loss of investment.

Investment Considerations and Risk Factors

Risk Factors that should be considered in making an investment are: Risks of leverage, including possible inability to repay current indebtedness or to source new debt; possible inability to refinance; variable interest rate; impact of borrowing covenants; general economic conditions; past performance of a Fund and the Firm; insufficient cash flow; partial or total loss of a Fund's capital; liability for return of distributions; availability of suitable investments; investment and disposition activities; projections; controlling person liability; limited rights; dependence of the general partner; difficulties in retaining employees; diverse investor group; litigation; diversification of risk; subsequent closings; attracting investors; failure to fund equity commitments; separate agreements with limited partners; leverage and interest rate exposure; availability of leverage; currency and exchange rates, references to indices; short-term investments; privacy and information security.

Risks Related to Real Estate Investing

Investment in real estate generally; illiquidity of a Fund's investments; competition for residents from other housing alternatives; failure to succeed in new markets; inability to pass through increases in operating expenses and other real estate costs; inability to complete development and renovation of advantageous terms; failure of newly acquired apartment communities to achieve anticipated results; inability to lease vacant space, renew leases or re-let space as leases expire; third-party fee management business; partial ownership interests; government support for multifamily housing; environmental matters; possible inability to sell properties; Americans with Disabilities Act; possible inability to complete renovation and development on advantageous terms; possibility of future terrorist activity; insurance may not cover all losses; financial condition of tenants; uninsured losses from seismic activity; partial ownership interests; and investments in securities.

Risks Related to Environmental, Social and Governance ("ESG") Matters

Clarion Partners can choose, in its discretion, whether to take into account ESG considerations in its investment decision-making, as and to the extent consistent with its fiduciary obligations, applicable law, and the relevant governing documents and investment management agreements of its clients (as applicable). In certain circumstances, due to ESG considerations, the Firm may not make or not recommend the making of investments when it would otherwise have done so, which could adversely affect the performance of a client's portfolio. On the other hand, the Firm may determine not to take such considerations into account. The extent to which the Firm takes ESG considerations into account varies from client portfolio to client portfolio, based on, among other things, the portfolio's investment objective, investment strategies, and investment restrictions, as outlined in the relevant governing documents and investment management agreements of its clients (as applicable) as well as applicable law.

The Firm is dependent upon ESG information and data obtained through voluntary or third-party reporting that may be incomplete, inaccurate, or unavailable, which could cause the Firm to incorrectly assess a potential investment's ESG attributes and/or related risks and opportunities. While ESG is only one of the many factors the Firm might consider in making an investment, there is no guarantee that the Firm will consider such factors at all or that the Firm will successfully implement and make investments that create positive ESG impact while enhancing value and achieving financial returns. ESG initiatives may not achieve the desired financial and social results, or the market or society may not view any such changes as desirable. Any successful engagement efforts on the part of the Firm will depend, in part, on its skill in properly identifying and analyzing material ESG data and factors, and their potential impact on value. There can be no assurance that any ESG techniques employed will be successful.

Additional information about other risks associated with Clarion Partners' investment process and investment strategies is available on its current Form ADV Part 2A Brochure, which is available upon request.

Important Information (cont.)

Target Return Disclosure. Target returns may be included herein and, if so, are based on historical performance of the real estate market, current market conditions, the amount of risk to be assumed by the account or fund, as applicable, and using available data, and certain subjective assumptions relating to the respective investment strategy.

There can be no assurance that estimated profit or target returns will be achieved. The target is not intended to provide an investor with a prediction of performance and investors should not rely on targets when making a decision on whether or not to invest. Fund-level target returns assume investment through a complete real estate investment cycle. Target returns are presented to establish a benchmark for future evaluation of fund performance, to provide a measure to assist in assessing the anticipated risk and reward characteristics of an investment in the strategy and to facilitate comparisons with other investments. In general, the higher a target return is for an investment, the greater the amount of risk that is associated with that investment. Any estimated profit and target returns are subject to significant limitations. Estimated profit or target returns do not reflect actual investments, liquidity constraints and actual fees and expenses. Any target data or other forecasts contained herein are based upon estimates and assumptions about circumstances and events that may not occur and cannot account for every factor that may impact that economic market and/or other factors may have on the implementation of an investment. For instance, the target may assume a certain rate of increase in the value of real estate over a particular period of time. If any of the assumptions used do not prove to be true, actual results may be lower than targeted returns. The target investment returns are subject to change at any time and are current as of the date hereof only. In any given year, there may be significant variation from these targets, and Clarion Partners makes no guarantee that an investment will be able to achieve its investment objective or any estimated profit or target returns in the short term or the long term (i.e., over a complete real estate investment cycle). Targets are subjective and should not be construed as providing any assurance as to the results that may be realized. Gross Target Returns are calculated gross of fund-level management fees, incentive allocations and expenses which, in the aggregate, will be substantial and will have the effect of reducing returns. Net Target Returns are calculated net of fund-level management fees, incentive allocations and expenses, unless otherwise disclosed.

Target Internal Rates of Return. “Target Gross IRRs” are returns calculated gross of fund-level management fees, incentive allocations and expenses, which in the aggregate will be substantial and will have the effect of reducing returns. “Target Net IRRs” are returns calculated net of fund-level management fees, incentive allocations and expenses, unless otherwise disclosed. Target IRRs are based solely on internal cash flow projections and estimates of current market value and do not reflect opinions of value from third party appraisals.

Value Definitions, As Applicable. Gross Asset Value (“GAV”) is the Firm’s consolidated wholly owned total assets and proportionate share of joint venture total assets. Gross Real Estate (“GRE”) is the Firm’s consolidated wholly owned real estate assets and proportionate share of joint venture real estate assets. In contrast to GAV, GRE excludes cash and other assets. For Periods on or after 12/31/2013, Assets under Management (“AuM”) is Gross Asset Value (“GAV”). Prior to that date, AuM is Gross Real Estate Value (“GRE”).

ESG Ratings and Green Building Certifications

GRESB Rating: GRESB B.V. (GRESB) created and tabulated a Fund or Account’s score and ranking, which generally covers activities taking place during a 12-months reporting period preceding the annual submission deadline; this is typically the previous calendar year but can in some instances a different 12-month period prior to the submission deadline may be selected. Results are typically released on or around October 1st, annually. In order to obtain a rating, a Fund or Account must pay an assessment fee for submission to GRESB.

PRI Rating: PRI ratings are granted by the PRI Association (“PRIA”), a United Nations-supported organization. Clarion Partners pays fees to PRIA as part of its submission to PRIA to assess how it, as a signatory of the Principles for Responsible Investment, has progressed year-over-year and relative to peers. The investment categories are evaluated using six performance bands (A+, A, B, C, D, and E), where A+ distinguishes the top scoring signatories, representing a score of 95% or above. Submissions to PRIA are typically made in December of a given calendar year and ratings are provided.

LEED Certifications: LEED certifications are a green building rating program developed by the U.S. Green Building Council (“USGBC”). Certifications achieved during the design and construction of a building do not expire. Certifications achieved based on the operation expire after three years and must be renewed. Fees are paid to the USGBC to receive building-level certifications.

ENERGY STAR Certifications: ENERGY STAR certifications are conveyed by the U.S. Environmental Protection Agency (“EPA”). Certifications are given on an annual basis and must be certified year to year. Fees are paid to the EPA to receive building-level certifications.

Energy Star Partner of the Year: The 2023 ENERGY STAR Partner of the Year Award is issued by the U.S. Environmental Protection Agency (EPA) and the U.S. Department of Energy, and is valid in perpetuity. Clarion did not pay a fee to apply for this award.

P&I Best Places to Work in Money Management: Pensions & Investments partnered with Best Companies Group, a research firm specializing in identifying great places to work, to conduct a two-part survey process of employers and their employees. The first part consisted of evaluating each nominated company’s workplace policies, practices, philosophy, systems and demographics. This part of the process was worth approximately 25% of the total evaluation. The second part consisted of an employee survey to measure the employee experience. This part of the process was worth approximately 75% of the total evaluation. The combined scores determined the top companies. For a complete list of the 2022 Pensions & Investments’ Best Places to Work in Money Management winners and write-ups, go to www.pionline.com/BPTW2022.

Important Information (cont.)

Index Definitions

NCREIF Property Index ("NPI"). The NPI is a primary benchmark for the commercial real estate industry calculated and maintained by the National Council of Real Estate Investment Fiduciaries (NCREIF). The NPI is a total rate of return measure of the investment performance of a large pool of individual commercial properties that have been acquired in the private market for investment purposes. The NPI includes only U.S. office, industrial, retail, residential and hospitality operating properties owned in whole or in part by non-taxable institutional investors and accounted for at market value. Unless otherwise disclosed, the NPI is presented gross of investment management fees and is unleveraged. Information regarding NPI's methodology is available at <http://www.reportingstandards.info/>. Substantial differences exist between the methodology for calculating the NPI and the Firm's performance data. Performance was achieved under certain economic conditions that may not be repeated.

The NCREIF Total Return Property Index (NPI). The NPI quarterly, annual and annualized total returns consist of three components of return – income, capital and total. Total Return is computed by adding the Income Return and the Capital Value Return.

NPI Market Value Index (MVI). The NPI MVI is simply an equal-weighted average of quarterly changes in reported market value for the properties that are not undergoing a major capital expansion. MVI is designed to reflect how property values are changing over time and be an alternative to the NCREIF capital index.

NCREIF Appreciation Index. The NCREIF Appreciation Index is a quarterly, unleveraged composite appreciation return for private commercial real estate properties held for investment purposes only.

NCREIF Industrial Sub-Index. The NCREIF Industrial Sub-Index is a quarterly, unleveraged composite total return for private industrial real estate properties held for investment purposes only.

Bloomberg Barclays US Aggregate Bond Index. The Bloomberg Barclays US Aggregate Bond Index is a broad-based flagship benchmark that measures the investment grade, US dollar-denominated, fixed-rate taxable bond market. The index includes Treasuries, government-related and corporate securities, MBS (agency fixed-rate and hybrid ARM pass-throughs), ABS and CMBS (agency and non-agency).

FTSE NAREIT All Equity REIT Index. The FTSE NAREIT All Equity REITs Index is a free-float adjusted, market capitalization-weighted index of U.S. Equity REITs. Constituents of the Index include all tax-qualified REITs with more than 50 percent of total assets in qualifying real estate assets other than mortgages secured by real property.

Investment Property Databank (IPD) Index. The IPD Index is a composite of investment returns on both a historical and current basis of its participating members, who must qualify as being open-end, core, diversified funds pursuing a core investment strategy and includes all investments owned by them including real estate, cash and other investments (mezzanine loans receivable, notes receivable, forward commitments, etc.). The IPD Index is capitalization-weighted and is reported gross of fees. Measurement is time-weighted. Unless otherwise noted, IPD Index returns are presented without leverage and before the deduction of portfolio level management fees and do not reflect the results of any actual investment portfolio. The index's history is unfrozen; therefore, any reconstitution would result in a revision to the index's historical data. For comparative purposes, IPD calculates returns for the Lion Properties Fund using the same methodology as the IPD Index. Further information is available online at <http://www.ipd.com>.

S&P 500 - Standard and Poor's 500 Index. The S&P 500 Index is a capitalization-weighted index of 500 large U.S. stocks. The index is designed to capture the returns of many different sectors of the U.S. economy. The total return calculation includes the price-plus-gross cash dividend return.

NREI / Marcus & Millichap Investor sentiment survey. A joint industry sentiment survey run by National Real Estate Investor (NREI) and Marcus & Millichap, a firm specializing in commercial real estate investment sales, financing, research and advisory services, with offices across the United States and Canada. A quarterly report meant to gauge Commercial Real Estate investors confidence in the current US Real Estate market.

Real Industrial MVI. The Real Industrial MVI is simply an equal-weighted average of quarterly real changes in reported market value for the industrial properties that are not undergoing a major capital expansion by taking out inflation.

US Real GDP. The gross domestic product (GDP) is a comprehensive scorecard of the country's economic health. As an aggregate measure of total economic production for a country, GDP represents the market value of all goods and services produced by the economy during the period measured, including personal consumption, government purchases, private inventories, paid-in construction costs and the foreign trade balance (exports are added, imports are subtracted). Real GDP takes into account the impact of inflation and allows comparisons of economic output from one year to the next and other comparisons over periods of time.

RETIREMENT BOARD STAFF REPORT

DATE: March 19, 2025
TO: Sacramento Regional Transit Retirement Boards - All
FROM: Jason Johnson - VP, Finance/CFO
SUBJ: RECEIVE AND FILE INVESTMENT PERFORMANCE RESULTS
FOR THE ATU, IBEW AND SALARIED EMPLOYEE
RETIREMENT PLANS FOR THE QUARTER ENDED
DECEMBER 31, 2024 (ALL). (JOHNSON)

RECOMMENDATION

Motion to Approve.

RESULT OF RECOMMENDED ACTION

Motion: Receive and File Investment Performance Results for the ATU, IBEW and Salaried Employee Retirement Plans for the Quarter Ended December 31, 2024 (ALL). (Johnson)

FISCAL IMPACT

None.

DISCUSSION

Pension funds are invested consistent with the Statement of Investment Objectives and Policy Guidelines adopted by each Retirement Board. Attached are the two investment performance reports prepared by the Boards' pension investment consultants. The first report is the Fourth Quarter 2024 Market Update (Attachment 1) and the second is the Investment Measurement Service Quarterly Review as of December 31, 2024 (Attachment 2). These reports provide a detailed analysis of the performance of each of the investment managers retained by the Retirement Boards to manage the Retirement Funds for the quarter ended December 31, 2024. The second report compares the performance of each investment manager with benchmark indices, other fund managers of similarly invested portfolios and other indices.

Investment Compliance Monitoring

In accordance with the Statement of Investment Objectives and Policy Guidelines for the Sacramento Regional Transit District Retirement Plans (Investment Policy), Northern Trust Company performs daily investment compliance monitoring on the Plans' three (3) actively managed funds. As of December 31, 2024, there was a compliance breach reported; however, the report was investigated and it was determined that the breach report was due to restructuring of a company held by the Plans' fixed income manager (Intelsat, held by TCW) as part of a corporate action. Northern Trust's compliance monitoring settings were set to flag equity

common stock as a compliance breach. The Intelsat investments were originally purchased as Corporate Bonds so this incident is not a violation of the investment policy. The current equity common stock will continue to be monitored until TCW disposes of the security. The final attached report includes the monitoring summary (Attachment 3).

The table below provides an overview of the quarter performance, quarter ending December 31, 2024 – gross of investment management fees:

Investment Manager - Description - Benchmark	Benchmark Index	ATU, IBEW & Salaried Fund	Investment Gains/ (Losses)	Pension Fund Contributions/ (Withdrawals)
Boston Partners (large cap value) Russell 1000 Value	(1.98)%	(.70)%	\$(527,506)	-

Important Disclosures regarding the use of this document are included at the end of this document. These disclosures are an integral part of this document and should be considered by the user.

Economic Commentary

Quarterly Real GDP Growth

U.S. Treasury Yield Curves

- The economy showed some signs of slowing during 2024, but GDP growth persisted, and the job market proved resilient despite some head fakes.
 - GDP grew by 2.3% for 4Q, hitting an annual rate of 2.5%, below the 2.9% notched in 2023.
- The yield curve steepened, with rates rising for Treasuries one year and longer. The 10-year rose 77 bps from 3.81% to 4.58%.
- The Consumer Price Index (CPI) came in at 2.9% (year-over-year) through December, up from 3Q. Core CPI (excluding food and energy) rose by 3.2%, decelerating from the 3.3% rise (year-over-year) in prior months.
- Strong GDP growth suggests no easing in tight labor markets; the prospect for continued inflationary pressure from the labor market is high.
 - Getting inflation down to the Fed's stated goal of 2% will take time, and some discomfort. Squeezing out the last of excess inflation will require a period of below trend growth, a loosening of the labor market, and the pain of a rise in unemployment.

Equity Markets Up Sharply in 2024

Stocks have recovered losses of 2022; fixed income still lags

S&P 500 climbed 25% in 2024

- U.S. large cap substantially outperformed U.S. small cap, developed ex-U.S. markets, and emerging markets. Technology and AI drove the S&P 500.

Weak 4Q for core fixed income

- The Bloomberg Aggregate fell 3.1%. Long duration and non-U.S. bonds saw even greater declines.
- Interest rates remain volatile as the markets assess how the Fed will continue with easing.
- CPI-U came in at 2.9% (year-over-year) through December, up from 3Q, but with a welcome decline in the core figure, which rose 3.2%.

Solid growth through 2024

- 3Q GDP came in at a surprisingly strong 3.1%, after another surprise in 2Q, and saw 2.3% growth in 4Q. Consumer spending continues to drive GDP growth.

U.S. Equity Performance: 4Q24

U.S. market ends on a high note, though with some volatility

U.S. equity market ended on a positive note

- The S&P 500 Index was up over 2%. However, the quarter was marked by volatility, particularly during October and December. Negative returns in October were driven by investor anxiety around the U.S. presidential election, uncertainty with the Fed's approach to interest rate cuts, and some misses to corporate earnings expectations. December returns, while initially buoyed by the Fed's third consecutive rate cut, cooled after the Fed announced no additional rate cuts until the second half of 2025.

Sector Performance

- Sector performance was mixed; only 4 (Communication Services, Consumer Discretionary, Financials, and Information Technology) posted gains.

Market Cap and Style Performance

- During 4Q24, large cap stocks outperformed small caps. Growth outperformed value across the market cap spectrum.
- Market concentration remains elevated; there remains a large gap between S&P 500 and S&P 500 ex-Mag 7 returns.

Industry Sector Quarterly Performance (S&P 500) as of 12/31/24

U.S. Equity: One Year Ended 12/31/24

Sources: FTSE Russell, S&P Dow Jones Indices

Global/Global ex-U.S. Equity Performance: 4Q24

Non-U.S. markets pull back at year-end

Broad market

- Global equity markets had a rough end to the year as concerns around Trump tariffs weighed on Europe and China.
- Europe was one of the worst-performing regions, plagued by political uncertainty and continued economic woes.
- While still negative, Japan's decline over the quarter was stemmed by the approval of a new economic stimulus plan focused on issues such as wage stability and deflation.

Emerging markets

- Emerging markets declined on the heels of poor results out of China and India. Although Chinese stocks initially gained from the announced stimulus, they later declined due to expected tariffs. Economic growth in India fell short of expectations.

Growth vs. value

- In developed markets outside the U.S., the influence of technology and AI is comparatively more muted, which makes the trend of growth stocks, especially those from the "Magnificent Seven," outperforming value stocks less pronounced.

U.S. dollar strength

- The U.S. dollar shifted direction from the last quarter as expectations for interest rate cuts faded, along with the anticipated beneficial effects of the Trump administration on the U.S. economy; in total the U.S. Dollar Index rose over 7% during the quarter.

U.S. Fixed Income Performance: 4Q24

Uncertainty resumes, hurting 4Q fixed income performance

Macro environment

- The Fed continued the rate cutting cycle, most recently in December, bringing the target range to 4.25%-4.50%.
- The yield curve steepened, with rates rising for Treasuries one year and longer. The 10-year rose 77 bps from 3.81% to 4.58%.
- Inflation concerns resurfaced, with the breakeven inflation rate rising by 19 bps to 2.30% over the course of the quarter.

Performance and drivers

- The Bloomberg US Aggregate Bond Index fell 3.1% due to the rise in rates.
- With the steepening yield curve, long government bonds fared the worst among sectors.
- Leveraged finance sectors (High yield: +0.2%, leveraged loans: +2.3%) were the only positive fixed income sectors as spreads tightened.

Valuations

- Corporate credit spreads across both investment grade and leveraged finance tightened, with both being “priced to perfection.”
- New issuance continued to be strong, with 2024 totals for both investment grade and high yield outpacing 2023.

U.S. Fixed Income Returns: One Year Ended 12/31/24

Sources: Bloomberg, Callan, J.P. Morgan, S&P Dow Jones Indices, U.S. Treasury

U.S. Private Real Estate Performance: 4Q24

Sector appreciation turns positive, outside of office

Valuations reflect higher interest rates

- Valuations appear to have bottomed and now reflect higher borrowing costs.
- Income returns were positive across sectors and regions.
- Property sectors were mixed; Office and Hotel experienced negative appreciation, and the remaining sectors had flat or positive appreciation.
- Return dispersion by manager within the ODCE Index was due to the composition of underlying portfolios.

Watch List

Manager/ Mandate	Date Added to Watch List	Reason	Recommended Action
Atlanta Capital/ Small Cap	Q2 2024	Atlanta Capital announced that Bill Bell, a portfolio manager for the Small Cap Equity strategy, will retire at the end of 2024. The team consists of three members: Bill Bell, Chip Reed, and Matt Hereford, all of whom have worked together for over 20 years. In anticipation of Bell's retirement, Jeff Wilson has joined the firm as a portfolio manager. He has nearly 20 years of experience and will work closely with Bell and the team to ensure a smooth transition. Callan will continue to monitor the strategy during this transition but is not overly concerned given the tenure of the team.	Callan is not overly concerned given the tenure of the team and the long-standing succession plan. However, the Boards and Callan will continue to closely monitor the strategy as they move through this transition.
Boston Partners/ Large Cap Value	Q1 2024	Boston Partners announced that David Pyle, a portfolio manager for over 15 years on the Large Cap Value strategy, will step away from his portfolio manager duties in September 2024; though he will remain at Boston Partners for some time. The team consists of four members: David Pyle, Mark Donovan, Josh White, and David Cohen. Pyle and Donovan (who founded Boston Partners) represent the more veteran, seasoned portfolio managers on the strategy. Boston Partners has incrementally promoted White and Cohen into portfolio management roles over the last decade to plan for these eventual transitions. Pyle's responsibilities will be primarily assumed by White and Cohen.	Callan is not overly concerned given the tenure of the team and the long-standing succession plan. However, the Boards and Callan will continue to closely monitor the strategy as they move through this transition.
TCW/ Fixed Income	Q3 2023	TCW/MetWest announced senior fixed income leadership transitions in 2023. Laird Landmann and Steve Kane are Generalist Portfolio Managers and were part of the original team that came to TCW from MetWest in 2010. Landmann retired at the end of 2023 and Kane will retire at the end of 2024. Ruben Hovhannisyan, Associate Generalist Portfolio Manager, and Jerry Cudzil, Global Head of Credit Trading, joined Co-CIO Bryan Whalen as Generalists. Whalen joined TCW in 2010 from MetWest alongside Landmann, Kane, and Tad Rivelle who retired in 2021. Cudzil has been with TCW since 2012, and Hovhannisyan since 2007. TCW's performance has also been mixed with peer group rankings well below median for numerous time periods.	Callan continues to monitor the strategy and team. Performance remains challenged especially versus peers in the short to intermediate term. Longer term results vs. the benchmark are more competitive. Callan recommends looking at other managers to potentially complement or replace TCW.

Callan

Fixed Income

Role of Fixed Income

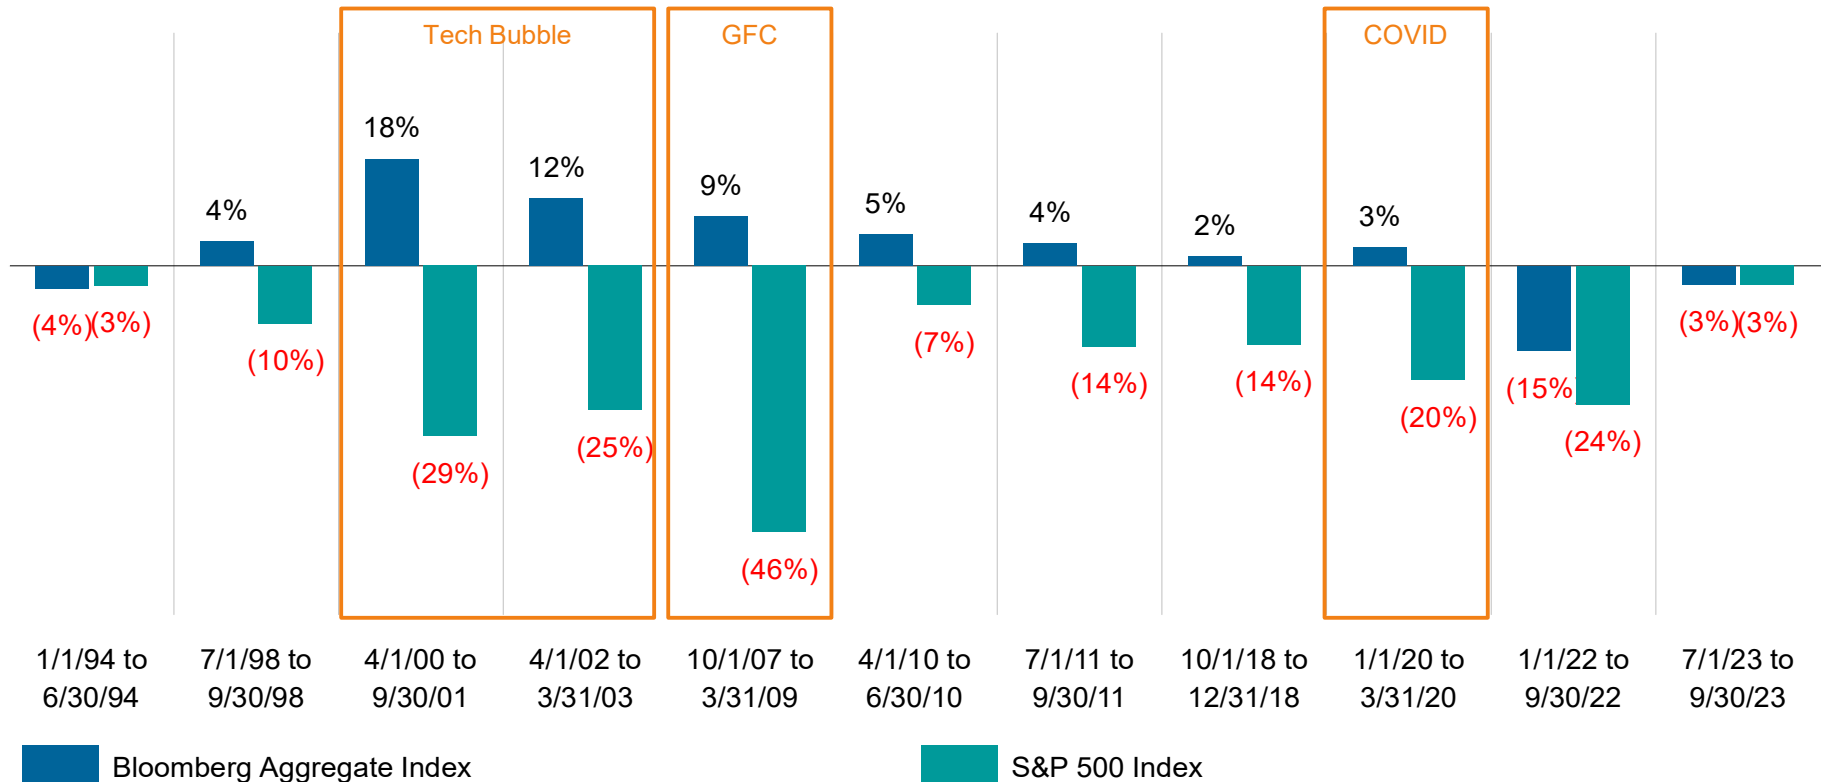

- Fixed income is typically a low-risk, diversifying asset for the equity allocation rather than a primary source of additional return to a fund
 - Bonds offer protection in the short run
 - Dependable income provides comfort in economic downturns or sudden market corrections
- The fixed income allocation is the primary diversifier for the exposure to equities (which is there for capital growth)
- Fixed income can also serve as a very important source of liquidity

- Sacramento Regional Transit District invests in broad U.S. Fixed Income as represented by the Bloomberg Aggregate U.S. Index. The index sectors include:
 - U.S. Treasuries, government-related bonds
 - Investment-grade corporate bonds
 - Agency mortgage-backed securities, commercial mortgage-backed securities, and asset-backed securities
- The benchmark excludes the following sectors, but your manager has latitude to invest a limited amount of the portfolio in these “plus” sectors:
 - High yield (“junk”) bonds
 - Non-U.S. dollar bonds, emerging market bonds

An Illustration of the Role of Fixed Income

Fixed Income Performance in Declining Equity Environments

Cumulative Returns for U.S. Equity Declining Periods (last 30 years)

- Typically, the role of fixed income is to serve as a low-risk, diversifying anchor against which an investor takes on riskier investments in assets such as equity.

Fixed Income Strategies

Descriptions, Pros and Cons

Core: Attempts to add modest amounts of value over the return of the Bloomberg Aggregate index with limited tracking error

Pros

Expectation of value added by modest interest rate, sector, and security management

Low tracking error

Cons

Outperformance over the index can be difficult to achieve net of fees

Active core managers can underperform during times of equity market stress due to low Treasury allocations

Purpose: Stability of Income/Diversification vs. Equity/Low Default Risk

Core Plus: Attempts to add value over the Bloomberg Aggregate with higher tracking error due in part to the use of non-index securities such as low-quality credit or global bonds

Pros

Managers have generally added value net of fees

Use tactical allocation when valuations are attractive

Cons

Higher tracking error than Core

Non-index securities tend to have higher correlations to equities limiting potential diversification vs. equities

Purpose: Moderate Total Return

Introducing Callan On-Demand Education (CODE)

- ▶ Variety of educational courses
- ▶ Interactive and engaging
- ▶ Self-guided modules
- ▶ Eligible for continuing education credits
- ▶ Learning at your own pace

CODE courses are designed for investment professionals of all levels—and they're self-guided. Access them anytime, from anywhere, and get continuing education credits for each completed course.

CODE is for you, your colleagues, your new hires, and your interns. It's for anyone interested in learning about institutional investing.

callan.com/code

3 Reasons to Take CODE Courses

- 1 Become a better fiduciary
- 2 Showcase your skills and knowledge
- 3 Learn from Callan's investment experts

Important Disclosures

Information contained in this document may include confidential, trade secret and/or proprietary information of Callan and the client. It is incumbent upon the user to maintain such information in strict confidence. Neither this document nor any specific information contained herein is to be used other than by the intended recipient for its intended purpose.

The content of this document is particular to the client and should not be relied upon by any other individual or entity. There can be no assurance that the performance of any account or investment will be comparable to the performance information presented in this document.

Certain information herein has been compiled by Callan from a variety of sources believed to be reliable but for which Callan has not necessarily verified for accuracy or completeness. Information contained herein may not be current. Callan has no obligation to bring current the information contained herein.

Callan's performance, market value, and, if applicable, liability calculations are inherently estimates based on data available at the time each calculation is performed and may later be determined to be incorrect or require subsequent material adjustment due to many variables including, but not limited to, reliance on third party data, differences in calculation methodology, presence of illiquid assets, the timing and magnitude of unrecognized cash flows, and other data/assumptions needed to prepare such estimated calculations. In no event should the performance measurement and reporting services provided by Callan be used in the calculation, deliberation, policy determination, or any other action of the client as it pertains to determining amounts, timing or activity of contribution levels or funding amounts, rebalancing activity, benefit payments, distribution amounts, and/or performance-based fee amounts, unless the client understands and accepts the inherent limitations of Callan's estimated performance, market value, and liability calculations.

Callan's performance measurement service reports estimated returns for a portfolio and compares them against relevant benchmarks and peer groups, as appropriate; such service may also report on historical portfolio holdings, comparing them to holdings of relevant benchmarks and peer groups, as appropriate ("portfolio holdings analysis"). To the extent that Callan's reports include a portfolio holdings analysis, Callan relies entirely on holdings, pricing, characteristics, and risk data provided by third parties including custodian banks, record keepers, pricing services, index providers, and investment managers. Callan reports the performance and holdings data as received and does not attempt to audit or verify the holdings data. Callan is not responsible for the accuracy or completeness of the performance or holdings data received from third parties and such data may not have been verified for accuracy or completeness.

Callan's performance measurement service may report on illiquid asset classes, including, but not limited to, private real estate, private equity, private credit, hedge funds and infrastructure. The final valuation reports, which Callan receives from third parties, for of these types of asset classes may not be available at the time a Callan performance report is issued. As a result, the estimated returns and market values reported for these illiquid asset classes, as well as for any composites including these illiquid asset classes, including any total fund composite prepared, may not reflect final data, and therefore may be subject to revision in future quarters.

The content of this document may consist of statements of opinion, which are made as of the date they are expressed and are not statements of fact. The opinions expressed herein may change based upon changes in economic, market, financial and political conditions and other factors. Callan has no obligation to bring current the opinions expressed herein.

The information contained herein may include forward-looking statements regarding future results. The forward-looking statements herein: (i) are best estimations consistent with the information available as of the date hereof and (ii) involve known and unknown risks and uncertainties. Actual results may vary, perhaps materially, from the future results projected in this document. Undue reliance should not be placed on forward-looking statements.

Callan is not responsible for reviewing the risks of individual securities or the compliance/non-compliance of individual security holdings with a client's investment policy guidelines.

This document should not be construed as legal or tax advice on any matter. You should consult with legal and tax advisers before applying any of this information to your particular situation.

Reference to, or inclusion in this document of, any product, service or entity should not necessarily be construed as recommendation, approval, or endorsement or such product, service or entity by Callan. This document is provided in connection with Callan's consulting services and should not be viewed as an advertisement of Callan, or of the strategies or products discussed or referenced herein.

The issues considered and risks highlighted herein are not comprehensive and other risks may exist that the user of this document may deem material regarding the enclosed information. Please see any applicable full performance report or annual communication for other important disclosures.

Unless Callan has been specifically engaged to do so, Callan does not conduct background checks or in-depth due diligence of the operations of any investment manager search candidate or investment vehicle, as may be typically performed in an operational due diligence evaluation assignment and in no event does Callan conduct due diligence beyond what is described in its report to the client.

Any decision made on the basis of this document is sole responsibility of the client, as the intended recipient, and it is incumbent upon the client to make an independent determination of the suitability and consequences of such a decision.

Callan undertakes no obligation to update the information contained herein except as specifically requested by the client.

Target*	-1.87%	9.99%	2.37%	6.61%	6.60%

Recent Developments

Josh White has been appointed co-CIO at Boston Partners, effective January 1, 2025. He is a portfolio manager on the Large Cap Value strategy, and his responsibilities on that strategy are not expected to change. White started as an analyst, was promoted to portfolio manager, and now co-CIO. We view this to be a positive development as White is viewed as part of the next generation of leadership at Boston Partners.

Laurel Durkay is joining the MSIM Prime Property Fund portfolio management team as CIO. Durkay joined Morgan Stanley in 2020 and has 23 years of investment experience. She was most recently the Head of Global Listed Real Assets within MSIM and the lead portfolio manager for U.S. and Global listed real estate strategies. We view this as a positive development as they are adding resources to the team.

Watch List

- TCW is on the watch list to monitor the performance, portfolio manager transitions, and senior leadership retirements.
- Boston Partners is on the watch list to monitor portfolio manager transitions.
- Atlanta Capital is on the watch list to monitor portfolio manager transitions.

* Current Quarter Target = 32.0% S&P 500, 25.0% Bloomberg Aggregate, 14.0% MSCI EAFE, 10.0% NCREIF NFI-ODCE Value Weighted, 8.0% Russell 2000 Index, 6.0% MSCI Emerging Markets, and 5.0% MSCI EAFE Small Cap.

U.S. EQUITIES

U.S. market reaches record high after spike in volatility

- The U.S. equity market ended with the S&P 500 Index up over 2%. However, the quarter was marked by volatility, particularly during October and December.
- Negative returns in October were driven by investor anxiety around the U.S. presidential election, uncertainty with the Fed’s approach to interest rate cuts, and some misses to corporate earnings expectations. December returns, while initially buoyed by the Fed’s third consecutive rate cut, cooled after the Fed announced no additional rate cuts until the second half of 2025.
- Sector performance was mixed; only four (Communication Services, Consumer Discretionary, Financials, and Information Technology) posted gains.
- During 4Q24, large cap stocks outperformed small caps. Growth outperformed value across the market cap spectrum.

Large caps continue to drive narrow markets

- Concentration and performance contribution of the Magnificent Seven stocks within the large cap benchmarks remain outsized relative to the aggregate of benchmark constituents. In 2024, the S&P 500’s return was 25%; the S&P 500 ex-Mag 7 return was 16%.
- For the second year in a row, less than 30% of S&P 500 stocks have outperformed the S&P 500 itself.

Fundamentals critical to success of large caps

- In recent years, themes—like “work from home” stocks and AI—as well as momentum have been attributed to the prolonged success of the Magnificent Seven.
- However, Magnificent Seven valuations have been supported by strong earnings, low debt, and high cash levels. Consensus and forward-looking EPS growth expectations also remain high for large cap companies.

GLOBAL EQUITIES

Trump tariffs weigh on markets

- Global equity markets had a rough end to the year as proposed Trump tariffs weighed on Europe and China.
- Europe was one of the worst-performing regions, plagued by political uncertainty and continued economic woes.
- While still negative, Japan's decline over the quarter was stemmed by the approval of a new economic stimulus plan focused on issues such as wage stability and deflation.

Emerging markets: China, India fall short

- Emerging markets declined on the heels of poor results out of China and India. Although Chinese stocks initially gained from the announced stimulus, they later declined due to expected tariffs. Economic growth in India fell short of expectations.

Growth vs. value: Muted tech influence on growth

- In developed ex-U.S. markets, the influence of technology and AI is comparatively more muted, which makes the trend of growth stocks, especially those from the Magnificent Seven, outperforming value stocks less pronounced.

U.S. dollar: Strength from beneficial effects of Trump

- The U.S. dollar shifted direction from the last quarter as expectations for interest rate cuts faded, along with the anticipated beneficial effects of the Trump administration on the U.S. economy; in total the U.S. Dollar Index rose over 7% during the quarter.

Global equity market concentration continues higher

- The U.S. share of global market capitalization in global indices is at all-time highs as U.S. technology companies lead markets higher.
- Market capitalization-weighted global benchmarks are providing lower diversification benefits than historically at not only the country level but also the security level as the top five constituents of the MSCI ACWI Index currently comprise over 17% of the benchmark.

U.S. dollar strength has been a headwind

- Recent U.S. dollar strength has been a notable headwind for non-U.S. equities as local currency revenues of companies continue to weaken against the U.S. dollar.
- Some contributing factors to U.S. dollar strength have been higher interest rate policy by the Federal Reserve compared to other central banks, U.S. economic and market strength, and recent rhetoric regarding potentially higher tariff rates on U.S. imports.

Global Equity: Quarterly Returns

Global Equity: One-Year Returns

Source: MSCI

Inflation concerns resurface

- The Fed continued the rate cutting cycle, most recently in December, bringing the target range to 4.25%-4.50%.
- The yield curve steepened, with rates rising for Treasuries one year and longer. The 10-year rose 77 bps to 4.58%.
- Inflation concerns resurfaced, with the breakeven inflation rate rising by 19 bps to 2.30% over the course of the quarter.

Performance drivers

- The Bloomberg US Aggregate Bond Index fell 3.1% due to the rise in rates.
- With the steepening yield curve, long government bonds fared the worst among sectors.
- Leveraged finance sectors (High yield: +0.2%, leveraged loans: +2.3%) were the only positive fixed income sectors as spreads tightened.

Credit spreads tighten

- Corporate credit spreads across both investment grade and leveraged finance tightened, with both being “priced to perfection.”
- New issuance continued to be strong, with 2024 totals for both IG and HY outpacing 2023.

MUNICIPAL BONDS**Negative returns in 4Q**

- The muni AAA-rated curve shifted upward across the curve and the curve steepened.
- The spreads between the AAA 2s/10s key rates (24 bps) ended the year slightly tighter than Treasuries (33 bps).

Low dispersion across quality in 4Q and for the year

- AAA: -1.3%; +1.4%
- AA: -1.2%; +1.5%
- A: -1.2%; +1.5%
- BBB: -1.3%; +1.6%

Robust issuance through 4Q, demand softened slightly

- Total issuance in 2024 was \$508 billion, beating the previous high of \$485 billion in 2020 and up 32% year over year.
- Demand absorbed issuance most of the quarter, but December exhibited three weeks of fund outflows, after 23 weeks of consecutive net inflows.

Muni valuations vs. U.S. Treasuries remain rich

- 10-year AAA muni/10-year U.S. Treasury yield ratio was rich relative to the 10-year median (67% now vs. 80% historical).

U.S. Fixed Income: Quarterly Returns**U.S. Fixed Income: One-Year Returns****U.S. Treasury Yield Curves**

Sources: Bloomberg, Credit Suisse

GLOBAL FIXED INCOME

Political controversy dogs euro zone

- The euro zone was marred with political controversy in 4Q, specifically in Germany and France.
- GDP growth in the euro zone rose modestly (+0.4%), while the ECB cut rates in December.
- Japan's GDP grew 1.2% on the back of strong exports and a weaker yen.

U.S. dollar surges

- The U.S. dollar rose 8% versus a basket of six developed market currencies.
- Global fixed income returns varied based on currency exposure, with the Bloomberg Global Aggregate ex US Hedged Index rising 0.7%, while the Bloomberg Global Aggregate ex US Unhedged Index fell by 6.8%.

Emerging market debt faced similar challenges

- Both EM local and hard currency bonds posted negative returns on the quarter, weighed down by the strength of the dollar and geopolitical risk. Hard currency spreads narrowed at the tail end of the quarter, partially offsetting an early quarter drawdown.
- Brazil increased its policy rate by 150 bps in 4Q, resulting in the Brazilian real depreciating by 13.4% versus the U.S. dollar.

Actual vs Target Asset Allocation As of December 31, 2024

The top left chart shows the Fund's asset allocation as of December 31, 2024. The top right chart shows the Fund's target asset allocation as outlined in the investment policy statement. The bottom chart ranks the fund's asset allocation and the target allocation versus the Callan Public Fund Spons- Mid (100M-1B).

Asset Class Weights vs Callan Public Fund Spons- Mid (100M-1B)

* Current Quarter Target = 32.0% S&P 500 Index, 25.0% Blmbg:Aggregate, 14.0% MSCI EAFE, 10.0% NCREIF NFI-ODCE Val Wt Gr, 8.0% Russell 2000 Index, 6.0% MSCI EM and 5.0% MSCI EAFE Small.

Quarterly Total Fund Relative Attribution - December 31, 2024

The following analysis approaches Total Fund Attribution from the perspective of relative return. Relative return attribution separates and quantifies the sources of total fund excess return relative to its target. This excess return is separated into two relative attribution effects: Asset Allocation Effect and Manager Selection Effect. The Asset Allocation Effect represents the excess return due to the actual total fund asset allocation differing from the target asset allocation. Manager Selection Effect represents the total fund impact of the individual managers excess returns relative to their benchmarks.

Asset Class Under or Overweighting

Actual vs Target Returns

Relative Attribution by Asset Class

- Quarterly Summary and Highlights**
- Total Fund's portfolio posted a (2.51)% return for the quarter placing it in the 97 percentile of the Callan Public Fund Spons- Mid (100M-1B) group for the quarter and in the 59 percentile for the last year.
 - Total Fund's portfolio underperformed the Target by 0.64% for the quarter and underperformed the Target for the year by 0.43%.

Performance vs Callan Public Fund Spons- Mid (100M-1B) (Gross)

Relative Return vs Target

Callan Public Fund Spons- Mid (100M-1B) (Gross) Annualized Seven Year Risk vs Return

Actual vs Target Historical Asset Allocation

The Historical asset allocation for a fund is by far the largest factor explaining its performance. The charts below show the fund's historical actual asset allocation, and the fund's historical target asset allocation.

Actual Historical Asset Allocation

Target Historical Asset Allocation

* Current Quarter Target = 32.0% S&P 500 Index, 25.0% Blmbg:Aggregate, 14.0% MSCI EAFE, 10.0% NCREIF NFI-ODCE Val Wt Gr, 8.0% Russell 2000 Index, 6.0% MSCI EM and 5.0% MSCI EAFE Small.

Investment Manager Asset Allocation

The table below contrasts the distribution of assets across the Fund's investment managers as of December 31, 2024, with the distribution as of September 30, 2024. The change in asset distribution is broken down into the dollar change due to Net New Investment and the dollar change due to Investment Return.

Asset Distribution Across Investment Managers

Current Holdings Based Style Analysis
Domestic Equity
As of December 31, 2024

This page analyzes the current investment style of a portfolio utilizing a detailed holdings-based style analysis to determine actual exposures to various market capitalization and style segments of the domestic equity market. The market is segmented quarterly by capitalization and style. The capitalization segments are dictated by capitalization decile breakpoints. The style segments are determined using the "Combined Z Score", based on the eight fundamental factors used in the MSCI stock style scoring system. The upper-left style map illustrates the current market capitalization and style score of the portfolio relative to indices and/or peers. The upper-right style exposure matrix displays the current portfolio and index weights and stock counts (in parentheses) in each capitalization/style segment of the market. The middle chart illustrates the total exposures and stock counts in the three style segments, with a legend showing the total growth, value, and "combined Z" (growth - value) scores. The bottom chart exhibits the sector weights as well as the style weights within each sector.

Atlanta Capital Equity Characteristics Analysis Summary

Portfolio Characteristics

This graph compares the manager's portfolio characteristics with the range of characteristics for the portfolios which make up the manager's style group. This analysis illustrates whether the manager's current holdings are consistent with other managers employing the same style.

Portfolio Characteristics Percentile Rankings Rankings Against Callan Small Capitalization as of December 31, 2024

Sector Weights

The graph below contrasts the manager's sector weights with those of the benchmark and median sector weights across the members of the peer group. The magnitude of sector weight differences from the index and the manager's sector diversification are also shown. Diversification by number and concentration of holdings are also compared to the benchmark and peer group. Issue Diversification represents by count, and Diversification Ratio by percent, the number of holdings that account for half of the portfolio's market value.

Current Holdings Based Style Analysis
Atlanta Capital
As of December 31, 2024

This page analyzes the current investment style of a portfolio utilizing a detailed holdings-based style analysis to determine actual exposures to various market capitalization and style segments of the domestic equity market. The market is segmented quarterly by capitalization and style. The capitalization segments are dictated by capitalization decile breakpoints. The style segments are determined using the "Combined Z Score", based on the eight fundamental factors used in the MSCI stock style scoring system. The upper-left style map illustrates the current market capitalization and style score of the portfolio relative to indices and/or peers. The upper-right style exposure matrix displays the current portfolio and index weights and stock counts (in parentheses) in each capitalization/style segment of the market. The middle chart illustrates the total exposures and stock counts in the three style segments, with a legend showing the total growth, value, and "combined Z" (growth - value) scores. The bottom chart exhibits the sector weights as well as the style weights within each sector.

Country Allocation

International Equity VS Intl Eq - Benchmark Characteristics

Country Allocation

The chart below contrasts the portfolio's country allocation with that of the index as of December 31, 2024. This chart is useful because large deviations in country allocation relative to the index are often good predictors of tracking error in the subsequent quarter. To the extent that the portfolio allocation is similar to the index, the portfolio should experience more "index-like" performance. In order to illustrate the performance effect on the portfolio and index of these country allocations, the individual index country returns are also shown.

Historical Holdings Based Style Analysis Pyrford For Five Years Ended December 31, 2024

This page analyzes the historical investment style of a portfolio utilizing a detailed holdings-based style analysis to determine average actual exposures to various region and style segments of the international/global equity market. The market is segmented quarterly by region and style. The style segments are determined using the "Combined Z Score", based on the eight fundamental factors used in the MSCI stock style scoring system. The upper-left style map illustrates the average historical market capitalization and style score of the portfolio relative to indices and/or peers. The upper-right style exposure matrix displays the average historical portfolio and index weights and stock counts (in parentheses) in each region/style segment of the market. The next two style exposure charts illustrate the actual quarterly region/style and style only segment exposures of the portfolio through history.

Country Allocation Pyrford VS MSCI EAFE Index

Country Allocation

The chart below contrasts the portfolio’s country allocation with that of the index as of December 31, 2024. This chart is useful because large deviations in country allocation relative to the index are often good predictors of tracking error in the subsequent quarter. To the extent that the portfolio allocation is similar to the index, the portfolio should experience more "index-like" performance. In order to illustrate the performance effect on the portfolio and index of these country allocations, the individual index country returns are also shown.

The market is segmented quarterly by region and style. The style segments are determined using the "Combined Z Score", based on the eight fundamental factors used in the MSCI stock style scoring system. The upper-left style map illustrates the current market capitalization and style score of the portfolio relative to indices and/or peers. The upper-right style exposure matrix displays the current portfolio and index weights and stock counts (in parentheses) in each region/style segment of the market. The middle chart illustrates the total exposures and stock counts in the three style segments, with a legend showing the total growth, value, and "combined Z" (growth - value) scores. The bottom chart exhibits the sector weights as well as the style weights within each sector.

Historical Holdings Based Style Analysis DFA Emerging Markets For Five Years Ended December 31, 2024

This page analyzes the historical investment style of a portfolio utilizing a detailed holdings-based style analysis to determine average actual exposures to various region and style segments of the international/global equity market. The market is segmented quarterly by region and style. The style segments are determined using the "Combined Z Score", based on the eight fundamental factors used in the MSCI stock style scoring system. The upper-left style map illustrates the average historical market capitalization and style score of the portfolio relative to indices and/or peers. The upper-right style exposure matrix displays the average historical portfolio and index weights and stock counts (in parentheses) in each region/style segment of the market. The next two style exposure charts illustrate the actual quarterly region/style and style only segment exposures of the portfolio through history.

Country Allocation

DFA Emerging Markets VS MSCI Emerging Markets Index

Country Allocation

The chart below contrasts the portfolio's country allocation with that of the index as of December 31, 2024. This chart is useful because large deviations in country allocation relative to the index are often good predictors of tracking error in the subsequent quarter. To the extent that the portfolio allocation is similar to the index, the portfolio should experience more "index-like" performance. In order to illustrate the performance effect on the portfolio and index of these country allocations, the individual index country returns are also shown.

Risk/Reward Statistics

The risk statistics used in this report examine performance characteristics of a manager or a portfolio relative to a benchmark (market indicator) which assumes to represent overall movements in the asset class being considered. The main unit of analysis is the excess return, which is the portfolio return minus the return on a risk free asset (3 month T-Bill).

Alpha measures a portfolio's return in excess of the market return adjusted for risk. It is a measure of the manager's contribution to performance with reference to security selection. A positive alpha indicates that a portfolio was positively rewarded for the residual risk which was taken for that level of market exposure.

Beta measures the sensitivity of rates of portfolio returns to movements in the market index. A portfolio's beta measures the expected change in return per 1% change in the return on the market. If a beta of a portfolio is 1.5, a 1 percent increase in the return on the market will result, on average, in a 1.5 percent increase in the return on the portfolio. The converse would also be true.

Downside Risk stems from the desire to differentiate between "good risk" (upside volatility) and "bad risk" (downside volatility). Whereas standard deviation punishes both upside and downside volatility, downside risk measures only the standard deviation of returns below the target. Returns above the target are assigned a deviation of zero. Both the frequency and magnitude of underperformance affect the amount of downside risk.

Excess Return Ratio is a measure of risk adjusted relative return. This ratio captures the amount of active management performance (value added relative to an index) per unit of active management risk (tracking error against the index.) It is calculated by dividing the manager's annualized cumulative excess return relative to the index by the standard deviation of the individual quarterly excess returns. The Excess Return Ratio can be interpreted as the manager's active risk/reward tradeoff for diverging from the index when the index is mandated to be the "riskless" market position.

Information Ratio measures the manager's market risk-adjusted excess return per unit of residual risk relative to a benchmark. It is computed by dividing alpha by the residual risk over a given time period. Assuming all other factors being equal, managers with lower residual risk achieve higher values in the information ratio. Managers with higher information ratios will add value relative to the benchmark more reliably and consistently.

R-Squared indicates the extent to which the variability of the portfolio returns are explained by market action. It can also be thought of as measuring the diversification relative to the appropriate benchmark. An r-squared value of .75 indicates that 75% of the fluctuation in a portfolio return is explained by market action. An r-squared of 1.0 indicates that a portfolio's returns are entirely related to the market and it is not influenced by other factors. An r-squared of zero indicates that no relationship exists between the portfolio's return and the market.

Relative Standard Deviation is a simple measure of a manager's risk (volatility) relative to a benchmark. It is calculated by dividing the manager's standard deviation of returns by the benchmark's standard deviation of returns. A relative standard deviation of 1.20, for example, means the manager has exhibited 20% more risk than the benchmark over that time period. A ratio of .80 would imply 20% less risk. This ratio is especially useful when analyzing the risk of investment grade fixed-income products where actual historical durations are not available. By using this relative risk measure over rolling time periods one can illustrate the "implied" historical duration patterns of the portfolio versus the benchmark.

Residual Portfolio Risk is the unsystematic risk of a fund, the portion of the total risk unique to the fund (manager) itself and not related to the overall market. This reflects the "bets" which the manager places in that particular asset market. These bets may reflect emphasis in particular sectors, maturities (for bonds), or other issue specific factors which the manager considers a good investment opportunity. Diversification of the portfolio will reduce or eliminate the residual risk of that portfolio.

Risk/Reward Statistics

Rising Declining Periods refer to the sub-asset class cycles vis-a-vis the broader asset class. This is determined by evaluating the cumulative relative sub-asset class index performance to that of the broader asset class index. For example, to determine the Growth Style cycle, the S&P 500 Growth Index (sub-asset class) performance is compared to that of the S&P 500 Index (broader asset class).

Sharpe Ratio is a commonly used measure of risk-adjusted return. It is calculated by subtracting the "risk-free" return (usually 3 Month Treasury Bill) from the portfolio return and dividing the resulting "excess return" by the portfolio's risk level (standard deviation). The result is a measure of return gained per unit of risk taken.

Sortino Ratio is a downside risk-adjusted measure of value-added. It measures excess return over a benchmark divided by downside risk. The natural appeal is that it identifies value-added per unit of truly bad risk. The danger of interpretation, however, lies in these two areas: (1) the statistical significance of the denominator, and (2) its reliance on the persistence of skewness in return distributions.

Standard Deviation is a statistical measure of portfolio risk. It reflects the average deviation of the observations from their sample mean. Standard deviation is used as an estimate of risk since it measures how wide the range of returns typically is. The wider the typical range of returns, the higher the standard deviation of returns, and the higher the portfolio risk. If returns are normally distributed (ie. has a bell shaped curve distribution) then approximately 2/3 of the returns would occur within plus or minus one standard deviation from the sample mean.

Total Portfolio Risk is a measure of the volatility of the quarterly excess returns of an asset. Total risk is composed of two measures of risk: market (non-diversifiable or systematic) risk and residual (diversifiable or unsystematic) risk. The purpose of portfolio diversification is to reduce the residual risk of the portfolio.

Tracking Error is a statistical measure of a portfolio's risk relative to an index. It reflects the standard deviation of a portfolio's individual quarterly or monthly returns from the index's returns. Typically, the lower the Tracking Error, the more "index-like" the portfolio.

Treynor Ratio represents the portfolio's average excess return over a specified period divided by the beta relative to its benchmark over that same period. This measure reflects the reward over the risk-free rate relative to the systematic risk assumed.

Note: Alpha, Total Risk, and Residual Risk are annualized.

List of Callan's Investment Manager Clients

Confidential – For Callan Client Use Only

Callan takes its fiduciary and disclosure responsibilities to clients very seriously. We recognize that there are numerous potential conflicts of interest encountered in the investment consulting industry, and that it is our responsibility to manage those conflicts effectively and in the best interest of our clients. At Callan, we employ a robust process to identify, manage, monitor, and disclose potential conflicts on an ongoing basis.

The list below is an important component of our conflicts management and disclosure process. It identifies those investment managers that pay Callan fees for educational, consulting, software, database, or reporting products and services. We update the list quarterly because we believe that our fund sponsor clients should know the investment managers that do business with Callan, particularly those investment manager clients that the fund sponsor clients may be using or considering using. Please note that if an investment manager receives a product or service on a complimentary basis (e.g., attending an educational event), they are not included in the list below. Callan is committed to ensuring that we do not consider an investment manager's business relationship with Callan, or lack thereof, in performing evaluations for or making suggestions or recommendations to its other clients. Please refer to Callan's ADV Part 2A for a more detailed description of the services and products that Callan makes available to investment manager clients through our Institutional Consulting Group, Independent Adviser Group, and Fund Sponsor Consulting Group. Due to the complex corporate and organizational ownership structures of many investment management firms, parent and affiliate firm relationships are not indicated on our list.

Fund sponsor clients may request a copy of the most currently available list at any time. Fund sponsor clients may also request specific information regarding the fees paid to Callan by particular fund manager clients. Per company policy, information requests regarding fees are handled exclusively by Callan's Compliance department.

Any decision made on the basis of this document is sole responsibility of the client, as the intended recipient, and it is incumbent upon the client to make an independent determination of the suitability and consequences of such a decision.

Callan undertakes no obligation to update the information contained herein except as specifically requested by the client.

Past performance is no guarantee of future results.

The Intelsat compliance breach was caused by a restructuring of Intelsat, a global provider of satellite communications services (original holdings Intelsat Jackson CUSIPs 45824TAY1 and 45824TBA2 and current holding CUSIP L5217E120); which is part of TCW's portfolio holdings. As a result of the restructuring, there will be an equity line item in the portfolio for some period as TCW seeks an opportunistic disposition to maximize the realized value. In time, execution on Intelsat's business plan should improve the liquidity and value of Intelsat common shares, leading to a full liquidation from the portfolio. Northern Trust's compliance monitoring settings were set to flag equity common stock as a compliance breach. The Intelsat investments were originally purchased as Corporate Bonds so this incident is not a violation of the investment policy. The current equity common stock will continue to be monitored until TCW disposes of the securities.

Note: The compliance results table above is usually reported as of the last business day of the quarter, however, an erroneous compliance breach was showing up on the 12/31/24 report. Northern Trust has corrected the report as of 1/31/25 and the corrected version is shown above.

RETIREMENT BOARD STAFF REPORT

DATE: March 19, 2025
TO: Sacramento Regional Transit Retirement Board - IBEW
FROM: John Gobel - Senior Manager, Pension and Retirement Services
SUBJ: Accept Actuarial Valuation and Approve Actuarially Determined Contribution Rates for Fiscal Year 2025-26

RECOMMENDATION

Adopt the Attached Resolution.

RESULT OF RECOMMENDED ACTION

Accept the actuarial valuation report (AVR) for the July 1, 2024 valuation date and approve the actuarially determined contribution (ADC) rates for Fiscal Year (FY) 2025-26.

FISCAL IMPACT

The fiscal impact of the proposed ADC rates for FY 2025-26 can only be determined by applying the discrete rates for Classic members and PEPRA members to the covered payroll for FY 2025-26. Based on a projection of covered payroll for the upcoming fiscal year, the AVR estimates the employer actuarial cost of rates recommended for the IBEW Plan (and detailed in this staff report) to be approximately \$5.0 million for FY 2025-26.

DISCUSSION

During the special Retirement Board meeting on February 26, 2025, Graham Schmidt of Cheiron presented the preliminary results of the annual actuarial valuation process for all three Retirement Plans, which are commonly referred to as the ATU Plan, the IBEW Plan, and the Salaried Plan. A recap of Mr. Schmidt's presentation to and discussion with the Retirement Boards is provided in the minutes of last month's meeting, which are presented for approval as agenda Item 2 for this Quarterly Retirement Board Meeting. During the prior presentation, Mr. Schmidt did not recommend any changes in the assumptions used to prepare the AVR for the July 1, 2024 valuation date.

As a reminder, the annual AVR measures the current and projected assets and liabilities of a defined benefit plan, and those measures are used to determine the plan's funded

ratio. The Plan's funded ratio and the normal costs associated with benefits prescribed by the Plan are used to establish the ADC and expressed as a percentage of covered payroll.

Within the AVR for the IBEW Plan, Cheiron offers an Executive Summary and reviews data points and developments for the July 1, 2024 valuation date. Items of note from the Executive Summary are cited below:

- The actuarially determined employer contribution rate decreased from 29.67% of payroll last year to 29.54% of payroll for the current valuation. This year's rate decreased primarily due to greater than expected investment experience and the contributions in excess of the actuarial cost.
- The Plan's funded ratio, the ratio of Actuarial Value of Assets over Actuarial Liability, increased from 74.7% as of July 1, 2023 to 77.6% as of July 1, 2024.
- [T]he return on Plan assets was 10.89% on a market value basis net of investment expenses, as compared to the 6.75% assumption.
- The Actuarial Value of Assets is currently 98.7% of the market value. Since actuarial assets are below market assets, there are unrecognized investment gains (approximately \$1.1 million) that will be reflected in the smoothed value of assets in future years.
- The impact of PEPRA continued to lower the employer cost... As of June 30, 2024, PEPRA members make up over 60% of the active workforce.

For further information regarding the composition of active membership, please see Appendix A of the AVR. Therein, Cheiron reports that 136 of 214 active members are subject to the benefit formulas and normal cost sharing provisions prescribed by PEPRA.

By accepting the AVR, the Retirement Board is accepting the funded ratio determined by the actuary and adopting the contribution rates for the next fiscal year. Per Section V, Table V-3 of the AVR for the July 1, 2024 valuation date, Cheiron is recommending new contribution rates for the IBEW Plan for the fiscal year beginning July 1, 2025:

Classic/Legacy Members

Employer Contribution Rate	34.51%
Member Contribution Rate	N/A

PEPRA Members

Employer Contribution Rate	26.57%
Member Contribution Rate	7.00% (unchanged from FY 2025)

RESOLUTION NO. 2025-03-246

SACRAMENTO REGIONAL TRANSIT RETIREMENT BOARD RESOLUTION

Adopted by the Board of Directors for the Retirement Plan for the Sacramento Regional Transit District Employees who are Members of IBEW Local Union 1245 on this date:

March 19, 2025

**Accept Actuarial Valuation and Approve
Actuarially Determined Contribution Rates for Fiscal Year 2025-26**

BE IT HEREBY RESOLVED BY THE BOARD OF DIRECTORS FOR THE RETIREMENT PLAN FOR THE SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES WHO ARE MEMBERS OF IBEW LOCAL 1245 AS FOLLOWS:

THAT the IBEW Board of Directors (Retirement Board) hereby accepts the Actuarial Valuation Report as of July 1, 2024 for the Retirement Plan for Regional Transit Employees who are Members of IBEW Local 1245 (Plan), which is attached as Exhibit A.

THAT the Retirement Board hereby approves the new Actuarially Determined Contribution Rates defined in the Actuarial Valuation Report for the Plan, to be effective July 1, 2025:

Classic Members

Employer Contribution Rate	34.51%
Member Contribution Rate	N/A

PEPRA Members

Employer Contribution Rate	26.57%
Member Contribution Rate	7.00%

IBEW Retirement Board of
Sacramento Regional Transit District
2830 G Street
Sacramento, CA 95816

Dear Members of the Board:

At your request, we have conducted an actuarial valuation of the Retirement Plan for Sacramento Regional Transit District Employees (IBEW Plan) (SacRT, the Fund, the Plan) as of July 1, 2024. This report contains information on the Plan's assets and liabilities. This report also discloses employer contribution levels. Your attention is called to the Foreword in which we refer to the general approach employed in the preparation of this report.

The purpose of this report is to present the results of the annual actuarial valuation of the Plan. This report is for the use of the Retirement Board and the auditors in preparing financial reports in accordance with applicable law and accounting requirements.

This report was prepared solely for the Retirement Board for the purposes described herein, and for the use by the plan auditor in completing an audit related to the matters herein. Other users of this report are not intended users as defined in the Actuarial Standards of Practice, and Cheiron assumes no duty or liability to any other user.

This report and its contents have been prepared in accordance with generally recognized and accepted actuarial principles and practices and our understanding of the Code of Professional Conduct and applicable Actuarial Standards of Practice set out by the Actuarial Standards Board as well as applicable laws and regulations. Furthermore, as credentialed actuaries, we meet the Qualification Standards of the American Academy of Actuaries to render the opinion contained in this report. This report does not address any contractual or legal issues. We are not attorneys and our firm does not provide any legal services or advice.

Sincerely,
Cheiron

A handwritten signature in blue ink that reads "Graham Schmidt".

**RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
IBEW PLAN ACTUARIAL VALUATION REPORT AS OF JULY 1, 2024**

FOREWORD

Cheiron has performed the actuarial valuation of the Retirement Plan for Sacramento Regional Transit District Employees (IBEW Plan) as of July 1, 2024. The valuation is organized as follows:

- In Section I, the **Executive Summary**, we describe the purpose of an actuarial valuation, summarize the key results found in this valuation, and disclose important trends.
- In Section II, **Disclosures Related to Risk**, we review the primary risks facing the District, and quantify these using various risk and maturity measures.
- The **Main Body** of the report presents details on the Plan's
 - Section III – Assets
 - Section IV – Liabilities
 - Section V – Contributions
- In the **Appendices**, we conclude our report with detailed information describing plan membership (Appendix A), actuarial assumptions and methods employed in the valuation (Appendix B), a summary of pertinent plan provisions (Appendix C), and a glossary of key actuarial terms (Appendix D).

Future results may differ significantly from the results of the current valuation presented in this report due to such factors as the following: plan experience differing from that anticipated by the assumptions; changes in assumptions; and, changes in plan provisions or applicable law.

In preparing our report, we relied on information (some oral and some written) supplied by the District's staff. This information includes, but is not limited to, plan provisions, employee data, and financial information. We performed an informal examination of the obvious characteristics of the data for reasonableness and consistency in accordance with Actuarial Standard of Practice No. 23.

**RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
IBEW PLAN ACTUARIAL VALUATION REPORT AS OF JULY 1, 2024**

SECTION I – EXECUTIVE SUMMARY

The primary purpose of the actuarial valuation and this report is to measure, describe, and identify the following as of the valuation date:

- The financial condition of the Plan,
- Past and expected trends in the financial progress of the Plan,
- Employer and member contribution rates for Plan Year 2025-2026, and
- An assessment and disclosure of key risks.

Prior to July 1, 2016, a combined valuation report was issued for the Retirement Plans for Sacramento Regional Transit District Employees ATU Local 256 and IBEW Local 1245. As per the Board's direction, beginning with the July 1, 2016 valuation, separate reports are issued for the ATU and IBEW plans.

The information required under GASB Statements (Nos. 67 and 68) is included in a separate report, with the report for the Fiscal Year Ending June 30, 2024 provided to the Board in August 2024.

In the balance of this Executive Summary, we present (A) the basis upon which this year's valuation was completed, (B) the key findings of this valuation including a summary of all key financial results, (C) changes in Plan cost, (D) an examination of the historical trends, and (E) the projected financial outlook for the Plan.

A. Valuation Basis

This valuation determines the employer and PEPRA member contributions for the plan year.

The Plan's funding policy is for the District to contribute an amount equal to the sum of:

- The normal cost under the Entry Age Normal Cost Method, net of any contributions by the members,
- Amortization of the Unfunded Actuarial Liability, and
- The Plan's expected administrative expenses.

This valuation was prepared based on the plan provisions shown in Appendix C. There have been no changes in plan provisions since the prior valuation.

A summary of the assumptions and methods used in the current valuation are shown in Appendix B. There have been no changes in assumptions or methods since the prior valuation.

SECTION I – EXECUTIVE SUMMARY

B. Key Findings of this Valuation

The key results of the July 1, 2024 actuarial valuation are as follows:

- The actuarially determined employer contribution rate decreased from 29.67% of payroll last year to 29.54% of payroll for the current valuation. This year's rate decreased primarily due to greater than expected investment experience and the contributions in excess of the actuarial cost.
- The Plan's funded ratio, the ratio of Actuarial Value of Assets over Actuarial Liability, increased from 74.7% as of July 1, 2023 to 77.6% as of July 1, 2024. As a point of comparison, a funding ratio of 66.5% or more is required just to fund the liabilities of the inactive members: retired, disabled, terminated with vested benefits, and their beneficiaries. This ratio is sometimes referred to as the Inactive Funded Ratio.
- The Unfunded Actuarial Liability (UAL) is the excess of the Plan's Actuarial Liability over the Actuarial Value of Assets. The Plan experienced a decrease in the UAL from \$25,688,698 to \$23,473,305 as of July 1, 2024. This decrease in the UAL was primarily due to contributions exceeding the normal cost plus interest on the UAL.
- During the year ended June 30, 2024, the return on Plan assets was 10.89% on a market value basis net of investment expenses, as compared to the 6.75% assumption. This resulted in a market value gain on investments of \$3,083,785. The Actuarial Value of Assets recognizes 20% of the annual difference between the expected and actual return on the Market Value of Assets (MVA). This method of smoothing the asset gains and losses returned 7.21% on the smoothed value of assets, an actuarial asset gain of \$350,923.
- The Actuarial Value of Assets is currently 98.7% of the market value. Since actuarial assets are below market assets, there are unrecognized investment gains (approximately \$1.1 million) that will be reflected in the smoothed value of assets in future years.
- The Plan experienced a liability gain of \$164,815 primarily due to lower than expected salary increases among active participants. The Plan experienced a \$31,804 gain from expenses being less than expected, and a gain of \$375,181 from contributions being more than the actuarial cost. Combining all sources of actuarial experience, the Plan experienced a total gain of \$922,723.
- There were 16 new hires and rehires since July 1, 2023, and the total active population decreased by one. Total projected payroll increased 0.3% from \$16,535,628 to \$16,577,302 for 2024-2025.
- The impact of PEPRA continued to lower the employer cost. As more PEPRA members are hired, the average normal cost rate declines, because PEPRA members have lower benefits than the non-PEPRA members and they contribute approximately 50% of the

**RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
IBEW PLAN ACTUARIAL VALUATION REPORT AS OF JULY 1, 2024**

SECTION I – EXECUTIVE SUMMARY

PEPRA Normal Cost. As of June 30, 2024, PEPRA members make up over 60% of the active workforce.

Table I-1 summarizes the key results of the valuation with respect to membership, assets and liabilities, and contributions. The results are presented and compared for both the current and prior plan year.

Table I-1					
Summary of Principal Plan Results

SECTION I – EXECUTIVE SUMMARY

C. Changes in Contributions

Table I-2 summarizes the impact of actuarial experience on contributions.

Table I-2 Employer Contribution Reconciliation				
Item	Total	Normal Cost	UAL Amortization	Admin Expense
FYE 2025 Employer Contribution Rate	29.67%	10.39%	17.72%	1.56%
Change due to asset gains	-0.15%	0.00%	-0.15%	0.00%
Change due to PEPRA	-0.31%	-0.31%	0.00%	0.00%
Change due to demographic and liability changes	0.03%	0.11%	-0.08%	0.00%
Change due to amortization payroll	0.48%	0.00%	0.44%	0.04%
Change due to contribution surplus	<u>-0.18%</u>	<u>0.00%</u>	<u>-0.18%</u>	<u>0.00%</u>
Total Change	-0.13%	-0.20%	0.03%	0.04%
FYE 2026 Employer Contribution Rate	29.54%	10.19%	17.75%	1.60%

An analysis of the cost changes from the prior valuation reveals the following:

- Asset experience produced an investment gain on an actuarial basis.

The actuarial return on assets was 7.21%, which is more than the assumed rate of 6.75%. This resulted in a decrease in the contribution rate by 0.15% of payroll.

The Market Value of Assets is more than the actuarial value; there are approximately \$1.1 million in net deferred asset gains.

- Liability experience and changes in demographics (including PEPRA new hires) resulted in a net decrease in the contribution rate.

The employer portion of the normal cost for the new hires under the PEPRA benefit formula is lower than the normal cost for the non-PEPRA membership. The growth in the PEPRA membership resulted in a decrease in the average employer normal cost rate of 0.31% of payroll.

The liability experience of the Plan – including rates of retirement, death, disability, and termination – was very close to what was predicted by the actuarial assumptions in aggregate. The liability experience and other changes in population resulted in a small increase in the contribution rate by 0.03% of payroll.

The net impact on the contribution rate from changes in liabilities and demographics was a decrease of 0.28% of payroll.

**RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
IBEW PLAN ACTUARIAL VALUATION REPORT AS OF JULY 1, 2024**

SECTION I – EXECUTIVE SUMMARY

- Overall payroll growth was less than expected.

The projected payroll grew by 0.3%, considerably less than the assumed rate of 2.75%, which increased the contribution rate by 0.48% of pay, since it results in the Plan's Unfunded Actuarial Liability and administrative expenses being spread over a smaller payroll base than anticipated.

- Contributions were more than the actuarially determined contribution.

Actual contributions were more than the total actuarially determined contribution (including expenses), which resulted in a decrease in the contribution rate by 0.18%.

The total impact on employer Plan contribution from all changes is a decrease of 0.13% of pay.

RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
IBEW PLAN ACTUARIAL VALUATION REPORT AS OF JULY 1, 2024

SECTION I – EXECUTIVE SUMMARY

D. Historical Trends

Despite the fact that for most retirement plans the greatest attention is given to the current valuation results and in particular, the size of the current Unfunded Actuarial Liability and the employer contribution, it is important to remember that each valuation is merely a snapshot in the long-term progress of a pension fund. It is also important to judge a current year's valuation result relative to historical trends, as well as trends expected into the future.

Assets and Liabilities

The chart compares the Market Value of Assets (MVA) and Actuarial Value of Assets (AVA) to the Actuarial Liabilities. The percentage shown at the top of the chart is the ratio of the Actuarial Value of Assets to the Actuarial Liability (the funded ratio). The funded ratio has increased from 72.5% in 2015 to 77.6% in 2024, due to contributions made to the Plan, despite decreases in the assumed rate of return from 7.50% to 6.75% over the same time period. The increase in the funded ratio in 2024 is a result of contributions plus positive actuarial asset experience.

RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
IBEW PLAN ACTUARIAL VALUATION REPORT AS OF JULY 1, 2024

SECTION I – EXECUTIVE SUMMARY

Contribution Trends

In the chart below, we present the Plan's historical actuarially determined contribution rates and the employee contribution rates. After a period of steady and declining rates, employer contribution rates increased in 2019 due to investment losses and larger than anticipated salary increases. The rates continued to increase from 2020 through 2022, primarily as a result of the assumption changes adopted as part of the 2020 experience study, which were phased-in over a three-year period. Since 2022, the rate has declined slightly, as 2023 payroll growth spread the UAL payments over a larger payroll base and the transition of the PEPRA population has reduced normal costs.

PEPRA employees began making contributions during FYE 2016. They have become a larger portion of the population, resulting in an increase in the weighted-average employee contribution rate for the Plan.

RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
IBEW PLAN ACTUARIAL VALUATION REPORT AS OF JULY 1, 2024

SECTION I – EXECUTIVE SUMMARY

E. Future Expected Financial Trends

The analysis of projected financial trends is perhaps the most important component of this valuation. In this section, we present our assessment of the implications of the July 1, 2024 valuation results in terms of contribution levels and benefit security (assets over liabilities) and contribution levels. All the projections in this section are based on the assumption that the Plan will achieve exactly the 6.75% assumption each year, which is clearly an impossibility. We have also assumed future payroll growth of 2.75% per year and that there are no actuarial gains or losses or changes to the assumptions or funding policy.

Projection of Employer Contributions 6.75% return each year

The graph shows that the District’s contribution rate is expected to remain fairly level over the next eight years, declining gradually as the PEPPA membership increases. The employer contribution rate is expected to decline substantially in FYE 2034, once the largest layer of the unfunded liability (the UAL that existed as of June 30, 2019) is fully amortized.

RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
IBEW PLAN ACTUARIAL VALUATION REPORT AS OF JULY 1, 2024

SECTION I – EXECUTIVE SUMMARY

The employer actuarial cost will be approximately \$5.0 million in 2025-2026 and is expected to increase to around \$5.6 million in 2032-2033, then expected to drop significantly between \$2.0 to \$3.0 million in the following years when the bulk of the unfunded liability amortization payment disappears.

The following graph shows the projection of assets and liabilities assuming that assets will earn the 6.75% assumption each year during the projection period and that all other actuarial assumptions are met. The graph shows that the funded status is expected to increase steadily as the existing unfunded liability is fully amortized, assuming the actuarial assumptions are achieved. The Plan is expected to be fully funded in 2034, four years sooner than the projection in the July 1, 2023 valuation. However, it is primarily the actual return on Plan assets that will determine the future funding status and contribution rate to the Plan.

Projection of Assets and Liabilities 6.75% return each year

SECTION II – DISCLOSURES RELATED TO RISK

Actuarial valuations are based on a set of assumptions about future economic and demographic experience. These assumptions represent a reasonable estimate of future experience, but actual future experience will undoubtedly be different and may vary significantly.

Actuarial Standard of Practice (ASOP 51) requires actuaries to identify and assess risks that “may reasonably be anticipated to significantly affect the plan’s future financial condition.” This section of the report is intended to identify the primary risks to the Plan, provide some background information about those risks, and provide an assessment of those risks.

Identification of Risks

The fundamental risk to a pension plan is that the contributions needed to pay the benefits become unaffordable. Even in the case that the Plan remains affordable, the contributions needed to support the Plan may differ significantly from expectations. While there are a number of factors that could lead to contribution amounts deviating from expectations, we believe the primary risks are:

- Investment risk,
- Assumption change risk,
- Longevity and other demographic risk, and
- Contribution risk.

Other risks that we have not identified may also turn out to be important.

Investment Risk is the potential for investment returns to be different than expected. Lower investment returns than anticipated will increase the Unfunded Actuarial Liability necessitating higher contributions in the future unless there are other gains that offset these investment losses. The potential volatility of future investment returns is determined by the Plan’s asset allocation and the affordability of the investment risk is determined by the amount of assets invested relative to the size of the plan sponsor or other contribution base.

Assumption change risk is the potential for the environment to change such that future valuation assumptions are different than the current assumptions. For example, declines in interest rates over the last three decades (which have recently reversed) resulted in higher investment returns for fixed-income investments, but lower expected future returns necessitating either a change in investment policy, a reduction in discount rate, or some combination of the two. Assumption change risk is an extension of the other risks identified, but rather than capturing the risk as it is experienced, it captures the cost of recognizing a change in environment when the current assumption is no longer reasonable.

Longevity and other demographic risks are the potential for mortality or other demographic experience to be different than expected. Generally, longevity and other demographic risks emerge slowly over time and are often dwarfed by other changes, particularly those due to investment returns.

SECTION II – DISCLOSURES RELATED TO RISK

Contribution risk is the potential for actual future contributions to deviate from expected future contributions. There are different sources of contribution risk ranging from the sponsor choosing to not make contributions in accordance with the funding policy to material changes in the contribution base (e.g., covered employees, covered payroll, sponsor revenue) that affect the amount of contributions the Plan can collect.

The chart below shows the primary components contributing to the Unfunded Actuarial Liability (UAL) from June 30, 2014 through June 30, 2024. Over the last 10 years, the UAL has increased by approximately \$5.0 million. The assumption changes (purple bar) resulting in a total UAL increase of \$10.3 million is the largest source of UAL growth. The contributions have been above the “tread water” level (described later in this section, shown in the red bar), resulting in a decrease of \$6.2 million in the UAL. Net asset gains (\$0.2 million, yellow bar), liability losses (\$1.6 million, gray bar), and method changes (\$0.6 million, teal bar) have had little net impact over the past 10 years.

Chart II-1

**RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
IBEW PLAN ACTUARIAL VALUATION REPORT AS OF JULY 1, 2024**

SECTION II – DISCLOSURES RELATED TO RISK

Each year the UAL is expected to increase for benefits earned in the current year (the normal cost), administrative expenses, and interest on the UAL. This expected increase is referred to as the tread water level. If contributions are greater than the tread water level, the UAL is expected to decrease. Conversely, if contributions are less than the tread water level, the UAL is expected to increase. The amortization policy (as well as the contribution-timing lag) can impact whether or not the contributions exceed the tread water level. Contributions above the “tread-water” level (red bar) have decreased the UAL by \$6.2 million.

Chart II-2 below details the annual sources of the UAL change (colored bars) for each valuation year. The net UAL change for each year is represented by the blue diamonds.

The impact of all assumption changes is represented by the purple bars. In 2015 and 2020, there were experience studies performed, which resulted in significant increases in liabilities, primarily due to changes in the salary merit scale, administrative expense assumption, and reductions in the discount rate. The discount rate was also reduced in 2017.

On the liability side (gray bars), the Plan has experienced offsetting gains and losses, increasing the UAL by approximately \$1.6 million over the 10-year period resulting from participants retiring, terminating, becoming disabled and dying at rates different from the actuarial assumptions as well as unexpected changes in salaries. Most of this type of activity is normal in the course of Plan experience. The Plan will experience actuarial gains and losses over time because we cannot predict exactly how people will behave. When a plan experiences alternating gains and losses that are small compared to the total actuarial liability, the Plan’s actuarial assumptions are reasonable.

**RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
IBEW PLAN ACTUARIAL VALUATION REPORT AS OF JULY 1, 2024**

SECTION II – DISCLOSURES RELATED TO RISK

The method change that decreased the UAL by \$0.6 million is a result of the reallocation of assets between ATU and IBEW in 2016, when the plans began reporting on a separate basis.

While the net investment gains and losses have not been the largest driver of UAL changes over the past 10 years, the year-to-year investment volatility can have a large impact on the UAL and is unpredictable. For example, the actuarial investment loss in 2020 was \$1.4 million compared to the \$1.8 million actuarial gain in 2021.

Table II-1 below shows the same information as Chart II-2, but the annual source of the UAL change is shown numerically.

<p align="center">Table II-1 Unfunded Actuarial Liability (UAL) Change by Source</p>						
Valuation Year	Assumption Changes	Method Changes	Contributions	Investment Experience	Liability Experience	Total UAL Change
2015	2,070,326	0	(1,882,740)	(1,162,852)	(294,785)	(1,270,052)
2016	0	(604,762)	(75,499)	157,348	739,723	216,810
2017	1,628,239	0	(376,790)	(560,888)	(787,472)	(96,911)

SECTION II – DISCLOSURES RELATED TO RISK

Plan Maturity Measures

The future financial condition of a mature pension plan is more sensitive to each of the risks identified above than a less mature plan. Before assessing each of these risks, it is important to understand the maturity of the plan compared to other plans and how the maturity has changed over time.

Plan maturity can be measured in a variety of ways, but they all get at one basic dynamic – the larger the plan is compared to the contribution or revenue base that supports it; the more sensitive the plan will be to risk. The measures on the next page have been selected as the most important in understanding the primary risks identified for the plan.

Inactives per Active (Support Ratio)

One simple measure of plan maturity is the ratio of the number of inactive members (those receiving benefits or inactives – those entitled to a deferred benefit) to the number of active members. The Support Ratio is expected to increase gradually as a plan matures. The chart below shows the Support Ratio has gradually grown from 0.84 in 2015 to 1.15 in 2024 as the number of retired members increased at a faster rate than the number of active members.

Leverage Ratios

Leverage or volatility ratios measure the size of the plan compared to its revenue base more directly. The asset leverage ratio is simply the market value of assets to active member payroll and indicates the sensitivity of the Plan to investment returns. The liability leverage ratio is the Plan's Actuarial Liability to active member payroll and indicates the sensitivity of the Plan to assumption changes or demographic experience.

The Plan assets are currently about five times covered payroll. As the Plan becomes better funded, the asset leverage ratio will increase, and if it was 100% funded, the asset leverage ratio

**RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
IBEW PLAN ACTUARIAL VALUATION REPORT AS OF JULY 1, 2024**

SECTION II – DISCLOSURES RELATED TO RISK

would be over six and equal the Actuarial Liability (AL) leverage ratio. Although both of these ratios are lower than those of many other public plans, the increase in the asset leverage ratio expected to accompany an improvement in the Plan's funding still represents a substantial increase in the volatility of the contributions.

An asset leverage ratio of 5.0 means that if the Plan's assets lose 10% of their value (a 16.75% actuarial loss compared to the expected return of 6.75%), the loss is about 83% of payroll ($5.0 \times 16.75\%$). Based on the current amortization policy, the contribution rate would ultimately increase by approximately 6.0% of payroll if asset smoothing were not applied and the loss were amortized over 20 years. The same investment loss if the Plan were 100% funded would be around 106% of payroll and an ultimate contribution rate increase of about 7.7% of payroll, if amortized over 20 years.

The chart below shows the historical leverage ratios of the Plan. Both leverage ratios have increased since 2015.

SECTION II – DISCLOSURES RELATED TO RISK

Assessing Costs and Risks

Sensitivity to Investment Returns

The chart below compares the Market Value of Assets (line) to the Actuarial Liabilities (bars) discounted at the current expected rate of return (6.75%) and at discount rates 100 basis points above and below the expected rate of return. In addition, we have added an additional measurement, the Low Default Risk Obligation Measure (LDROM), which is the Actuarial Liability using a discount rate derived from low-default-risk fixed income securities that approximately match the benefit payments of the plan.

Actuarial Liability versus Assets

If investments return 6.75% annually, the Plan would need approximately \$105 million in assets today to pay the benefits associated with service earned to date, compared to current Market Value of Assets of \$83 million. If investment returns are only 5.75%, the Plan would need approximately \$116 million in assets today, and if investment returns are 7.75%, the Plan would need approximately \$95 million in assets today.

IBEW invests in a diversified portfolio to achieve the best possible returns at an acceptable level of risk. IBEW's average geometric return over the last 10 years is 6.3%. Please refer to Table III-5 (page 25) for the asset returns by year since 2010.

The low-risk portfolio for a pension plan would be composed entirely of low-default-risk fixed income securities whose cash flows approximately match the benefit cash flows of the plan. However, such a portfolio would have a lower expected rate of return (5.35% as of June 30,

**RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
IBEW PLAN ACTUARIAL VALUATION REPORT AS OF JULY 1, 2024**

SECTION II – DISCLOSURES RELATED TO RISK

2024¹) than the diversified portfolio (6.75%). The LDROM represents what the present value of future benefits would be if IBEW's assets were invested in such a portfolio. As of June 30, 2024, the LDROM is \$121 million compared to the Actuarial Liability of \$105 million for IBEW. The \$16 million difference can be viewed as the expected savings from taking on the investment risk of the diversified portfolio. Alternatively, it can be viewed as the potential cost of minimizing the investment risk.

If IBEW were to invest in the LDROM portfolio and not a diversified portfolio, the funded status would be lower, and the expected contribution requirements would increase. The security of IBEW's pension benefits relies on current assets, future investment earnings, and the ability and willingness of the employer to make future contributions. If IBEW were to invest in the LDROM portfolio, it would not change current assets, but it could potentially reduce future investment earnings, potentially changing the level of reliance on future employer contributions. However, investing in an LDROM portfolio would generate more predictable future investment earnings and future contributions.

¹ Assumes a 5.35% discount rate, which is based on the June 30, 2024 FTSE Pension Liability Index and all other assumptions and methods as used to calculate the Actuarial Liability.

RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
IBEW PLAN ACTUARIAL VALUATION REPORT AS OF JULY 1, 2024

SECTION II – DISCLOSURES RELATED TO RISK

Stochastic Projections

Stochastic projections serve to show the range of probable outcomes of various measurements. The chart below and on the following page show the projected range of the employer contribution rate and of the funded ratio on an Actuarial Value of Assets basis. The range in both scenarios is driven by the volatility of investment returns (assumed to be based on a 12.4% standard deviation of annual returns, as provided by the Plan's investment consultant and described in the 2020 Experience Study Report). The stochastic projections of investment returns are based on an assumption that each future year's investment return is independent from all other years and is identically distributed according to a lognormal distribution. This assumption may result in an unrealistically wide range of compound investment returns over longer periods.

Stochastic Projection of Employer Contributions as a Percent of Pay

The stochastic projection of employer contributions, shown here as of the valuation date and payable the following fiscal year, shows the probable range of future contribution rates as a percentage of pay. The baseline contribution rate (black line), which is based on the median of the simulations using an average return of 6.75%, aligns closely with the projections discussed in subsection D of the Executive Summary of this report. In the most pessimistic scenario shown, the 95th percentile, the projected employer contribution rate is above 40% of pay for the 2031 valuation (FYE 2033). Conversely, the most optimistic scenario shown, the 5th percentile, the projected employer contribution falls below 10% starting with the 2030 valuation (FYE 2032). We note that these projections set the employer contribution to not fall below the normal cost unless the funded ratio exceeds 120%, as required under PEPRA.

RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
IBEW PLAN ACTUARIAL VALUATION REPORT AS OF JULY 1, 2024

SECTION II – DISCLOSURES RELATED TO RISK

Stochastic Projection of Funded Ratio on an Actuarial Value of Assets Basis

The graph above shows the projection of the funded ratio based on the Actuarial Value of Assets. It is based on the Plan's layered amortization policy, where the UAL as of July 1, 2019 is paid off over the next eight years, and all future gains or losses are amortized over new closed 20-year periods. While the baseline-funded ratio (black line) is projected to be nearly 100% at the end of the period shown here, there is a wide range of potential outcomes. Good investment returns have the likelihood of bringing the funded ratio well over 100%.

Under the current funding policy of the Plan, even in scenarios with unfavorable investment returns the Plan is projected to remain above approximately 60% funded on an actuarial value of assets basis, as long as the actuarially determined contributions continue to be made.

SECTION II – DISCLOSURES RELATED TO RISK

Contribution Risk

While investment returns are typically the dominant factor in volatility, contribution rates can also be sensitive to future salary increases and the hiring of new members. When member payroll growth stagnates or even declines, the dollar level of contributions made to the Plan also stagnates or declines since contributions are based on payroll levels, though this will generally only present a funding issue if there is an extended period of payroll reductions.

There is also a risk of the contribution rate increasing even higher when payroll decreases since the Plan's funding policy amortizes the UAL as a level percentage of pay. This means that the UAL payments increase at the assumed payroll growth rate of 2.75%, so that the payment is expected to remain constant as a percentage of payroll. If payroll growth is less than the expected 2.75% or there is a decline in payroll (as was the case this year), the UAL payments are spread over a smaller payroll base and the contribution rate as a percentage of pay increases, making the Plan less affordable for those sponsors with declining payroll bases.

For example, the UAL Amortization rate as of June 30, 2024 for the FYE 2026 is 17.75%. If the projected payroll for FYE 2026 were 2.75% lower, all else being equal, the UAL Amortization rate would increase to 18.26%.

More Detailed Assessment

While a more detailed assessment is always valuable to enhance the understanding of the risks identified above, we believe the scenarios illustrated above cover the primary risks facing the Plan at this time. We would be happy to provide the Board with a more in-depth analysis at their request.

**RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
IBEW PLAN ACTUARIAL VALUATION REPORT AS OF JULY 1, 2024**

SECTION III – ASSETS

Pension Plan assets play a key role in the financial operation of the Plan and in the decisions the Board may make with respect to future deployment of those assets. The level of assets, the allocation of assets among asset classes, and the methodology used to measure assets will likely impact benefit levels, employer contributions, and the ultimate security of participants' benefits.

In this section, we present detailed information on Plan assets including:

- **Disclosure** of Plan assets as of June 30, 2023 and June 30, 2024
- Statement of the **changes** in market values during the year
- Development of the **Actuarial Value of Assets**

Disclosure

There are two types of asset values disclosed in the valuation, the Market Value of Assets and the Actuarial Value of Assets. The market value represents “snapshot” or “cash out” values, which provide the principal basis for measuring financial performance from one year to the next. Market values, however, can fluctuate widely with corresponding swings in the marketplace. As a result, market values are usually not as suitable for long-range planning as are the Actuarial Value of Assets, which reflect smoothing of annual investment returns.

Table III-1 discloses and compares each component of the market asset value as of June 30, 2023 and June 30, 2024.

Table III-1 Statement of Assets at Market Value June 30,			
Investments	2023		2024

SECTION III – ASSETS

Changes in Market Value

The components of asset change are:

- Contributions (employer and employee)
- Benefit payments
- Expenses (investment and administrative)
- Investment income (realized and unrealized)

Table III-2 shows the components of a change in the Market Value of Assets during 2023 and 2024.

Table III-2 Changes in Market Values		
	<u>2023</u>	<u>2024</u>
Contributions		
Employer's Contribution	\$ 4,495,272	\$ 5,263,040
Members' Contributions	585,325	685,610
Total Contributions	\$ 5,080,597	\$ 5,948,650

**RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
IBEW PLAN ACTUARIAL VALUATION REPORT AS OF JULY 1, 2024**

SECTION III – ASSETS

Actuarial Value of Assets (AVA)

The Actuarial Value of Assets represents a “smoothed” value developed by the actuary to reduce the volatile results that could develop due to short-term fluctuations in the Market Value of Assets. For this Plan, the Actuarial Value of Assets is calculated on a modified market-related value. The Market Value of Assets is adjusted to recognize, over a five-year period, investment earnings which are greater than (or less than) the assumed investment return.

Table III-3 Development of Actuarial Value of Assets as of July 1, 2024							
Year	(a) Total Contributions	(b) Total Disbursements	(c) Expected Return	(d) Actual Return	(e) = (d) – (c) Additional Earnings	(f) Not Recognized	(g) = (e) x (f) Unrecognized Earnings
2019-2020	3,535,472	(4,388,114)	4,330,443	1,082,659	(3,247,784)	0%	0
2020-2021	3,921,089	(4,844,065)	4,044,949	16,461,248	12,416,299	20%	2,483,260
2021-2022	4,652,192	(5,316,332)	5,102,376	(5,444,825)	(10,547,201)	40%	(4,218,880)
2022-2023	5,080,597	(5,694,163)	4,691,699	5,265,205	573,506	60%	344,104
2023-2024	5,948,650	(5,930,446)	5,026,659	8,110,444	3,083,785	80%	2,467,028
1. Total Unrecognized Dollars							1,075,512
2. Market Value of Assets as of June 30, 2024							82,588,719
3. Actuarial Value of Assets as of June 30, 2024: [(2) - (1)]							81,513,207
4. Ratio of Actuarial Value to Market Value [(3) ÷ (2)]							98.70%

**RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
IBEW PLAN ACTUARIAL VALUATION REPORT AS OF JULY 1, 2024**

SECTION III – ASSETS

Investment Performance

The following table calculates the investment related gain/loss for the Plan year on both a market value and an actuarial value basis. The market value gain/loss is an appropriate measure for comparing the actual asset performance to the previous valuation's long-term 6.75% assumption.

Table III-4 Asset Gain/(Loss)		
	Market Value	Actuarial Value
July 1, 2023 value	\$ 74,460,071	\$ 76,012,624
Employer Contributions	5,263,040	5,263,040
Employee Contributions	685,610	685,610
Benefit Payments and Expenses	(5,930,446)	(5,930,446)
Expected Investment Earnings (6.75%)	5,026,659	5,131,456

SECTION III – ASSETS

The table below shows the historical annual asset returns on a market value and actuarial value basis.

Table III-5 Historical Return on Assets		
Year Ended June 30	Market Value Return	Actuarial Value Return
2011	19.91%	4.95%
2012	1.99%	3.32%
2013	13.92%	6.91%
2014	15.12%	12.90%
2015	2.73%	10.44%
2016	-0.66%	6.26%
2017	10.92%	8.60%
2018	6.75%	6.48%
2019	6.12%	5.06%
2020	1.81%	4.93%
2021	27.47%	9.62%
2022	-7.20%	6.84%
2023	7.58%	6.12%
2024	10.89%	7.21%

**RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
IBEW PLAN ACTUARIAL VALUATION REPORT AS OF JULY 1, 2024**

SECTION IV – LIABILITIES

In this section, we present detailed information on Plan liabilities including:

- **Disclosure** of Plan liabilities on July 1, 2023 and July 1, 2024
- Statement of **changes** in these liabilities during the year

Disclosure

Several types of liabilities are calculated and presented in this report. Each type is distinguished by the people ultimately using the figures and the purpose for which they are using them. Note that these liabilities are not applicable for settlement purposes, including the purchase of annuities and the payment of lump sums.

- **Present Value of Future Benefits:** Used for measuring all future Plan obligations, represents the amount of money needed today to fully fund all benefits of the Plan both earned as of the valuation date and those to be earned in the future by current plan participants, under the current Plan provisions.
- **Actuarial Liability:** Used for funding calculations, the normal cost rate is equal to the total projected value of benefits at entry age, divided by present value of future salary at entry age. The dollar amount of the normal cost equal to the normal cost rate multiplied by each member's projected pay. The Actuarial Liability is the portion of the present value of future benefits not covered by future expected normal costs. This method is called **Entry Age to Final Decrement (EAFD)**.
- **Unfunded Actuarial Liability:** The excess of the Actuarial Liability over the Actuarial Value of Assets.

Table IV-1 discloses each of these liabilities for the current and prior valuations.

Table IV-1			
Liabilities/Net (Surplus)/Unfunded		July 1, 2023	July 1, 2024
<u>Present Value of Future Benefits</u>			
Active Participant Benefits	\$	54,640,703	\$ 54,204,636
Retiree and Inactive Benefits		66,154,162	69,844,936
Present Value of Future Benefits (PVB)	\$	120,794,865	\$ 124,049,572
<u>Actuarial Liability</u>			
Present Value of Future Benefits (PVB)	\$	120,794,865	\$ 124,049,572
Present Value of Future Normal Costs (PVFNC)		19,093,543	19,063,060
Actuarial Liability (AL = PVB – PVFNC)	\$	101,701,322	\$ 104,986,512
Actuarial Value of Assets (AVA)		76,012,624	81,513,207
Net (Surplus)/Unfunded (AL – AVA)	\$	25,688,698	\$ 23,473,305

**RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
IBEW PLAN ACTUARIAL VALUATION REPORT AS OF JULY 1, 2024**

SECTION IV – LIABILITIES

Changes in Liabilities

Each of the Liabilities disclosed in the prior table are expected to change at each valuation. The components of that change, depending upon which liability is analyzed, can include:

- New hires since the last valuation
- Benefits accrued since the last valuation
- Plan amendments increasing benefits
- Passage of time which adds interest to the prior liability
- Benefits paid to retirees since the last valuation
- Participants retiring, terminating, or dying at rates different than expected
- A change in actuarial or investment assumptions
- A change in the actuarial funding method or software
- Transfers of liabilities from one plan to another

Unfunded liabilities will change because of all of the above, and also due to changes in Plan assets resulting from:

- Employer contributions different than expected
- Investment earnings different than expected
- A change in the method used to measure plan assets
- Transfer of assets from one plan to another

Table IV-2		
Changes in Actuarial Liability		
Actuarial Liability at July 1, 2023	\$	101,701,322
Actuarial Liability at July 1, 2024	\$	104,986,512
Liability Increase (Decrease)		3,285,190
Change due to:		
Actuarial Methods / Software Changes	\$	0
Plan Changes		0
Assumption Changes		0
Accrual of Benefits		2,397,666
Actual Benefit Payments		(5,702,774)
Interest		6,755,113
Actuarial (Gain)/Loss		(164,815)

SECTION IV – LIABILITIES

Table IV-3 Development of Actuarial Gain / (Loss)		
1. Unfunded Actuarial Liability at Start of Year (not less than zero)	\$	25,688,698
2. Employer Normal Cost at Middle of Year		2,397,666
3. Interest on 1. and 2. to End of Year		1,813,587
4. Expected Contributions, Admin Expenses and Transfers in Prior Year		5,327,070
5. Interest on 4. to End of Year		176,853
6. Change in Unfunded Actuarial Liability Due to Changes in Actuarial Methods		0
7. Change in Unfunded Actuarial Liability Due to Changes in Assumptions		0
8. Change in Unfunded Actuarial Liability Due to Changes in Plan Design		0
9. Expected Unfunded Actuarial Liability at End of Year [1. + 2. + 3. – 4. – 5. + 6. + 7. + 8.]	\$	24,396,028
10. Actual Unfunded Actuarial Liability at End of Year (not less than zero)		23,473,305
11. Actuarial Gain / (Loss) [9. – 10.]	\$	922,723
Actuarial Gain / (Loss) From Liabilities less than expected		164,815
Actuarial Gain / (Loss) From Actuarial Asset returns more than expected		350,923
Actuarial Gain / (Loss) From Expenses less than expected		31,804
Actuarial Gain / (Loss) From Contributions more than Actuarial Cost		375,181

**RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
IBEW PLAN ACTUARIAL VALUATION REPORT AS OF JULY 1, 2024**

SECTION V – CONTRIBUTIONS

In the process of evaluating the financial condition of any pension plan, the actuary analyzes the assets and liabilities to determine what level (if any) of contributions is needed to properly maintain the funding status of the Plan. Typically, the actuarial process will use a funding technique that will result in a pattern of contributions that are both stable and predictable.

For this Plan, the actuarial funding method used to determine the normal cost and the Unfunded Actuarial Liability is the **Entry Age to Final Decrement (EAFD)** cost method.

The normal cost rate for each member is determined with the normal cost percentage equal to the total projected value of benefits at entry age, divided by present value of future salary at entry age. Normal cost contributions are assumed to be made throughout the year, or on average mid-year.

The Unfunded Actuarial Liability is the difference between the EAFD Actuarial Liability and the Actuarial Value of Assets. The UAL rate is based on an eight year level percentage of payroll amortization of the remainder of the Unfunded Actuarial Liability as of July 1, 2019, again assuming mid-year payment to reflect the fact that employer contributions are made throughout the year. Effective July 1, 2020, unexpected changes in the UAL are amortized over new closed 20-year schedules, known as layered amortization. The payment for the UAL layer associated with the assumption changes adopted as part of the July 1, 2020 actuarial valuation was phased-in over a three-year period.

Beginning with the July 1, 2013 actuarial valuation, an amount equal to the expected administrative expenses for the Plan is added directly to the actuarial cost calculation. Previously, this cost was implicitly included in the calculation of the normal cost and unfunded liability payment, based on the use of a discount rate that was net of anticipated administrative expenses.

IBEW members who were hired on or after January 1, 2015 contributed between 1.5% and 4.5% of Compensation to the Plan through April 1, 2018 and then began contributing half of the PEPPA normal cost of the Plan rounded to the nearest 0.25%. Once established, the contribution rate for new members will be adjusted to reflect a change in the normal cost rate, but only if the normal cost rate changes by more than 1% of payroll. For the Fiscal Year 2023-2024, the contribution rate for PEPPA members was 7.00% of payroll (1/2 of 13.96%, rounded to the nearest quarter). The normal cost rate for PEPPA members as of July 1, 2024 valuation is 14.22%, and since the increase is less than 1%, the rate for the following fiscal year remains at 7.00%. Table V-3 contains the details of this calculation.

The tables on the following pages present the employer contributions for the Plan for the current and prior valuations as well as details on the amortization of the UAL.

APPENDIX B – STATEMENT OF ACTUARIAL ASSUMPTIONS AND METHODS

The assumptions and methods used in the actuarial valuation reflect the results of an experience study performed by Cheiron covering the period from July 1, 2015 through June 30, 2020 presented to the Board at their May 5th, 2021 meeting. More details on the rationale for the demographic and economic assumptions can be found in the experience study report presented at that meeting and subsequently adopted by the Board at their May 10th meeting. The combined effect of the assumptions is expected to have no significant bias for the purpose of this measurement.

A. Contribution Allocation Procedure

The contribution allocation procedure primarily consists of an actuarial cost method, an asset valuation method, and an amortization method as described below. This contribution allocation procedure, combined with reasonable assumptions, produces a Reasonable Actuarially Determined Contribution as defined in Actuarial Standard of Practice No. 4. The contribution allocation procedure was selected to balance benefit security, intergenerational equity, and the stability of actuarially determined contributions. The selection also considered the demographics of plan members, the funding goals and objectives of the Board, and the need to accumulate assets to make benefit payments when due. There were no changes to the contribution allocation procedures from the prior valuation.

1. Actuarial Cost Method

The Entry Age Normal actuarial funding method was used for active employees, whereby the normal cost is computed as the level annual percentage of pay required to fund the retirement benefits between each Member's date of hire and assumed retirement. The Actuarial Liability is the difference between the Present Value of Future Benefits and the Present Value of Future Normal Cost. The Unfunded Actuarial Liability (UAL) is the difference between the Actuarial Liability and the Actuarial Value of Assets.

2. Amortization Method

The UAL is amortized as a percentage of projected payroll.

- The amortization period as of July 1, 2024 is eight years for the UAL determined as of July 1, 2019 with 20-year layered amortization for UAL changes after 2019.
- Effective July 1, 2020, unexpected changes in the UAL are amortized over new closed 20-year amortization layers.
- The payment for the UAL layer associated with the assumption changes adopted as part of the July 1, 2020 actuarial valuation was phased-in over a three-year period.

APPENDIX B – STATEMENT OF ACTUARIAL ASSUMPTIONS AND METHODS

3. Actuarial Value of Plan Assets

The actuarial value of Plan assets is calculated on a modified market-related value. The Market Value of Assets is adjusted to recognize, over a five-year period, investment earnings which are greater than (or less than) the assumed investment return on the Market Value of Assets.

B. Modeling

Cheiron utilizes ProVal actuarial valuation software leased from Winklevoss Technologies (WinTech) to calculate liabilities and project benefit payments. We have relied on WinTech as the developer of ProVal. We have a basic understanding of ProVal and have used ProVal in accordance with its original intended purpose. We have not identified any material inconsistencies in assumptions or output of ProVal that would affect this valuation.

Deterministic and stochastic projections in this valuation report were developed using R-scan, a proprietary tool used to illustrate the impact of changes in assumptions, methods, plan provisions, or actual experience (particularly investment experience) on the future financial status of the Plan. R-scan uses standard roll-forward techniques that implicitly assume a stable active population. Because R-scan does not automatically capture how changes in one variable affect all other variables, some scenarios may not be consistent. We have relied on Cheiron colleagues who developed the tool, and we have used the tool in accordance with its purpose.

APPENDIX B – STATEMENT OF ACTUARIAL ASSUMPTIONS AND METHODS

C. Actuarial Assumptions

The actuarial assumptions were developed based on an experience study covering the period from July 1, 2015 through June 30, 2020.

1. Rate of Return

The annual rate of return on all Plan assets is assumed to be 6.75% for the current valuation net of investment, but not administrative, expenses.

2. Low-Default-Risk Obligation Measure Discount Rate (effective June 30, 2023)

The discount rate used to calculate the Low-Default-Risk Obligation Measure (LDROM) is the FTSE Pension Liability Index as of the valuation date. This index was selected because it reflects the types of fixed-income securities the Plan would likely invest in if the Trustees wanted to match cash flows. The rate for this valuation is 5.35%.

3. Cost of Living

The cost of living as measured by the Consumer Price Index (CPI) is assumed to increase at the rate of 2.50% per year.

4. Increases in Pensionable Payroll / Amortization Payments

Overall pensionable compensation (used in the calculation of amortization payments) is expected to grow by 2.75% per year. The PEPRA Compensation Limit is assumed to increase by 2.50% per year (in line with the increase in the CPI).

5. Plan Expenses

Administrative expenses are assumed to be \$264,915 for Fiscal Year 2024-25 and are added directly to the actuarial cost calculation. The expenses are assumed to increase with CPI in future years.

6. Increases in Pay

Assumed pay increases for active Participants consist of increases due to wage inflation and those due to longevity and promotion.

Based on an analysis of pay levels and service for the IBEW Plan Participants, we assume that pay increases due to longevity and promotion will occur in accordance with the following table:

**RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
IBEW PLAN ACTUARIAL VALUATION REPORT AS OF JULY 1, 2024**

APPENDIX B – STATEMENT OF ACTUARIAL ASSUMPTIONS AND METHODS

Salary Increases			
Service	Base	Longevity & Promotion	Total (Compound)
0	2.75%	13.00%	16.11%
1	2.75%	11.00%	14.05%
2	2.75%	5.00%	7.89%
3	2.75%	2.50%	5.32%
4-6	2.75%	1.50%	4.29%
7+	2.75%	0.75%	3.52%

7. Family Composition

85% of participants are assumed to be married. Males are assumed to be three years older than their spouses, and females are assumed to be three years younger than their spouses. This assumption is applied to active members, as well as retired members with a joint and survivor benefit where the data is missing the beneficiary date of birth.

8. Terminal Payments

Retirement benefits are assumed to be increased by 7% due to the application of payments for unused vacation and sick leave to Average Final Monthly Earnings.

No liability adjustment for retirement is used for members who joined the plan on or after January 1, 2015.

9. Missed Pay Periods

A 2.62% load is applied to the normal cost for IBEW PEPRA members to adjust for the missed pay periods in which service is credited yet no contributions are made by the member.

10. Employment Status

No Plan Participants are assumed to transfer between the IBEW Plan and the Salaried Plan.

**RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
IBEW PLAN ACTUARIAL VALUATION REPORT AS OF JULY 1, 2024**

APPENDIX B – STATEMENT OF ACTUARIAL ASSUMPTIONS AND METHODS

11. Rates of Termination

Rates of termination for all Participants from causes other than death, disability, and service retirement are based on the Participant's age, service, and sex.

Representative rates are shown in the following table:

Termination Rates ¹	
Years of Service	Rate
0-4	8.00%
5-9	5.00%
10-14	3.00%
15-19	2.00%
20+	0.50%

¹ No terminations are assumed after eligibility for normal retirement or after 25 years of service for non-PEPRA members. PEPRA members terminating with at least five years of service are expected to receive a deferred annuity benefit; those terminating with less than five years of service are expected to receive a refund of contributions (with interest).

12. Rates of Disability

Rates of disability are based on the age and sex of the Participant. Representative rates are as follows:

Rates of Disability		
Age	Male	Female
22	0.15%	0.00%
27	0.20%	0.15%
32	0.25%	0.20%
37	0.30%	0.28%
42	0.35%	0.43%
47	0.40%	0.67%
52	0.45%	1.18%
57	0.50%	2.04%
62	0.55%	2.87%

**RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
IBEW PLAN ACTUARIAL VALUATION REPORT AS OF JULY 1, 2024**

APPENDIX B – STATEMENT OF ACTUARIAL ASSUMPTIONS AND METHODS

13. Rates of Mortality for Active Healthy Lives

Pri-2012 Blue Collar Healthy Employee Headcount-weighted mortality rates for male ATU and IBEW members, and the Cheiron ATU Employee mortality rates adjusted by 105% for female ATU and IBEW members, with generational improvements using MP-2021 from the base year of the tables (2012 and 2016, respectively).

Age	Male	Female
25	0.000709	0.000348
30	0.000755	0.000399
35	0.000858	0.000539
40	0.000970	0.000759
45	0.001177	0.001058
50	0.001712	0.001590
55	0.002789	0.002506
60	0.004543	0.003827
65	0.006927	0.005505

Rates shown are base rates, prior to generational improvements.

14. Rates of Mortality for Disabled Retirees

Cheiron ATU Disabled Annuitant mortality for ATU and IBEW members, with no adjustment, with generational improvements using Scale MP-2020 from 2016.

Age	Male	Female
25	0.009707	0.001858
30	0.009632	0.003098
35	0.011224	0.004766
40	0.012844	0.006769
45	0.018315	0.009686
50	0.021187	0.014759
55	0.024130	0.018518
60	0.027997	0.020617
65	0.033476	0.022110
70	0.041983	0.027203
75	0.057023	0.038567

Rates shown are base rates, prior to generational improvements.

**RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
IBEW PLAN ACTUARIAL VALUATION REPORT AS OF JULY 1, 2024**

APPENDIX B – STATEMENT OF ACTUARIAL ASSUMPTIONS AND METHODS

15. Retired Member and Beneficiary Mortality

Cheiron ATU Healthy Annuitant mortality for ATU and IBEW members, adjusted by 95% for males and 105% for females, with generational improvements using Scale MP-2020 from 2016.

Age	Male	Female
55	0.008528	0.005455
60	0.010669	0.007998
65	0.012434	0.011577
70	0.018838	0.017144
75	0.031080	0.027626
80	0.053155	0.046543
85	0.091646	0.080753

Rates shown are base rates, prior to generational improvements.

16. Rates of Retirement

Rates of service retirement among all Participants eligible to retire are given by the following table:

Rates of Retirement ¹				
Age	Years of Service			
	5-9	10-24	25-29	30+
Under 55	0.00%	0.00%	2.00%	2.00%
55-59	2.30%	2.30%	2.30%	10.00%
60-64	4.00%	11.70%	11.70%	20.00%
65	4.00%	32.00%	32.00%	32.00%
66-69	4.00%	25.00%	25.00%	32.00%
70+	100.00%	100.00%	100.00%	100.00%

¹ PEPRAs members are assumed to begin retiring at age 52, with at least five years of service.

17. Changes Since Last Valuation

No assumptions have been changed since the previous valuation.

**RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
IBEW PLAN ACTUARIAL VALUATION REPORT AS OF JULY 1, 2024**

APPENDIX C – SUMMARY OF PLAN PROVISIONS

1. Definitions

Average Final
Monthly
Earnings:

A Participant's Average Final Monthly Earnings is the highest average consecutive 48 months' compensation paid. Payments for accumulated vacation or sick leave not actually taken prior to retirement are included in computing Average Final Monthly Earnings if last 48 months of compensation are used in the calculation.

Compensation:

A Participant's Compensation is the earnings paid in cash to the participant during the applicable period of employment with the District.

PEPRA member's Compensation is computed using base salary, without overtime or other special compensation such as terminal payments. Pensionable compensation for PEPRA members is limited to the PEPRA Compensation Limit (for 2025, \$155,081 for those participating in Social Security; increased by the CPI-U in subsequent years).

Service:

Service is computed from the date in which the Participant becomes a full or part-time employee and remains in continuous employment to the date employment ceases.

For IBEW members, service includes time with the District or predecessor companies immediately prior to September 16, 1974 and subsequent to hire. Service is measured in completed quarters.

2. Participation

Eligibility:

Any person employed by the District who is a member IBEW Local 1245 is eligible to participate in the Plan.

Any member joining the Plan for the first time on or after January 1, 2015 is a New Member and will follow PEPRA provisions. Employees who transfer from and are eligible for reciprocity with another public employer will not be New Members if the service in the reciprocal system was under a pre-PEPRA plan.

3. Retirement Benefit

Eligibility:

Prior to November 1, 2005, an IBEW Participant is eligible for normal service retirement upon attaining age 55 and completing 10 or more years of service. Effective November 1, 2005, IBEW members are eligible to retire upon reaching 25 years of service. Effective November 1, 2006, an IBEW Participant is eligible for normal service

**RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
IBEW PLAN ACTUARIAL VALUATION REPORT AS OF JULY 1, 2024**

APPENDIX C – SUMMARY OF PLAN PROVISIONS

or disability retirement upon attaining age 55 and completing five or more years of service.

PEPRA members are eligible upon attaining age 52 and completing five or more years of service.

Benefit Amount: The normal service retirement benefit is the greater of the benefit accrued under the plan provisions in effect on February 28, 1993 or the Participant's benefit under the current plan provisions. Under the current plan provision, the member would receive a percentage of the Participant's Average Final Monthly Earnings multiplied by the Participant's service at retirement.

For retirements and terminations on and after July 1, 2008, the percentage is equal to:

- 2.0%, if the member retires after age 55 and prior to age 60 and prior to 30 years of service,
- 2.5%, if the member retires at age 60 or later or with 30 or more years of service.

For PEPRA members, the benefit multiplier will be 1% at age 52, increasing by 0.1% for each year of age to 2.5% at 67. In between exact ages, the multiplier will increase by 0.025% for each quarter year increase in age.

Form of Benefit: The benefit begins at retirement and continues for the Participant's life with no cost of living adjustments. A Participant may elect to receive reduced benefits in the form of a contingent annuity with 50% or 100% continuing to a beneficiary after death, or in the form of an increased benefit prior to receiving Social Security benefits, and a reduced benefit thereafter.

4. Disability Benefit

Eligibility: A Participant is eligible for a disability benefit, if the Participant is unable to perform the duties of his or her job with the District, cannot be transferred to another job with the District, and has submitted satisfactory medical evidence of permanent disqualification from his or her job. 10 years of service is required to qualify for disability. For IBEW members with active service on or after November 1, 2006 (including PEPRA members), only five years of service is needed.

Benefit Amount: For IBEW members, the disability benefit is equal to the Normal Retirement Benefit, using the Participant's Average Final Monthly Earnings and service accrued through the date of

APPENDIX C – SUMMARY OF PLAN PROVISIONS

disability. The disability benefit cannot exceed the Retirement Benefit the member would be entitled to on the basis of Average Final Monthly Earnings determined at the date of disability multiplied by the service the member would have attained had employment continued until age 62, excluding PEPRA members.

Form of Benefit: The benefit begins at disability and continues until recovery or for the Participant's life with no cost of living adjustments. A Participant may elect to receive reduced benefits in the form of a contingent annuity with 50% or 100% continuing to a beneficiary after death, or in the form of an increased benefit prior to receiving Social Security benefits, and a reduced benefit thereafter.

5. Pre-Retirement Death Benefit

Eligibility: A Participant's surviving spouse or Domestic Partner is eligible for a pre-retirement death benefit, if the Participant has completed 10 years of service with the District. Effective November 1, 2006, an IBEW Participant's surviving spouse or Domestic Partner is eligible for a pre-retirement death benefit if the Participant has completed five years of service with the District, including PEPRA members.

Benefit Amount: The pre-retirement death benefit is the actuarial equivalent of the Normal Retirement Benefit, as if the member retired on the day before his/her death. If the member is not eligible to retire on the day before his/her death, but is vested in his/her benefit, the benefit shall be calculated using a 1% multiplier for PEPRA members and a 2% for all other members.

Form of Benefit: The death benefit begins when the Participant dies and continues for the life of the surviving spouse or Domestic Partner. No optional form of benefit may be elected. No cost of living increases are payable.

6. Termination Benefit

Eligibility: An IBEW Participant is eligible for a termination benefit after earning five years of service. The terminated Participant will be eligible to commence benefits at age 62 (or as early as age 55 if eligible).

PEPRA members are eligible for a termination benefit after earning five years of service, commencing as early as age 52.

Benefit Amount: The benefit payable to a vested terminated Participant is equal to the Normal Retirement Benefit, based on the provisions of the Plan in effect on the date the Participant terminated employment.

**RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
IBEW PLAN ACTUARIAL VALUATION REPORT AS OF JULY 1, 2024**

APPENDIX C – SUMMARY OF PLAN PROVISIONS

PEPRA members are eligible after earning five years of service for the full Normal Retirement Benefit earned on the date of termination, based on the service and Average Final Monthly Earnings accrued by the Participant at that point, and using the factor based on the age at which the benefit commences.

Form of Benefit: The termination benefit begins at retirement and continues for the Participant's life with no cost of living adjustments. A Participant may elect to receive reduced benefits in the form of a contingent annuity with 50% or 100% continuing to a beneficiary after death, or in the form of an increased benefit prior to receiving Social Security benefits, and a reduced benefit thereafter.

7. Withdrawal Benefit

Eligibility: PEPRA members who are not eligible for a termination benefit upon termination.

Benefit Amount: The withdrawal benefit is a refund of the Participant's accumulated contributions with interest.

Form of Benefit: The withdrawal benefit is paid in a lump sum upon election by the Participant.

8. Reciprocity Benefit

Eligibility: A Participant who transfers from this Plan to the RT Salaried Plan, and who is vested under this Plan, is eligible for a retirement benefit from this Plan.

Benefit Amount: The benefit payable to a vested transferred Participant is equal to the Normal Retirement Benefit based on service earned under this Plan to the date of transfer and based on Average Final Earnings computed under this Plan and the Salaried Plan together, as if the plans were a single plan.

Form of Benefit: The reciprocity benefit begins at retirement and continues for the Participant's life with no cost of living adjustments. A Participant may elect to receive reduced benefits in the form of a contingent annuity with 50% or 100% continuing to a beneficiary after death, or in the form of an increased benefit prior to receiving Social Security benefits, and a reduced benefit thereafter.

**RETIREMENT PLAN FOR SACRAMENTO REGIONAL TRANSIT DISTRICT EMPLOYEES:
IBEW PLAN ACTUARIAL VALUATION REPORT AS OF JULY 1, 2024**

APPENDIX C – SUMMARY OF PLAN PROVISIONS

9. Funding

Effective April 1, 2018, IBEW members hired or rehired by the District on or after January 1, 2015 contribute half of the normal cost of the PEPRA Plan rounded to the nearest 0.25%. Once established, the contribution rate for New Members will be adjusted to reflect a change in the normal cost rate, but only if the normal cost rate changes by more than 1% of payroll. For the Fiscal Year 2024-2025, the contribution rate for PEPRA members was 7.00% (based on 1/2 of 13.96%, rounded to the nearest quarter) of payroll. The normal cost rate for the PEPRA members as of the July 1, 2024 valuation is 14.22%, and since the change is less than 1%, the rate for the following fiscal year remains the same at 7.00%.

The remaining cost of the Plan is paid by the District.

10. Changes in Plan Provisions

None.

APPENDIX D – GLOSSARY

1. Actuarial Assumptions

Assumptions as to the occurrence of future events affecting pension costs such as mortality, withdrawal, disability, retirement, changes in compensation, and rates of investment return.

2. Actuarial Cost Method

A procedure for determining the actuarial present value of pension plan benefits and expenses and for developing an allocation of such value to each year of service, usually in the form of a normal cost and an Actuarial Liability.

3. Actuarial Gain (Loss)

The difference between actual experience and that expected based upon a set of actuarial Assumptions during the period between two actuarial valuation dates, as determined in accordance with a particular actuarial cost method.

4. Actuarial Liability

The portion of the actuarial present value of projected benefits that will not be paid by future normal costs. It represents the value of the past normal costs with interest to the valuation date.

5. Actuarial Present Value (Present Value)

The value as of a given date of a future amount or series of payments. The actuarial present value discounts the payments to the given date at the assumed investment return and includes the probability of the payment being made.

6. Actuarial Valuation

The determination, as of a specified date, of the normal cost, Actuarial Liability, Actuarial Value of Assets, and related actuarial present values for a pension plan.

7. Actuarial Value of Assets

The value of cash, investments, and other property belonging to a pension plan as used by the actuary for the purpose of an actuarial valuation. The purpose of an Actuarial Value of Assets is to smooth out fluctuations in market values.

8. Actuarially Equivalent

Of equal actuarial present value, determined as of a given date, with each value based on the same set of actuarial assumptions.

APPENDIX D – GLOSSARY

9. Amortization Payment

The portion of the pension plan contribution, which is designed to pay interest and principal on the Unfunded Actuarial Liability in order to pay for that liability in a given number of years.

10. Entry Age Normal Actuarial Cost Method

A method under which the actuarial present value of the projected benefits of each individual included in an actuarial valuation is allocated on a level basis over the earnings of the individual between entry age and assumed exit ages.

11. Funded Ratio

The ratio of the Actuarial Value of Assets to the Actuarial Liabilities.

12. Normal Cost

That portion of the actuarial present value of pension plan benefits and expenses that is allocated to a valuation year by the actuarial cost method.

13. Projected Benefits

Those pension plan benefit amounts which are expected to be paid in the future under a particular set of actuarial assumptions, taking into account such items as increases in future compensation and service credits.

14. Unfunded Actuarial Liability

The excess of the Actuarial Liability over the Actuarial Value of Assets. The Unfunded Actuarial Liability is not appropriate for assessing the sufficiency of plan assets to cover the estimated cost of settling the Plan's benefit obligation in the event of a plan termination or other similar action. However, it is an appropriate measure for assessing the need for or the amount of future contributions.

Classic Values, Innovative Advice
